Irrigation in Dakota

Is causing that much maligned section of the Western country to blossom like the rose. Quoting from a published article on the subject, it is stated that "Men who are accustomed to farming in non-irrigated districts are slow to believe the reports of enormous yields of all kinds of farm products in those sections of the country where irrigation is practiced." An irrigated 40 acre farm produces greater and better results than a 640 acre farm cultivated in the ordinary way. In a few weeks we hope to be able to publish various items from different individuals giving their personal experience in irrigation farming.

In the meantime send for a free copy of an illustrated pamphlet in reference to Irrigation in Dakota, published by the Chicago, Milwaukee and St. Paul R'y Co. Address,
