A hundred cents worth of fence for a dollar!

That's what you have a right to demand before parting with your money. That's what we want you to insist upon getting, whatever make of fence you buy. It's what you will get if you buy FROST FENCE.

We have never yet offered any man two dollars' worth of fence for a dollar. It can't be done. We wouldn't expect you to believe us if we claimed to be doing so week after week and still continued in business.

We can make good fence at less cost than other firms because we make our own wire. Frost Wire is carefully drawn to gauge, then finely tempered to the proper degree of hardness for fence, and finally given any cost of garanting to fit if or withstanding Canadian climatic variations. Any unprejudeed opinion will readily pronounce

Frost Fence First

We build it for long service. The deep wave-spring in the laterals furnishes ample reserve spring for future give-and-take. "Cheap" Fences fall down right here, because the spring is drawn out of the laterals at the time when the fence is tight enough to staple to the posts, and future expansion during the hot summer leaves the fence all slack and out of line.

You simply can't find a weak spot in either the material or workmanship of FROST FENCE, and the test of years confirms your judgment in buying it.

If you can't get FROST FENCE, write us direct. We may need an agent in your district.

Frost Wire Fence Co., Limited, Hamilton, Ont.

**************************** MARKET REVIEW AND FORECAST

Toronto, Monday, Feb. 28.—Spring trade in the wholesal business is continuing an interest of the continuing and the season of the continuing and the season of the season

is strong. Other lines are practically unchanged.
