**Europe Will be Greater Show Place Than Ever**

**Big Traffic After the War is Looked For—Hundreds Already Booking Passages—Millions of Dollars Will be Brought to Europe by Foreigners Who Came to America in the Steerage**

NEW YORK, Sept. 23.—Millions of dollars poured into this country by warring European powers for munitions, are to be poured back into Europe at the end of the war by American tourists and immigrants who will return to their home countries to aid in the work of rehabilitation.

American curiosity to see famous battlefields, and the desire of aliens to play a part in rebuilding the warring cities of their countrymen, will send money flooding back to Europe, according to indications at steamship offices here to-day.

Taking as an estimate, as viewed by steamship officials, that 100,000 Americans will visit Europe during the first year after the war, and that they will spend on an average of \$1,000 each, \$100,000,000 will be returned to the European countries within twelve months after peace is restored. Europe will, of course, be a greater show place than ever before, after the war, steamship men point out, and considering the wealthy Americans who will visit the continent as well as those of more moderate means, the estimate of \$1,000 each as the amount they will spend is regarded as low.

**Passages Being Booked**

Inquiries and application for passage on the first ship to sail from the United States after the war are rolling in to the booking offices by hundreds, and causing steamship companies to make every preparation to handle the biggest trans-oceanic traffic in history after the war.

But two companies—the North German Lloyd and the Hamburg-American lines—are actually accepting tentative bookings in the face of the uncertainty as to the termination of the

war. Hamburg-American line officials refused to divulge the number of passages already booked. These bookings are being made in the order of receipt, and are subject to cancellation. The North German Lloyd has 107 passengers booked for the first vessel to sail after the close of hostilities.

The International Mercantile Marine, which controls the American line, the Atlantic Transport, the White Star and the Red Star Lines, is making preparations for record traffic, both east and west bound, according to J. B. Lindsey, booking agent. Uncertainty as to rates, however, and dates of sailing, prevents maintenance of a passenger list.

**Rates May Be Advanced**

Trans-oceanic passenger and freight rates may take a jump after the war, Lindsey said, because of conditions which will increase the cost of operation.

"However, this is a matter of speculation," said Lindsey, "and it is too early to give it great consideration."

**Ships Being Built**

The International Mercantile Marine now has four ships under construction and tentative plans are ready for the construction of several more to handle the anticipated rush of traffic from America to Europe, and the flood of European goods which will be thrust upon the American market.

Cunard and Anchor line officials said they were prepared to handle heavy traffic and that their vessels were being kept in shape that they may be put in service immediately an armistice or peace is declared.

Inquiries coming to the office of C. B. Steck, of the Cunard line, indicating that many of those desiring to return to Europe immediately after the close of the war are foreigners, who have come to America, become wealthy, and now want to go to their home countries and aid in the work of rehabilitation. Applications for first-class passage have been received in several instances from aliens who come to this country in the steerage,

**Stefansson's Party Discover Valuable Copper Deposits on Coronation Gulf and Bathurst Inlet.**

SEATTLE, Wash., Sept. 23.—The seven members of the party of Dr. Rudolph M. Anderson, commander of the southern branch of the Stefansson Canadian expedition into the far north, will leave Seattle, where they arrived this week, for Ottawa in a few days to make reports to the Canadian Government. They will report Dr. Anderson said, many interesting discoveries, including findings of small mammals and perhaps new species of flowers. Stefansson, it was reported, was believed to be continuing his explorations north of Prince Patrick Island.

Discussing the work of his party, Dr. Anderson said:—

"We were instructed to survey the copper deposits already known and seek new ones. Every explorer from the earliest time had noted that the Eskimos east of the Mackenzie used knives, spear heads and other weapons and utensils hammered from copper, and the Coppermine River, which empties into the Arctic, got its name from mineral discovered many years ago. We found on Coronation Gulf and Bathurst Inlet vast deposits of copper of low grade. We were not equipped to undertake mining operations, but upon the sides of cliffs we could measure the depth of successive flows of amygdaloidal lava containing nuggets of copper. An Eskimo brought to us a lump of copper weighing forty pounds. There were seams in the lava that had been filled with pure copper.

Geologist O'Neil took many samples of rock, which will be assayed. He also made many estimates of the area of ore in sight. This informa-

**PROF. THOMAS M. KETTLE IS KILLED IN ACTION**

Toured U. S. A. and Canada in 1906 in Interest of Irish Cause.

DUBLIN, Sept. 25.—Lieut. Thomas Michael Kettle, professor of economics in the National University, has been killed in action at Ghinchy. He was a brother-in-law of the late Lord Sheehy Sheffington, who was shot during the recent uprising in Ireland.

1906 Professor Kettle made a tour of the United States and Canada in the interest of the Irish cause.

Professor Kettle was born in 1880, the son of a pioneer of the Irish land movement. He was a lawyer and journalist, and from 1906 to 1910 represented East Tyrone in Parliament.

When politicians meet truth is crushed to earth. Some persons believe all that they hear, and then add something to it.

**CONFEDERATION LIFE ASSOCIATION.**
