TRAIL, May 6 .- [Special.] -- Poor Barney Macguire is in trouble and it is all due A strike of six feet of solid ore is re- Ben Turpie, who has been engaged this winter in the neighboring wood camps. Last night he came into town bringing with him a large, plump roll which con-stituted his winter's savings and proceeded to celebrate. Just then he ran against Barney, his old-time friend, and invited him to assist in the celebration. Barney, who is nothing if not agreeable, consented, and the two proceeded to paint the town a vivid vermillion.

In the course of time Mr. Turpie began to feel the effects of the good liquor he had stowed away, and he settled down to slumber in a saloon. Mr. Turpie still had a fair-sized portion of his roll tucked away in his clothes, and as some evil-eyed gentry who were close at hand showed signs of purloining the just how things stood, and this morning Barney was sentenced to 30 days in jail in the justice court, though Mr. Turpie, who lost the money, refused to prosecute his friend.

Signs of the Times.

You Can Make Money

By Investing in the Treasury Shares of the

YELLOW JACKET GOLD MINING

The Company owns and operates the Yellow Jacket, Little Dalles and Bull Bat, three of the richest properties on the famous Colville Indian Reservation, State of Washington.

Merits

A rich lead of solid galena ore, fifteen inches in width which assays \$72.50 in silver and lead has been disclosed on the ledge on the Bull Bat and will undoubtedly widen and appreciate in value as depth is attained.

Accessibility

The Little Dalles and Bull Bat are within 200 yards of the railroad and within one mile of the proposed smelter site. This appreciates the value of these properties 25 per cent. over other meritorious mines in this district by reason of the transportation cost being reduced to a minimum. We invite investigation.

CAPITAL STOCK \$100,000
