hally 0 ned Tuesday Afternoon by Sir Charles Tupper, Bart.

An Address Also Delivered by Hon. H. R. Emmerson, Provincial Premier.

Glorious Weather Greeted the Proceedings-A Good Attendance.

Although the exhibition turnstiles | we trust will be largely profitable to began to click as early as nine o'clock on the 13th inst the formal opening afternoon. The weather was perfect and the attendance good for the first day of the show

Preceded by the 62nd band, Sin Charles Tupper arrived at the exhibition building's main entrance abou welcomed by James Reynolds, and escorted to the platform, on which were seated: President and Mrs. Pitfield, C. A. Everett, Hon. H. R. Emmerson Lady Tupper, Hon. H. D. Richard Hon. Donald Ferguson, Judge Mc-Leod, Geo. F. Baird, R. B. Emmerson Hon. C. H. Labillois, Surveyor General Dunn, Hon. L. P. Farris, Hon. L. J. Tweedie, Senator Wood, Senator King, S. D. Scott, Hon. Mr. Paterson, minis Gallagher, Thomas Killen, Magistrate Ritchie, J. D. Hazen, J. A. Chesley and ex-Mayor Robertson.

Among other prominent person Rev. W. E. Keinstead, Dr. Bruce, Geo Blake, Ald. Macrae, H. A. Drury, Rev. Dr. Black, John Hardy, Rev. J. W Clark, Rev. J. H. Manning, T. L. Hay, W. M. Jarvis, Dr. Hetherington, T. H. D. Phinney, Q. C., C. H. Phalen, Ald. McGoldrick, J. R. Stone, F. W. Wisdom. Robert Jardine, James McAvity, W. C. R. Allen and many others. The throng in the vicinity of the band was large, a great number of ladies

When order had been obtained, the president delivered the opening ad-

PRESIDENT PITFIELD'S AD-DRESS.

Ladies and Gentlemen-I have very great pleasure in extending to you a cordial welcome in behalf of the Exhibition Association of the city and county of St. John, at this, the opening of the sixth annual exhibition held

by my associates as their chief executive officer, and during that period I am happy to say, our exhibition has garded as an annual event, and is. looked forward to with a large degree of satisfaction by the people of this city and the maritime provinces, and this year has attracted more attention

During the period of four years we have expended on permanent struc-tures and in capital account, the sum of over \$17,006, and during the sange period we have paid in prizes to the sum of between \$25,000 and \$30,000.

Last year, having received no government assistance, we raised a guar-antee fund among our own citizens, which was willingly subscribed and cheerfully raid to the extent of \$2,800. gagement and start the present year free from debt. I believe the exhibition this year will be of such an atwill be the largest in its history, and I trust our citizens will do all in their power by patronizing it as much as

The exhibition to be opened today is inducements to visitors never before presented. We have provided a good grand stand and a new poultry build-Nor have special attractions and amusements been neglected. We have made much larger expenditures than ever before, and hope for much more

I desire to thank the citizens of St John for their generous contributions to the guarantee fund; also the mayor

all in their power to facilitate and as-sist us in making this exhibition a success. They kindly allowed us the forestry exhibit, which created such a much publicity, to be presented here, and you will find it one of the most of which any exhibition might well

The wheat policy, I trust, will prove an unqualified success. It has given an impetus to the grain exhibits, and even though the crop may not prove satisfactory this year, I trust the farmers will not be listouraged, but keep trying and profit by past experi-ence, and I have no doubt they will be as successful in the raising of wheat as in any other kind of grain.

The Exhibition Association are desirous that the exhibition should be entirely satisfactory to the governthis province, and we hope that the provincial government may see their way clear to give us an annual grant

the province at large.

We also desire to thank the various gricultural societies hroughout the province, the Farmers and Dairymen's iation, and the stock raisers for

I desire to thank the department of marine and fisheries of Canada for tirds, which is a very attractive exhihit ind sal

It is now my pleasure to introduce that well known political giant and open the exhibition, whose name is so well and favorably known on this continent and in Europe, who has teen so many years in public life fighting the battles of his party and country, but country always first, who has endeavored to make Canada as well known as any other portion of the British empire, and who has seen the results of his labors in the great and rapid development of this young nation, who can justly be termed the way, who fought his battles in parliament and out of parliament, in the money markets of the world, assailed by able opponents, but who has lived to see the great international highway on a solid basis, and the lands along its lines and homes of thousands or happy, prosperous people, in the A. Macdonald, "whether he was right or whether he was wrong, his thoughts and desires were in the best interests and for the advancement of the Canadian people.'

