************************* NEW POLICY COVERS RISKS FROM SUBMARINES AND MINES P. J. Charlebols sold to Mrs. Charles Senecal lot No. 339-345 Cote St. Louis, measuring 26 x 103 feet, The street of \$10,000.

ing and Registration of British Brokers De-ferred Until After the War.

London, April 21.-A natural and logical extension of the scheme for insurance against "Zeppelin raids." bombardment and invasion is to be found in the indemnity against submarine attacks, which the enterprising British Dominions General Insurance Company embodies in a special policy cover-ing passenger risks at sea. Crossing from Dover to Calais, or from Southampton to St. Heilers, a traveller may well realize that there is at the present time a possibility of the boat being blown up, and these special policies, issued for single or return journeys, if they do nothing to allay apprehensions may, at all events, bring a consoling reflection in the knowledge that something practical has been done for one's family if the worst happens. These policies, by the way, apply to damage by enemy submarines or other war ships and also to mines.

The war is the ever-present consideration, and al. other matters must be relegated to the background. even important internal reforms must wait until the declaration of peace, and, as for private affairs being allowed to take up the time of the authorities, it is not to be heard of. These statements have been it is not to be neard of. These statements have been heard so often during the past six months that no lone was surprised by the announcement made by Sir John Runtz, presiding at the annual meeting of the John Runtz, presiding at the annual meeting of the large of John Runtz, presiding at the annual infecting of the Corporation of Insurance Brokers on Friday, to the effect that the Board of Trade, to whom the matter had been referred by the Chancellor of the Exche-quer, had "suggested" that the Corporation's Bill with the question of licensing and registration had better be deferred until after the war. The ouraging intimation has, however, been given that at the proper time" such matters shall be carefully sidered." which is something to go on with.

At a special general meeting of the Equity and Law Life Assurance Society, the directors had the satisfaction of presenting an excellent bonus report. Profits from remunerative investment of funds, econmanagement and favorable mortality arising from the careful selection of lives were "as satisfac-tory as was anticipated" throughout the past quinquennium, and, after more than maintaining the stringency of the reserves, meeting a nett depreciation of £134.248 in securities, setting aside an investment reserve fund of £50,000 and carrying forward an increased special reserve of £32,998, the surplus listributed is the largest in the history of the Society, viz., £506,044. The policyholders' share is equivalent, to reversionary bonuses amounting to LLOYDS QUOTE 50 P.C. ON RISK per cent per annum to £3 18s per cent per annum coording to the class and duration of the policy and the age of the assured.

The question of abstinence from alcoholic drink, ow before the public, voluntary or otherwise, has, of course, a special interest for those connected with ity of drawing attention to the advantages they give to total abstainers and would thereby benefit some.

Of this the London Financial Times remarks:

"The rate appears very high, since those compe-
