

NOTICES.

"CHICKENS IN THE PARLOR."

"The farmer to-day," writes Mr. Geo. H. Stahl, of Quincy, Ill., manufacturer of the famous "Model Excelsior Incubator," "can hatch chickens in the parlor without prejudice either to the parlor or the birds," provided he uses this handsome and efficient machine for that purpose. Mr. Stahl is said to control some 60 patents on incubator construction, and runs an immense factory. A special feature in the "Model Excelsior" is the double regulator for controlling temperature. That he should do an immense business is only natural.

The Cradle Churn, which has been advertised in our columns for the past year or so, has won its way into very general favor. Hundreds of churns have been invented and put on the market, but, with very few exceptions, they have been superseded by something simpler and better, or have proved of little value in themselves. The Cradle Churn, however, invented by Mr. Hamilton, Nepeawa, Man., has stood the crucial test of the past few years, during which such vast strides have been made in the dairy world, and in which time so many old notions, and old-fashioned dairy utensils have been subjected to back shelves in the attic. Chas. Bockh & Sons, 80 York street, Toronto, have now obtained the sole agency for this churn for the Dominion of Canada. As indicated by the name, this churn is on rockers, and moves with a cradle motion, the cream taking a figure 8 motion, which thoroughly mixes it, and "makes" the butter very rapidly. There are no paddles inside; it is thus easily washed, and easily got at. The cover is not tight-fitting, thus allowing a free current of air all the time in the churn; whereas, the revolving churns must be frequently stopped and opened to allow the gas to escape. The churn is all fastened together, is easily moved about, and there is no danger of upsetting or the head falling out, emptying the contents on the floor. It is claimed for the Cradle Churn that it is easier to work, easier to clean, and will make the best granulated butter in as short a time and with much less labor than any other churn in the market. There are now 1,000 of these churns in use throughout the Dominion, not one complaint having been made to the proprietors, while they possess hundreds of commendations.

THE DR. H. W. LEAVITT DEHORNING CLIPPER.

The accompanying illustration conveys an accurate idea of the above instrument, which is one of the most powerful and efficient made for removing the horns of cattle.

Great improvements have been made in the Clipper—the arrangement of cogs, the same movement of handles moving the knife twice as far as before; in other words, the handles need be moved only half the distance. The end blade is also drawn up at the same time the other goes down, which greatly facilitates the cutting, as a practical man will readily see. Its weight is only 14 lbs., and the knives are easily removed for sharpening. Any additional information may be obtained from S. S. Kimball, 577 Craig street, Montreal. Above advertisement appears elsewhere.

SECURE GOOD SEED.

A good change in seed oats is certainly most advantageous. The next great consideration is to secure the stock of seeds in first-class order, and that the varieties selected are such as will give ample yield, and be an improvement on varieties sown in the past. Among the most desirable varieties of field seeds offered this season by J. A. Simmers, Toronto, Ont., are the New Challenge White Oats, Peerless White Oats, and Canada Beauty Peas. Mr. Simmers states that the New White Challenge Oats gave them a yield of about 80 bushels to the acre in 1894, which is certainly a very creditable turn out, indicating that this variety will be largely sown this season. The Peerless White Oat is also a very desirable variety. It was sown to a fairly large extent in the past season. It is a good yielder. The Siberian White Oats also are to be had at Simmers', at very low price. Price will be given on application. All the other oats are quoted in another column in this issue. Farmers wishing to get a good reliable change of seed will have their orders promptly attended to by forwarding them to Mr. Simmers. Simmers' descriptive catalogue of seeds for 1895 accompanies all orders sent to the firm. Orders for Permanent Grass Seed Mixtures, Clover and Timothy Seeds, are promptly attended to and re-cleaned seed is supplied to farmers at a very slight advance on the ordinary seeds usually sent out by dealers.

INCUBATION AT THE O. A. C.

Mr. L. G. Jarvis, Superintendent of the new Poultry department at the Agricultural College, Guelph, writes under date of March 13th, to Geo. Ertel & Co., London, Ont., as follows: "So far the Incubator (Victor) is running all right, and very regular. Have had no trouble. We are keeping it at 102 and it has not varied over a degree either way since starting. In fact, could not run more regular. The regulator is simple and easily adjusted."

HOW TO GET "SUNLIGHT" BOOKS.

Send twelve "Sunlight" Soap wrappers to Lever Bros. Ltd., 13 Scott St., Toronto, who will send post-paid a paper-covered book, 149 pages. By leaving the ends of the parcel open, it will go for one cent postage. Remember "Sunlight" now sells at six cents per tin bar.
