POOR DOCUMENT

ST. JOHN, N. B., MARCH 12, 1910

We know of no other medicine which has been so successful in relieving the suffering of women, or secured so many genuine testimonials, as has Lydia E. Pinkham's Vegetable Compound.

In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound. Almost every woman you meet has either been benefited by it, or knows some one who has.

In the Pinkham Laboratory at Lynn, Mass., are files containing over one million one hundred thousand letters from

taining over one million one hundred thousand letters from women seeking health, in which many openly state over their own signatures that they have regained their health by taking Lydia E. Pinkham's Vegetable Compound.

Lydia E. Pinkham's Vegetable Compound has saved many women from surgical operations.

Lydia E. Pinkham's Vegetable Compound is made exclusively from roots and herbs, and is perfectly harmless.

The reason why it is so successful is because it contains incredients which act directly upon the female operations.

ingredients which act directly upon the female organism,

restoring it to healthy and normal activity.

Thousands of unsolicited and genuine testimonials such s the following prove the efficiency of this simple remedy.

Belleriver, Que.—"Without Lydia E. Pinkham's Vegetable Compound I would not be alive. For five months I had painful and irregular periods and inflammation of the uterus. I suffered like a martyr and thought often of death. I consulted two doctors who could do nothing for me. I went to a hospital, and the best doctors said I must submit to an operation, because I had a tumor. I went back home much discouraged. One of the course of th

Women who are suffering from those distressing ills peculiar to their sex should not lose sight of these facts or doubt the ability of Lydia E. Pinkham's Vegetable Compound to restore their health.

SEEKING EX-MEMBERS
QUEEN'S OWN RIFLES.

Request That All Communicate With the Secretary of the Regiment's Semi-Centennial Re-Union, Semi-Centennial Re-Union.

Several thousands of former members of the Queen's Own Rifies will assemble from all parts of the continent at Toronto next June, for a reunion in celebration of the semi-centennial of the regiment. The festivities will commence Saturday, June 18th, with a reception at Government House, his honor, the lieutenant governor, like many other notables, being an exmember of the crack regiment. On Sunday a monster church parade of exmembers and the present members will be a unique affair. During the week grand historical pageants on a scale only equalled at the Quebec tercentenary, will be given by several thousand performers on the Rosedale athletic Grounds. In addition, there will be numerous social meetings of old comrades.

In nearly every town and city in the

LABOR MAKES

MORE THREATS

To Extend Strike if Deadlock Continues

levernor Pelitioned —Each Day Brings Situation Nearer a Crisis-Compers Talks.

PHILADELPHIA, March 11.—The demands for arbitration of the differences betwen the Philadelphia Rapid Transit Company and its 4,000 or more striking employes became insistent from within Philadelphia today and outside of it. Everywhere it was recognized that the failure to arrive at an arbitral agreement was the only thing which stood in the way of a speedy calling off of the sympathetic strike in this city, which has practically paralyzed the city's industrial life and which the labor leaders again threaten will extend it the deadlock continues.

These threats, perhaps, were the very things which stood in the way of an amicable adjustment.

At a representative meeting of business men today the call for arbitration was the keynote of a two and a half hours' debate, which culminated in demands upon both local and national influences to set in motion forces to bring the traction dispute before rediatory tribunals for settlement. Local financial, commercial and official bodies and the federal authorities as well as the salutary influence of the National Civic Tederation were appealed to to step in and end the difficulty.

Governor Stuart at Harrisburg was PHILADELPHIA, March 11.—The de-

cuity.

Governor Stuart at Harrisburg was betitioned by labor men to take action and the patriotic citizenship of the city and state was invoked in various resolutions, statements and petitions to exert its power to stop conditions which Philadelphia finds growing more intolerable daily.

