END OF THE FIRST VOLUME.

TO CORRESPONDENTS.

We have received "AN ESSAY on the expediency of educating the people of Lower Canada, written in the year 1810; with the view of recommending the establishment of schools throughout the Province." This valuable tract, which bears witness to the piety and liberality of the author, will more particularly by its necessary allusions, to the want of Schools in the year 1810, induce our readers to reflect with pleasure upon the progress which has been made since that period in the great cause of popular education; it will appear in our next.—The 2d part of the Fall of Constantinople is received, and will also appear in our next.
