SCENE AT THE SOUTH

Says He Will Continue to Act as Long as He Rope Breaks at Execution of Negro in North Can-Calve and Her Dog Go Together. Carolina-Terrible Torture in Prison.

HORRIBLE HANGING

Washington, Nov. 14.—Joseph Jefferson, who is playing at the National Theater here this week, announced in a speech made after a curtain call that those persons who are saying that he intended to retire from the stage did not know what they were talking about. "I intend to remain on the stage just as long as I can," said Mr. Jefferson, "and I shall continue playing 'Rip Van Winkle' here and elsewhere during my regular seasons." Raleigh, N. C., Nov. 12.-The most ensational execution in the history of the state occurred here. Louis Council, a negro, was hanged for assaulting a woman. Before the black cap was adjusted the negro took the cross from the hand of Father Marion, his spiritual adviser, and declared his innocence. Father Marion startled the spectators by saying: "Before God and man I declare Louis Council an CALVE STOOD BY HER DOG. San Francisco, Nov. 14.—Mme. Emma Calve arrived in town and went to the

Calve arrived in town and went to the Palace at 3 p.m., and betook herself, her maid servant, her man servant and her dog to the Crocker, a boarding house. Mme. Calve left the hotel because the management refused to permit the diva to keep her dog Jack in the room with her. They offered the collie the hospitality of the hotel cellar, which was declined.

"What!" cried the singer, "allow my beloved dog that Ouger Victoria. "What!" cried the singer, "allow my beloved dog, that Queen Victoria gave me, to be imprisoned in a damp cellar? Never! If he can't stay in my room with me, why I'll go where he can." And she did procured. The second attempt was successful.

TORTURING A PRISONER.

St. Petersburg, Nov. 12,-A weaver Mme. Calve is suffering from bronchial trouble, and while her illness is not alarming, her physician advises strict seclusion and absolute rest. from Vosneseask, named Machow, first imprisoned in Kharkoff for political offenses and then sent to Yeniseisk, Siberia, for five years, has been subjected to repeated torture, as has Kansas City, Mo., Nov. 14.—The Star just leaked out. He was beaten on says: After resisting the fervid importunthe head by soldiers, then beaten with ities and the liberal offers of theatrical managers for seventeen years, Frank James, formerly of the team of James rods by the gendarmes.

One of the prison officials, angered at Machow's refusal to give evidence, art of legitimate acting for a few years. Stuck a finger in his eye, which caused In making this concession to art for art's such agony that he sank to the floor sake, James rather jars the aesthetic in a faint. He was brought to by in a faint. He was brought to by a douche of cold water. On other oc-Machow was repeatedly struck in the face and head, his ears, lips and cheeks were cruelly pinched and his hair torn out. His window was carefully sealed so that his cell beame full of impure air, and after this treatment he was refused water to quench his terrible thirst.

Special from Norwich, Ont.

The recovery of Mr. Norman Batty, hardware merchant, one of Norwich's oldest and most successful citizens, has excited much comment. For years Mr. Batty has been an unceasing sufferer from Catarrhal Asthma, and although no end of time and money was spent, relief was not obtained until Mr. Batty com-Born in bone marrow—dies was not obtained until Mr. Batty commenced Catarrhozone treatment which perfectly cured him. This case is only equaled by that of Mrs. Bannon, wife of J. J. Bannon, druggist, who was also cured of Asthma and Hay Fever by Catarrhozone after 30 years' suffering. Fully a hundred persons in this town have been cured of Catarrhal troubles by Catarrhozone, which is a remarkable proof of its value. Two months treatment, price \$1. Small size, 25c. Sold by all druggists, or by mail from Polson & in the liver. This is the beginning and the end of the rich, red blood that keeps us all alive. Blood history makes a al druggists, or by mail from Polson & Co., Kingston, Ont. Scott's Emulsion often plays

> Perhaps our lives are what we make them, but no potter can fashion without the clay.

-that is where its influence! Backache, swelling of feet and ankles, puffing under eyes, frequent thirst, scanty, cloudy, highly colored urine, all urinary troubles lead to Scott's Emulsion is a blood Bright's disease, dropsy, diabetes, etc. Doan's Kidney Pills are a sure cure

> Those people who are always ready o make someone else shoulder their troubles are never willing to divide

their pleasures. Baby's cold may be cured in a night by using Vapo-Cresolene, which has been extensively in use for twenty-four years. All druggists.

THE PLAGUE OF THE SAN JOSE SCALE

Is More Widespread Than Is Generally Known.

Expert Entomologists Tell How It May Be Checked.

Hon. John Dryden Presides at the Annual Convention of the Ontario Society.