Each day, however, seemingly brings the situation nearer a crisis. Good order prevailed throughout the city today. Not until late tonight was there any sort of an outbreak in any quarter of the city. Coming out of a meeting which was held in Musical Fund Hall at Eighth and Locust streets tonight a crowd displayed a turbulent spirit and passing trolley cars were stoned. The police by a show of force and the display of revolvers subdued the demonstration before much mischief was done. Notlody was seriously injured and there were no arrests. The meeting itself, thoroughly enthusiastic, was orderly. It was featured by a declaration by G. O. Pratt, leader of the striking car men, that the sympathetic strike would not stop in Pennsylvania if the fight were prolonged.

"We will go through the United States," declared Pratt.

Cars ran uninterruptedly today in greater number than since the strike began. The strikers did not claim many new accessions to their ranks, and such as there were, the employers claimed, were more than offset by desertions from the strikers' cause.

Royal Household Flour

"The Little Brother of The Rich"

TOW, this is not a talk about money.

It isn't a contrast between the rich and the poor, for in some things we are all equally rich and there are no poor brothers.

as good bread as the richest. The children who walk can have just as delicious pies and cakes and "goodies" as the children who ride in carriages.

All the money in the world cannot buy better flour than "ROYAL HOUSEHOLD", for there

And the woman who does her own baking can have just as good bread as is served to the Royal Household of England, and that is made from ROYAL HOUSEHOLD FLOUR sent to England from Canada.

And then, a barrel of "ROYAL HOUSE-HOLD" produces many more loaves than a barrel of ordinary flour. The bread is better-sweeter, nicer to eat—and more wholesome—has more health and strength in it.

biscuits and doughnuts. Children, whose mothers use "ROYAL HOUSEHOLD" at home, can have just as good baked things as the Princes and Prin-When it comes to "ROYAL HOUSEHOLD"

Also, it makes more delicious pies, cakes,

there are no rich or no poor. All can afford to buy the finest flour in the world, OGILVIE'S "ROYAL HOUSEHOLD". For though "ROYAL HOUSEHOLD" costs more per barrel than ordinary flour it contains

ENGINEERS FAVOR THE BUILDING OF STORAGE DAMS ON ST. JOHN RIVER

Interesting Evidence Given Before St. John River Commission at Rangor Yesterday Morning and Afternoon—Mr. Ferguson Advises That Competent Engineers be Engaged to Make **Preliminary Report**

BANGOR, Me., Mar. 11.—George Fowler, of New York, civil and hydraulic engineer, who has made surveys for the Grand Falls Power Co. on the St. John river relative to the storage facilities of the tributaries of the St. John and also prepared the plans for the development of the power plant at Grand Falls, was the first witness called by the River Commission yesterday. He was interrogated by A. J. Gregory, on behalf of the Dominion of Canada. He said he made an examination of the Fish River district tributary to the St. John and also Temiscouata Lake and its surroundings relative to the storage of water. On Eagle Lake, which flows into Fish River, he found fine sites for a dain at the foot of the lake. Examining the shores of the lake he found that the water could be raised without damage to a height of six feet. Mr. Fowler described other lakes tributary to the St. John, by way of the Fish River and estimated that the water in all the lakes in question might be raised six feet without any great damage. He estimated that the level of Square Lake and that the level of Square Lake in question might be raised six feet without any great damage. He estimate that the water in all the lakes in question might be raised six feet without any great damage. He estimate that the water all built of canada in the cost of the lake could be raised that the water in all the lakes in question might be raised six feet without any great damage. He estimate that the water made the estimate that the water in all the lakes in question might be raised six feet without any great damage. He estimate that the water all built of canada in the sorting of logs at Van The the dams. The found that the water to be used in the dry ing the water to be used in the dry ing the water to be used in the dams. The found that the water to be used in the dry ing the water to be used in the dry ing the water to be used in the dry ing the water to be used in the dry. The internation St. John river commission continued its hearing in this city. The ingression in question might be raised six feet without any great damage. He esti-! mated that the level of Square Lake could be raised seven feet without! could be raised seven feet without overflowing more than a third of a square mile. The overflowed land would include the site of Langley's sporting camps. A dam at the foot of Square Lake would also raise Mud and Long Lakes. The area of the chain of lelies flywing into Fish Piper is establed. of lakes fiwoing into Fish River is estimated to be about 54 square miles by the engineer. In making the estimates of the levels to which the water could be raised in these lakes Mr. Fowler said that he had been most conservative. It was the intention of the engineers if the project was earnied out. gineers if the project was carried out to erect two dams, one at the foot of Square Lake and another between Mud Square Lakes seven feet and the lakes and Goss Lakes, which would raise

