**LANDRETH'S Seed Warehouse, PHILADELPHIA**

We wish to call attention to our Blooded strains of ONION SEED

It has ever been our practice owing to the force of climate influences, to raise full sized Onions from sets, seedlings or buttons as they are indifferently called, the growth of the preceding year, and not direct from the seed proper; as a result in a long series of years, generations on generations of Onions, a habit has been confirmed and established of producing bulbs; consequently (black) seed raised here in the southwestern corner of Pennsylvania, when transported northward carries with it, it is believed, the fixed habit of early ripening, and crops of large onions it is confidently predicted may be produced at the North from such seed in advance of the season, and free from the "stiff-neck" so abundantly produced by seed raised in a colder climate.

An experiment the present season, made with the Blooded strain of Early Red in Wisconsin, in latitude 44° (north latitude of Toronto, Canada), gave the most surprising result; another with the highest admiration—not a single stiff-neck was observed.

These facts are at least highly suggestive, and merit the examination of NORTHERN and NORTHWESTERN onion growers and dealers in seed.

We especially commend the early RED—it is incomparably superior to the "Weatherfield" or "New England Red." Two other good sorts are the Large Yellow Strasburg or Dutch, and the pure White or Silver Skin. Prices exceedingly low on application. 1500 ACRES IN SEEDS. Send for Catalogue. DAVID LANDRETH & SONS.
