

VALUABLE REMEDIES WORTHY OF ATTENTION.—Especially at this season are the tablets of "Antikamnia and Codeine," each containing $4\frac{1}{4}$ grains antikamnia and $\frac{1}{4}$ grain sulphate codeine, worthy of attention in the treatment of pulmonary diseases. This combination is a sedative to the respiratory centres in both acute and chronic disorders of the lungs. Cough, and in fact nearly all neuroses of the larynx are in the vast majority of cases, promptly and lastingly relieved and often entirely suppressed. In the treatment of la grippe and its sequelæ, its value is highly esteemed. In diseases of the respiratory organs, pain and cough are the symptoms which especially call for something to relieve, this combination does this, and in addition controls the violent movements accompanying the cough. To administer these tablets in the above conditions, place one tablet in the mouth, allowing it to dissolve

slowly, swallowing the saliva. Exhibited in the grinding pains which precede and follow labor; in the uterine contractions which often lead to abortion; as well as in the nocturnal pains of syphilis, the results obtained are most satisfactory. In the various neuralgias, and in all neuroses due to irregularities of menstruation this combination affords immediate relief, and the relief is not merely temporary and palliative, but in very many cases curative. In these last conditions, always instruct that tablets be crushed before taking.

CHEMISTRY OF CUSCO LEAVES.—From Bolivian cusco leaves Liebermann, Cybulski, and Giesel have isolated an alkaloid which they called cuschygrine. It occurs as a colorless oily liquid of the composition $C_{13}H_{24}N_2O$, soluble in water, forming a hydrate, $(C_{13}H_{24}N_2O)_{27}H_2O$, which crystallises in needles, melting at 40°
