This new and beautiful gourd is a native of Japan where it is extensively grown for nest-eggs, being so near the size, shape and color of hen's eggs as almost to deceive the naked eye; hard and durable shell, and as hens like them better than glass eggs they are very valuable for this purpose.

The Japanese Nest Egg Gourd is one of the most beautiful and rapid climbers, very desirable for covering, screens, sheds or old buildings, and will soon form a mass of green foliage thickly dotted with beautiful white eggs.