Mr. Fowler was asked whether these the water would fill more than once in believe that they could be depended on to fill more than once completely, although he could not state definitely. The basins would fill at least once and artially again in the season. A dam sufficient to raise water in Square Lake to a level seven feet higher than ively little. A dam to raise Eagle Lake six fact would not have to be

Fowler, a New York engineer, was the principal witness. He stated that Eagle Lake could be raised six feet by raising the shores, and that after examining Upper Square, Second and Long takes he was satisfied the water could be stored to advantage without damage. He advocated the building of a dam between Square and Eagle lakes, which would raise the water six in the lake above.

Mr. Fowler's address advocated a thorough inspection of the St. John river from the Allegash mouth to Freleicton, and said that cross se tions smould be constructed. He believed also that the water in the Temiscouata river which reaches the St. John through

which reaches the Water six is at in the lake above.

Mr. Fowler's address advocated a thorough inspection of the St. John river from the Allegash mouth to invertent from the Allegash from the Water from the Allegash from the Madawaska can be preserved.

A. J. Gregory of Frederict in the Canadian counsel, believes that both governments will spend money to improve the river and to create a storage existem. He believes that storage reservoirs should be built on the Allegash. Fish and Aroostook rivers in Maine and on the Temiscouata in New Bruns-wick, and that thereby much of the trouble on the St. John can be avoided, meaning the sorting of logs at Van

raper Company has constructed for storing the water are all built of capterete. Concrete dams properly designed and constructed have an indefinite ed and constructed have an indefinite ler gth of life. Mr. Ferguson's evidence occupied the entire morning session. The afternoon session began at 2.30 c'clock, Engineer Ferguson being recalled. Some questions were asked in review of his testimony. He was inclined to think that an addition of 2,000 second feet flowage on the St. John river might be gained by storage, but was in doubt, as he was not familiar with the storage capacity available. To determine this, a series of measurements would be necessary and an observation of conditions. He advised that competent engineers be engaged for a preliminary report, the commission to make known the results they wished to reach and the engineers to make a report according.

The session was concluded at 4.30 p. r. The next meeting probably will be held in Ranger.

WEAK MEN HAVE COURAGE

If you get up in the morning an ache in your back, a dread with a dull brain, tired nerves, of the toil and hardships of everyday life, these are signals that your vitality is at a low ebb—that some of the organs or functions of your body are in a weakened, morbid condition.

If you are a young man, and weakened, morbid condition.

If you are a young man, and free rein for evil habits and passions has exhausted your vital energy, or if on the shady side of forty you have not the strength and stamina that should be possessed by a man of your years, you can regain

your health, strength and energy with Electricity.

"None are so blind as those who will not see," but if you are open to conviction, and want to improve your condition, I can convince you that my Belt does all I claim for it, and even more.

You don't need to be taught that restless nights, sleeplessness, despondency, inability to concentrate your thoughts, loss of appetite, weak back, headache, pains here and there in various parts of your body, lack of energy and push, are all signs of nervous break lown, physical debility, you know that; but what you want is a nemedy that will restore the vitality that you have lost.

If you have doctored and drugged and got no benefit, that's no sign you ought to give up. Drugs can't restore your vitality. Electricity is for men like you. It's the greatest nerve builder and body builder in the world today.

To those who are tired of paying without results, and to those who doubt if anything will help them. I make this offer. If you secure me my