Ladies and gentlemen, I have much pleasure in introducing Sir Charles Tupper, Baronet,

SIR CHARLES TUPPER. was received with heary applause, said he felt greatly flattered by the remarks of the president and the invitation that had been extended to him to open this magnificent exhibition. He was not in the least surprised to learn from President Pitfield's address that the citizens of St. year, nor was he surprised to hear that the government of which was the leader, had in like manner regarded this exhibition as something worthy of their most generous aid from the public funds. There could be no more worthy way in walch to use the money of the people for an institution of this kind, which, he was glad to know, was not restricted in its character, but which, as he understood it, was of international scope, so that the prizes here awarded were given irrespective of the origin of the product, be it in a neighboring prov-ince or from across the United States horder There was nothing in his judgment better calculated to advance people than opportunities such as this exhibition afforded for them to meet in open competition with the best ada in general since confede products not only of their own land out of other countries as well. hibitions like this strengthened and stimulated the people and directed them in the line of advance which the agricultural and every other industry of the country should take and was taking. In that way exhibitions were fraught with benefit to the whole people. But he had to confess to some dent's eulogism on this occasion of his colitical services. It was on rare occasions like that that were the happy pots where politicians could meet together on neutral ground and work ogether for the general good. the present day, continued Sir Charment and progress. Those rulers who do not follow such a policy will find the place where they lived going ustern instead of ahead. Look, continued the speaker, at the thirty-one years of Canada's national life. Thirty-two years are but a day in the life of a nation, yet what an advance Canada has made in that period! Beore that time we had no bond of ommon union; no means of rapid he other. New Brunswick and Nova Scotia lay side by side, without communication with each other by rail or with the upper provinces, and that great province of Ontario was depen-dent on a foreign country for that which was necessary to its very life
-access to the sea. Then the vast territory of Rupert's Land was under the control of a private corporation the Hudson Bay company. That greatest, most magnificent portion of Rocky Mountains, presented an insur-mountable barrier between it and British Columbia. Lord Wolseley that day, with all his energy and ability, found himself after weary months spent in getting to the head

of Lake Superior, 400 miles from Fort

complete a journey now done in three or four days. Dealing further with

ntion of his hearers to a few res from the trade returns. In our whole trade was about 349.-100. For the year that ended on such indications of rapid strides of progress and development in this land of ours, it became everybody in post-tions of responsibility, not to neglect the means such as an exhibition like

with the advancing current.
The St. John Exhibition Association, The St. John Exhibition Association, said Sir Charles, was entitled to the active and most enthusiastic support of every lover of his country in New Brunswick. It had a sound claim to such aid as the present government in the interest of the whole province had this year extended to it. Great as had been the progress of the suc-cessive St. John exhibitions of recent

New Brunswick was in many respects singularly favored. She can boast of your most magnificent har-bor. The game exhibit now for the first time shown here, indicated that no place in Canada afforded more attractions to sportsmen. The Miramichi and the Nepisiquit and other northern rivers were stocked with salmon, and he firmly believed it would pay the province of New Brunswick to place this game exhibit in the heart of London, to show not only the sportsmen of Great Britain, but of the world, what New Brunswick can offer them. This might seem a small thing. But what attracts capital is not trivial. These sportsmen were mostly wealthy men and once here they might settle in the country or be brought to invest capital in the trovince, and thus be of material as-

sistance to its development

The efforts of the government to stimulate agriculture were in the right direction. The British Isles constitutel an almost unlimited market for the products of the fields and farms of New Brunswick, and in this connection Sir Charles read from the agricultural statistics of Ireland, a country little larger than New Brunswick, to show that its agricultural products in one year exceeded in value the output of all the gold mines of the world. And yet Ireland was in climate and soil not the equal of New Brunswick. He was glad to find the Hon. Mr. Fisher, the dominion minis ter of agriculture, and Prof. Robertson, his able lieutenant in charge of the dairy industry, engaged in the patriotic work of making known to the people of Great Britain the dairying resources of Canada. But it was not dairy products alone that Canada was exporting to the mother land. She sent much of many other commo dities. New Branswick was able to compete successfully vith the rest of the dominion in the British market in most lines of exports from the farm, but she could not hope to com pete with Manitoba in the article of wheat, that province having this year the wonderful crop of 30,000,000 bushels. He knew no means better able to stimulate and educate New Brunswick, with its fertile soil and sturdy people, up to raising the best in all lines, than the work in which the St. John Exhibition Association was engaged. He congratulated the assoand if any word he had dropped would stimulate two blades of grass to grow where only one had grown before, he would feel abundantly rewarded. He wished St. John and its exhibition God speed. (Prolonged

