MONTREAL — WINNIPEG

PEDLAR'S "PERFECT" TONCAN METAL CULVERTS

LENGTHS UP TO 40 FEET. COUPLING BANDS FOR
LONGER LENGTHS. DIAMETERS 8 TO 84 INCHES.

The narrow and deep corrugations which are the essential feature of the Pedlar Culvert, give the maximum strength with the minimum weight. This great strength enables the Culvert to withstand tremendous external stresses from various types of rolling loads. It also gives it the power to resist great internal stresses from frost and ice. The enormous strength of Pedlar Culverts, combined with their ease of installation, makes them the first choice of engineers who go deeply into the study of road-building economy.
