

HERE'S PROOF

These run-of-the-mill factory test groups, fired from an autoloading pistol in a machine rest at 50 yards, range from .4" to .9". Placed over a 50-yard Standard Slow Fire Pistol Target for comparison, they show what "Central V's" can do.

They're actual proof that "Central V's" will give you the extra margin you need for a top score.

CENTRAL V's