President Pitfield then introduced Premier Emmerson, and in so doing took occasion to warmly endorse th

agricultural policy of the governm and to express his high personal admiration of the rremier. HON. MR. EMMERSON, who was well received, said he deemed himself peculiarly fortunate in being permitted to take a prominent part in the opening proceedings of this annual exhibition. It was particularly for-tunate, he said, because, following the example of Sir Charles Tupper, who had referred to the progress of Canproposed to allude to the growth native province within tively recent years. In the history of nations sometimes opportunities were seized, sometimes they were not. But time. In refusing to join with chief European nations when they recently proposed to interfere on behalf of Spain and in throwing her moral in the war just ended, Great Britain had seized the opportunity that presented itself for cementing more close ly than ever before the two Auglo-Saxon peoples of the world ment that he hoped would endure for ever. So St. John had seized the right moment, the opportunity to constitute great ships, and was encircled by the very aroma of the sea. St. John to-day stood high in Canada, and he could heartily endorse the fitting tri-

New Brunswick might not in the past have done all she could on every sire of her people to press onward and

His government, in the desire timulate and develop the agricultural terests of the province, had made an past few weeks had been against the wheat crop, he still had faith that New Brunswick would yet grow New Brunswick would yet grow enough wheat to feed her own people. One fact was worth a thousand theories, and we had the fact that in June and July no part of Canada could show better fields of wheat per acre, than were to be seen in this province. He was convinced by this that Now. Brunswick could that New Brunswick could g wheat. He had an abiding faith force of Canadian volunteers (better than British troops) taking weeks to the future of his native province, not only agriculturally, but in its as

strongest belief and faith that some day he would stand on this very platform and show that his predictions had been fulfilled.

Hon. Mr. Emmerson here read an this affords to carry the country along 13th, 1846, which had been unearthed in the provincial archives when re-cently searching for records in con-nection with the Feman raid. The letter, which was from the first clerk of the peace of Albert county after it had been set off from Westmorland county, contained a £1 note that had been overlooked by the government of that day (when governments were not so zealous in grabbing every dol-lar, as they now are), and a request that his correspondence might be ad-dressed to him at Dorchester by a particular mail route, and thereby save fourteen days on the road from and it gave an indication of what the mail service then was and what the roads then were. He was pleased hear Sir Charles' references to progress of the dominion, but he thought, taking this letter as his text, had pointedly shown that New Branswick had gone ahead at a pretty good rate, as compared with the res

> New Brunswick a beautiful faith that would brighten the shadows that had too long surrounded them, and they were beginning to realize that there was yet much for them to do. There were opportunities of advancement in other lines than agriculture, and he nad the strongest faith that the people would prove themselves equal to the occasion. Men might differ politically, but when they cast aside their political spectacles, they would all see alike as to those practical ques-tions on which depended the welfare and advancement of the province. In conclusion, Mr. Emmerson thanked the chairman for the too flattering words of his introduction, and the

association for its invitation take in the opening proceedings. his own behalf and in the name of the government of which he had the honor to be the head, he wished the city of St. John every success, not only now, but throughout the future. (Applause, Sir Charles Tupper then announced the exhibition duly opened.

THE BEST FAIR EXHIBITS. One of the most attractive displays at the exhibition is that of the Egyptian Rheumatic Oil. This is situated in a fine place in the main building and is in charge of the agent of the Egyptian Rheumatic Oil Co., Stanley John H. Barnstead, the manager of the company, is also here from Halifax. This company has an article of sterling merit to introduce It is a new remedy and has in a brief space of time since its introduction made some marvellous cures of ob stinate and long standing cases of rheumatism-and offers for the moderate sum of twenty-five cents, almost certain relief from one of the most distrassing maladies of our nor-

SOUVENIR TEA POT FREE. One of the exhibits which is atracting a great deal of attention is This is the new baking, which is claimed by competent judges to be equal to any powder made. In a show case is shown several kinds of cake and biscrits, baked with this baking powder, by S. J. Lauckner, the well known pastry and fancy baker. Testimonials are also shown from Mr. Raymond of the Royal Hotel, Mr. Wilson, manager of the Grand Hotel, Yarmouth, N. S., and S. J. Lauckner, all of whom state that this powder gives the best of satisfaction. housekeepers leaving an order at the booth, to be filled through any firstclass retail grocer, for a one pound tin of the baking powder, will be given free of charge a handsome

THE ATTENDANCE The turnstiles Tuesday registered 1207 paid admissions against 3,382 for the first day of the exhibition of 1897 and but 400 for the first day of 1896. The attendance on the second day last year was 2701, and on the second day of 1896 it was 2258. The prospects are that these figures

will be topped today. All the counties of the province save

three are competitors for the New Brunswick government prizes offered for the best exhibits of fruit and D. G. Smith has in his exhibit of live

rout and salmon one of the most at-ractive shows in the main building.

