

✿ The Ball Nozzle Syringe diffuses a soft, gentle, conical-shaped film of water, *reaching every part of the vaginal cavity*, cleansing thoroughly the mouth and neck of the womb and the *cul-de-sac*, and removing therefrom every particle of foreign matter, the presence of which is the cause of disease, pain and suffering. Its effect is one of gentle bathing, or spraying, rather than one of percussion, such as follows the application of a solid straight stream. This absence of force is absolutely necessary in applications to sensitive organs. The stream is curved in every direction, and is a hollow stream; it is therefore impos-

sible for it to enter a practically straight canal such as the uterine canal.
