tario, addressing the Canadian Horsemen's and the Ontario Horse-Breeders' Association at a banquet, held in Toronto on Feb. 13, 1903, made the following statement: "The horses of Ontario are computed to be worth eight million dollars, and number about six hundred and ninety thousand. The Counties of Huron, Perth, Grey and Bruce produced one-fifth of the whole horse supply."

The insurance of ten per cent. of the horses in Canada would result in a premium income of considerably over a million dollars per year as the value of the horses in Canada at present is approximately three hundred millions of dollars. The business of live stock insurance is carried on very extensively in Europe and to a more or less extent in the United States, it being estimated that 35 per cent. of the animals of Europe are insured.

WHITE ROSE SHORTHORNS
MAKE FAIR AVERAGE

Notes of the Bagshaw Sale of

Cattle Sheep Realize Fine Prices.

The dispersion sale of exported and home bred Clydesdale and Hackney horses, shorthorn cattle and Yorkshire White and Ohio Chester hogs held on the farm of W. A. Bagehaw, Rose Hill Farm, near the Village of Uxbridge yesterday again demonstrated the high standard that Ontario farmers have attained in the line of pure bred stock.

While the cattle were only in fair condition, the quality was readily apparent, and while the prices generally could not be regarded as high, were for the most part satisfactory.

An interested visitor was Manager Fleming of the Toronto Street Railway, who expressed his appreciation of the choice quality of the stock generally.

Mr. Fleming was the purchaser of a fine young Hackney which he bought for \$210.

The Coteval sheep were an especially fine flock, and realized good prices, realizing in all more than \$1000. The cattle, it is estimated, would yield a

Mr. Bagnell's farm is delightfully situated, and commands a magnificent view of the Town of Uxbridge, and a large portion of the Townships of Burnhamthorpe and Uxbridge. The prevailing, and the large crowd in attendance, fared sumptuously. The auctioneers, Messrs. Silverdals and his partner, were happy in their handling of the crowd.

A few of the prices for shorthorns are appended:

Roam Imogene (60001), to J. W. Cook, 100
Queen Imogene, to J. W. Cook, 45
August Rose (64849), to J. W. Cook, 110
Holliday Rose (64849), to J. W. Cook, 75
Olive II., to J. W. Cook, 50
Flora Roseberry VIII (66207), to J. W. Cook, 85
White Duchess, to S. Bagshaw of London, 85
Idonia Queen II (57691), to S. Bagshaw, 75
Rose Duchess, to D. Watson, 457.50
In the above Lady Duffie (64849) (7538), imported by Graham Bros.,

chicks against the weather, cats or hawks, and it prevents the loss of any, as it is impossible for them to escape. Another, and not the least important feature of this colony house is the fact that it can be moved from time to time so as to give the chicks fresh ground on which to run.

This coop can also be used for putting broody hens in, and for fattening cockerels, fighting pullets, etc.

It can be made in any size to suit the builders' purpose. A good size is 3 1/2 ft. x 12 ft. floor space. One end is to be fitted with roosts, and the other with nests and feeding troughs.
