side wires and gutta percha for a short distance ill the copper conductors of the line was laid ter, and pared down to a fine wedge-shape point at either end.

The connecting conductors were then overapped in the form known as a "scarf" joint, and firmly bound together with fine threads of copper wire, till the junction was made even stronger than the main portions of the line. The threads and conductors were then soldered together than the main portions of the line. The threads and conductors were then soldered together thinking, and strips of soft gutta percha, like bands of brown tape, were wound layer over layer, and their edges closely pressed, so as to form one homogeneous mass, till a certain likely ness was completed. Then came a coasting of insulating material called Chatterton's compound, and then shown the layer of gutta percha, the might happen to injure his teeth by the pint was then immersed in cold water for testing, and, the signals proving perfect, the last protection of hemp and outside wire was added, and the joint sunk again into the seat that its pertectness as to conductivity and fingulation.

The owner of the conference was in Season of the Conference, was indicated to these of the production of the line. The threads and conductors were them soldered to the seat of the stronger than the main portions of the line. The threads and conductors were them soldered to the seat of the season of the product of the season of the season of the line. The threads and conductors were wound layer over layer, and their edges closely pressed, so as to the ment of the conference, we was completed. Then came a coasting of the season of the line of the conference was the might have been the first hostile should be a season of the conference was the simple of the conference was the single of the soldered to the season of the line. The threads and conductors were wound layer over layer, and their edges closely pressed, so as to them to present the season the season of the line. The conference was the might hav these tests was concluded, not that it did not test well from the first, but simply because it was intended to exhaust every trial known to electricians before the great journey was begun. All the signals from end to end of the wire came wonderfully distinct into the instrument room of the receiving house at the head of Foilhommerum bay, and at 4 30 the flags on board the Caroline and Great Eastern were hauled down to show that all was ready.

By the time the Great Eastern, which had al-

By the time the Great Eastern, which had al-ways kept moving her paddle at intervals, had forged shead of the Caroline some two or three miles, paying out the cable slowly as she went on, and leaving the latter vessel the only float by which one portion of the wire was kept above.

The instant however, that the flags went loowing: "The bureau of freedmen's affairs daily clerrymen until he was summoned to meet Call. miles, paying out the cable slowly as she went down, the last fastenings which held it with the Caroline were cast adrift, and with a great splash the final joint of the Alantic telegraph and the first thirty miles of its length went down slowly into the blue water and were out of sight. into the blue water and were out of sight. As the tender came near the thin narrow rope of cable could be seen passing over the last

wheel astern, and smiling gently into the foam without strain of any kind, as it seemed for a mo. ment or so to float alowly aft before it disappeared under the swell which still kept rolling deeply

The Mount Allison Academy and COLLEGE. Sackville, N. B.

THE first term of the ensuing Academic Year is to bogin on Thursday, Aug 3d.

Parents having Sone and Daughters to be educated, and persons of either sex who are wisely planning to secure for themselves the benefits of a good education, are respectfully informed that a thorough course of study either Academic or Collegiate, partial or complete, may be prosecuted under most advantageous circumstances, at Mt. Allison. Sackville, being a quiet country village, pleasant and remarkably healthy, easy of access, and yet away from most of the occasions of distraction, temptation and danger, which so abound for the young in cities and towns, is a most suitable place for an educational institution. The Buildings which have been here erected for the Associated Institutions, are in extent and adaptation to the purposes THE first term of the ensuing Academic Year ons, are in extent and adaptation to the purpose ntended, greatly superior to any others in Easter British America; and they are all suitably furnish

ed throughout.

The Boards of Instruction include ten or more regular instructors, all well qualified for the work of their respective departments; so that, by a proper division of labour and a harmonious adjustment of classes in the different branches of the United Institution, adequate provision is made for properly teaching all the branches of Science and Literatur which are included in the furricula of the bes cenducted educational institutions in Great Britain

Lights, &c., and Tultion in the regular Classes either branch of the Academy, are from \$110

silso, and in the College from \$130 to \$150 per an num. For Instruction in Music, Painting, Drawing, &c., there are additional charges, but these are as low as possible. For further information apply to the Principal The Rev. H. PICKARD.

ENDERS WANTED NOVA SCOTIA RAILWAY.

THE Contractors for Section No. seven, Pictou Extension, having failed to carry on the works contracted for by them, in such a manner as in the opinion of the Chief Engineer would ensure their completion by the time specified: PUBLIC NOTICE

Is therefore given, that I have deemed it expedient under the powers reserved in the 54th clause of the Contract, to take the whole of the Works on said section into my own hands for the purpose of completing the same, as I may deem best, at the expense of the said Contractors and their Sureties.

In pursuance of the forgoing, I will receive Tenders at this office, until, noon on SATURDAY, September 1st, from competent persons, for the completing of all the works remaining unfinished, under the Contract aforesaid. I do not bind myself to accept the lowest or any

Forms of Tenders can be had on application at the AVARD LONGLEY, Commissioner's Office, Halifax, 4th Aug. 1865.

Dr. L. Berry's Liniment

> WOODILL'S WORM LOZENGES. ARE THE ONLY

CERTAIN, SAFE, and EFFECTUAL

Remedy for Worms THEY never fail to act when properly used, and are CERTAIN to exterminate any of the different species of Worms which inhabit the different parts of the intestinal canal,

They do not contain Calomel. or any other mineral substance, but are purely VEGETABLE and therefore SAFE. They act on the V ORMS only, producing no other consti-utional flect then that which would follow a dose of SENNA, CASTOR OIL or SALTS. of SENNA, CASTOR OIL or SALTS.

In the treatment of WORMS the principal indication is the EXPULSION of the Worms from the Bowels. This may be fulfilled in some instances by active Purgatives, which expel by increasing the peristaltic action of the bowels, or by Anthelminities, which favor their expulsion through the ordinary contraction of the bowels by destroying them, or rendering them less able or less dispose

them, or rendering them less able or less dispose to resist this contraction. Other preparations use possess the latter property only, and to a fill ble extent, for to produce it, it is necessary to give large and nauscous doses, and on the following day some purgative to carry off the effects of the previous day's medicine,

The combination of these two modes constitutes Woodill's Worm Lozenges,

thus not only dectroying their anthelmintic, but removing in mudiately by their purgative properties. It is upon this union that we claim the SUPERIORITY AND ORIGINALITY OF Woodill's Worm Lozenges, as they are the only preparations combining these essential qualities. The ingredients both AN-THELMINTIC and PURGATIVE, composing them are eminently calculated to produce the best results, in accordance with the object of their combination, while they are both pleasant and agreeable to the tasto.

able to the tasto.

Be particular to ask for WOODILL'S. They are the only kind free from danger, and there are none more efficacious. They can be had of aller Druggists and Medicine Dealers throughout the Druggists and Medicine Dealers throughout the Provinces. The price is only 25 cents per box.

Be careful to take notice that WOODILL'S