Senator Ferguson of P. E. Island is here with exhibits of Galloway cat-tle and Shropshire sheep, and what is a new venture for an islander, he as entered into competition with

Prince Edward Island shows well to the front this year in the matter of in charge of that department of the fair. There are many birds yet to

ook to the main building than ever way of novelties.

The Robertson Churn Co. of Fredericton have an exhibit of their patent churns in the Agricultural Hall, and will be pleased to show them to

commencing to appreciate the large show at its true worth, and leads to the belief that with the generous patronage which should start in today from all parts of the country the

***** total attendance will be a record The turnstiles Wednesday recorded 3,283 paid admissions, a gain of 582 and 1,625 respectively over the second day's figures of the exhibitions of 1897

The attendance on the third day last year was 4,356, which should exceeded today.

It is the universal verdict of every I taken as a whole, is far ahead of its predecessors. The display in the main buildings possesses a freshness variety that come as unexpected pleasure to those and were of the opinion that one exhibition is pretty much a reproduction of what had been seen a year before. The fishery and forestry exhibits contributed by the dominion and provincial governments, together with the fine showing made by the Natural History Society, constitute a feature not heretofore identified with St. John exhibitions, and give to the southern annex the true appearance of a fair, rather than what it has hitherto looked like a section of King street store fronts. Then the arrangement of the exhibits in all the buildings, which is a departure from the old fashioned lines, adds to the general novelty of the effect to those who are in the habit of attending annual exhibitions. Outside, on the grounds, too, change has been the order of the day. The fireworks will be set off on the southern side of the square, and will be seen to the best advantage from the mammoth new grand stand that impinges on the classic territory of Sheffield street. The poultry hall is an up to date building, so constructed as to afford every visitor a perfect view of every coop and a good chance to see

all the birds. The vaudeville company in amuse ment hall is the best ever brought by the exhibition association, and is remarkable for its acrobatic talents and laughter parts. The performing donkey has caught the visitors one and ali as the funniest thing within the

A BIRD'S EYE VIEW The arrangement of exhibits in the industrial buildings is characterized

On the centre floor of the main building, south from the central passage to the grounds are the pretty ooths of the White Candy Co., and Magee's fruit pagcda; Menier, shown by Bowman & Angevine; a big display of the products of the Ossekeag Stamping Co.; the spacious and lofty show of the St. John Cotton Mills, and J. E. Wilson's stoves. Under the southern galleries, the Egyptian Rheumatic Oil Co.'s display; Ralston's Health Club foods; the Albert phosphates; H. L. Coombs' show of soap and stationery; Washington's ice cream parlors; and under the gallery to the annex the tasteful and elaborate display of the James Robertson Co., one of the most attractive in the building; Colpitts' honey, and the col-lection of Canadian fish from the Dominion museum at Ottawa. Under the south-western gallery are a lot of Brantford bicycles, and the Cloverdale

On the centre of the floor, north of the passageway, are T. Rankin & Son's great display of biscuits: a stock of canned meats by W. Clark of Mon-Vappan Experimental Farm; Gibbon Co.'s miniature coal and wood yard; the Lordly Manufacturing Company's furniture, and the cedar decorated booth of the Sussex Mineral Springs

Under the northern galleries are the Canadian Express Co.'s office; large model of the ship Robert Reed, A. D. 1853; the Y. M. C. A. public reading the A. O. F. and I. O. F., and some

one sees D. Magee's Sons' big show of furs and fur goods; a display of pianos; Harold Climo's photographic solon; the Currie Business Univerplay of boots and shoes; the N. B. W. C. T. Union booth; Holman & Co.'s array of wall papers; A. O. Skinner's carpets; Ritchie's Art Gallery, containing the Birth of Venus and other omas Organ and Plano Co.'s stall; E. C. Crawford's sewing machines; Doyle & Lambert's exhibit of plumbing; J. A. Whelpley & Co.'s skates; C. & E. Everett's rich showing of furs: the Imperial Pop Corn stand; the show of the Eagle Stove Dressing Co.; F. Everelov's published in the show of the Eagle Stove Dressing Co.; F. In the gallery passage leading to the annex are Harold Climos's long array of photos, the only show of the kind in the building, Mrs. George Diggs's exhibits not yet open to inspection.

In the passage from the western main entrance on the ground floor are many minor exhibits and attractions, trical supplies by James Hunter, hard by the general offices of the exhibition management, and T. H. Estabrooks

and C. P. itors. But and there
