THE BEE-KEEPERS' REVIEW

If ever a bee paper was started with a place ready and waiting for it, the **REVIEW** has had that luck. The first number was welcomed before it was read, it took its place easily and at once among the things that justify their own existence, and need no probation before being fully and finally accepted. It is an imitation of none of our contemporaries, and it is on a level with the best of them, both in the merits of its general scheme and in typographical neatness. This, we believe, will be the verdict of the intelligent bee-keeping public, and, as proof of the correctness of this belief, we append the following, which we select from a large number of similar congratulations:

"I am greatly pleased with the **REVIEW** and think it very creditable. It must take the lead with intelligent bee-keepers." I. L. Taylor, Lapeer, Mich.

"You have made an excellent start; and I am very favorably impressed with your plan of making each issue a 'special number.'" E. M. Nayhurst, Kansas City, Mo.

"From a practical standpoint you are well qualified to make the venture a success. I hope you may do well financially and establish an enviable reputation for editorial ability as you have already as a writer on apicultural topics." Eugene Secor, Forest City, Iowa.

"**REVIEW** No. 1 lies before me, and I must say it is like a chestnut—brimful of meat, properly cooked and served in first-class palatable order. Before reading it I thought: 'What can friend Hutchinson say that has not already been said by others?' But you have given us a feast of fat things. If the **REVIEW** keeps up to the standard of No. 1 it has a bright future before it—W. E. Clark, Oriskany, N.Y.

"I like the **REVIEW** in every respect. There is more in it than in any other bee journal I have ever seen—that is, more real meat, or what is called meat, as I see it. The whole matter, including 'ads.," is tastefully arranged. I cannot conceive who would not instantly subscribe, at the price, after seeing a copy."—John Heddon, Dowagiac, Mich.

"I congratulate you upon the excellence of the **REVIEW**. It will be an honor to the craft and to our State, if you maintain it at the starting pitch—and I do not doubt but you will. At first I was sorry. What we want is fewer, better papers. But I forgot for the moment who was at the helm. I believe you will succeed, and if you do not go to the top you will stride well up."—Prof. A. J. Cook, Agricultural College, Mich.

"Sample copy of the **REVIEW** is at hand, and I was agreeably surprised, to say the least. As a rule, journals in starting furnish at first a sickly discouraging appearance that stamps FAILURE all over them. What a contrast in beholding the **REVIEW**! Why, friend Hutchinson, the first glance at it shows its success. And then its contents—the very cream of advanced bee literature. I read it through before laying it out of my hand.—E. Kretchmer, Coburg, Iowa.

Four numbers of the **REVIEW** have been issued. The January number discusses "Disturbing Bees in Winter," the February issue is devoted to "Temperature" as applied to bee repositories, the March number takes up the subject of "Planting for Honey," while "Spring Management" is the special topic of the April issue. The special subject of the May **REVIEW** will be "Giving Bees." Besides these special discussions, which are carried on by the best bee-keepers of the country, there are several pages in each issue devoted to short, sharp, concise editorials upon current apicultural topics. An exhaustive review of Mr. Cheshire's book, "Bees and Bee-Keeping, Vol. II.," is begun in the March **REVIEW**, and will be finished in the May number. If you wish for the cream of this great work, read these three numbers. Price of the **REVIEW** is 50 cents a year. Samples cheerfully sent upon application.

THE PRODUCTION OF COMB HONEY.

A neat little book of 45 pages, price 25 cents. The **REVIEW** and this book for 65 cents. Stamps taken either U.S. or Canadian. Address

W. Z. HUTCHINSON,
