

with any Schedule 1 chemical, or any other chemical that has no use for purposes not prohibited under the Convention above 1 tonne per year but can be used for chemical weapons purposes, or would be if the facility were operated;

(b) Any chemical weapon filling machines;

(c) Any other equipment specially designed, built or installed for the operation of the facility as a chemical weapons production facility, as distinct from a facility constructed according to prevailing commercial industry standards for facilities not producing super-toxic lethal or corrosive chemicals. (Examples include equipment made of high-nickel alloys or other special corrosion-resistant material; special equipment for waste control, waste treatment, air filtering, or solvent recovery; special containment enclosures and safety shields; non-standard laboratory equipment used to analyse toxic chemicals for chemical weapons purposes; custom-designed process control panels; dedicated spares for Specialized Equipment.)

"Standard Equipment" means:

(a) Production equipment which is generally used in the chemical industry and is not included in the types of Specialized Equipment;

(b) Other equipment commonly used in the chemical industry, such as fire-fighting equipment, guard and security/safety surveillance equipment, medical facilities, laboratory facilities, communications equipment.

The buildings mentioned in the definition of Chemical Weapons Production Facility in Article I cover Specialized Buildings and Standard Buildings.

"Specialized Building" means:

(a) Any building, including underground structures, containing Specialized Equipment in a production or filling configuration;

(b) Any building, including underground structures, which has distinctive features which distinguish it from buildings normally used for chemical production or filling activities not banned by the Convention.

"Standard Building" means any building, including underground structures, constructed to prevailing industry standards for facilities not producing super-toxic lethal or corrosive chemicals.

"Model Agreement" means a document specifying the general form and content for agreements concluded between a State Party and the Organization for fulfilling the verification provisions specified in this Annex to be developed by the Director-General of the Secretariat, taking into account guidelines drawn up by the Preparatory Commission.

"Production" of a chemical means the formation of a chemical through chemical reaction, including rearrangement.
