No. 6 UNIVERSAL

Turning and Block Machine

For making all kinds of fancy turnings, such as balusters, spindlers, etc., round, square or octagon; also base and head blocks, corner beads, base angles, fence pickets, fan and star corner blocks, sunrise panels, twisted mouldings; adapted to panel raising, making circle casings, dadoing and rabbitting, cabinet sawing, etc.

This Combination Machine

is of the very best construction—built like a machine tool. Though covering a wide range of work, it is extremely simple in design. The knives are made in sections of plain tool steel, and a good mechanic can easily make new ones for special patterns. They have a solid, firm bearing in dovetailed grooves, and cut with a shear, producing smooth and perfect work.

A Complete Description Will Interest You—Ask For It.

C. MATTISON MACHINE WORKS,
883 FIFTH STREET, BELOIT, WIS.

ONE TO FIVE

One Strong Boy, with this machine, can sand as much round work as Five Expert Sanders can do with sand belts, and do it so much better that he will save you twenty-five to fifty per cent in paint and varnish.
