latest year of the record, being 500,354 tons. —
Ins Post.

Life Insurance men remind us
We can make our wives sublime,
And departing leave behind us
Widows worthy of our time.
We will give them such a send off
On the life insurance plan,
That when we departing end off,
They can scoop some other man.

The idea that the use of machinery deposes laborers from obtaining work is a fallacy that dies very hard. It is the most unreasonable chimera of all because it can be so readily dispelled by logic, and arises from a superficial view of the matter. A machine that does the work of three men may primarily depose two of the three from the particular labor that they have been engaged in, but by means of its facility for turning out products, openings for them are immediately made in other departments. Again increased facilities of production tend to reduce the cost, and favor greater consumption in consequence. Now add to this the constant enlarging demand from an augmenting population and a good idea may be gained of the importance attaching to use of machinery. It is not to be expected that workmen who are ignorant will properly reflect upon this matter, but by dinging it into their ears frequently they may gain knowledge that will be good for them. — *Trade Review.*

Personal.

Mr. John C. Siegfried, of Siegfried & Brandenstein, tea importers, San Francisco, Cal., was in the city, last week. Mr. Siegfried is well acquainted with the Pacific province, but

never before visited this part of Canada. He was greatly surprised at the beautiful summer weather which prevailed here during his visit, having come prepared for a temperature of forty below zero. The commercial importance of the country was also far beyond his expectations. The house of which Mr. Siegfried is a member, will open a branch at Chicago.

The Canadian Pacific Railway land department purposes shortly to establish agencies at the various stations along the main line and branches. The station agents will likely, in most cases, be appointed.

G. R. Pugsley, president of the Regina & Long Lake railway, recently informed a *Journal* reporter that the road will be pushed through to the South Saskatchewan river next season by the present company. About 125 miles of new road will be constructed.