The 38th annual convention of the Entomological Society of Ontario was begun yesterday morning in the society's rooms, Y. M. C. A. building, of this city. The forenoon session being spent at routine business, conference and discussion of the San Jose scale in Ontario began with the afternoon session. Among those present yesterday afternoon were the Hon. John Dryden, minister of agriculture; Rev. Dr. Fyles, of Quebec, president of the association; Prof. Lochead, of the Ontario Agricultural College, Guelph; Dr. James Fletcher, Ottawa; Dr. Bethune, Messrs. Lochead, John Balkwill, John Dearness, John Law. Moffat. Brown, W. E. Saunders and Dr. H. A. Stevenson, of London; H. H. Lyman, of Montreal; Mr. A. Gibson, of Ottawa; Inspector Fisher, of Freeman, Ont.; Prof. Webster, of Wooster, Ohio.

Rev. Dr. Fyles, president of the Entomological Association, occupied the chair, and called upon Mr. Fisher, the first speaker of the afternoon session. Mr. Fisher, who is the government inspector for the Province of Ontario, stated that there had been very few localities newly infected by the San Jose throughout the year, which seemed very encouraging. People are beginning to recognize its dangerous character, and are beginning to notify the government, and to appreciate the means devised by the government for its extermination. The speaker mentioned that during the past year there had been a number of cases of mista-ken identity—instances in which other scales had been taken for the San Jose scale. The power of the San Jose scale for destruction seems as great as (if not greater than) ever. AN ORCHARD TRAGEDY.

The speaker cited a case of an orchard containing 1,600 peach trees, where in the year 1899, 89 of the trees were found with difficulty to have been infected by the scale. In 1900 every tree

was infected, but still produced a good crop of fruit. Now every peach tree is practically dead. He also stated that he had eaten peaches this last sum-mer grown on trees that are now dead from the scale attack. A tree mo ately infected becomes soon almost in-crusted, and soon succumbs to the attack of the scale. The examples already referred to are of peach orchards, but the scale is as much inclined to attack pears and plums as peaches. Apple trees are the most resistive, and, at one time, it was thought the scale would not have much effect on them, but this belief has been exploded. Two years ago an apple orchard, consisting of 350 trees was slightly infected, but bore a good crop

last year. Now the owner thinks it will never bear again. Inspector Fisher took up in detail a number of remedies that had been found effective. They are: Whale-oil soap, crude petroleum, and a mixture of the two. Two and a half pounds of the soap to a gallon of hot water made a very suitable mixture. Crude petroleum and water, 15 per cent of the for mer, also produced good results. The speaker emphasized the importance of applying the mixture to the trees properly; it should be applied evenly, and each tree should be thoroughly saturated. As a rule, only one side of a tree is sprayed. No scale is to be

found on the portion of the tree that

Peach trees, in the opinion of the speaker, should be branched near the ground. They were easier to prune and spray, and the ripe fruit can be obtained more easily. When the trees are kept low they are affected less by

In conclusion, Inspector Fisher stated that, in his professional visits throughout the province, he noticed a change in the attitude of the people on the subject of spraying. They cannot now close their eyes to the effect of the San Jose scale on the trees. The present conditions go to show the wisdom of the methods adopted by the department of agriculture. The only absolutely effectual remedy was burning. No other remedies will wholly exterminate the pest, owing to the fact that it had become so widely distributed and established before it was noticed. Remedies will, however, control it, and prevent it spreading, and if spraying were resorted to generally better results would be accomplished than applying it in special cases.
Dr. James Fletcher, Dominion ento-

ologist, was the next speaker. He thought the most momentous question before farmers and fruit growers today was, Can anything be done to stop the ravages of the San Jose scale? Canada is at the present time losing hundreds of thousands of dollars simply through ignorance of the subject of treatment of the scale. Not only the Provincial, but the Federal, Government have done all that can reasonably be expected by any man. The men in charge have done their work admirably, and the methods founded upon successful experiment, and proclaimed under the authority of the government, are the very best that can be had in the light of present knowledge on the subject. The speaker dwelt upon the fatal effects of fumigation by hydrocyanic acid gas, to the San Jose scale. To make use of this method proper appliances in the shape of tents are needed, with which to cover the trees. The difficulty here, it will be seen, is a matter merely of me-chanism, which can be overcome. Dr. Fletcher called attention to the fact that specific remedies were given in the report of the inspector of the San Jose scale, a pamphlet which may be had from the government for the ask-

PROF. WEBSTER. Prof. Webster, of Wooster, Ohio, was meeting Conditions were, he said, the same in oldest society under the patronage of Ontario as in Ohio in regard to fruit growing. And speaking with an eye to conditions at home, he thought the most pressing need was for adequate machinery and trained men. He was hopeful, however, that such machinery would be forthcoming. He suggested that competent men go around among farmers with spraying apparatus, in much the same manner as threshers do at present. A great deal of harm and waste results from unskilled labor. Prof. Webster thought, in conclusion that employment might be guaranteed to competent men nearly the whole year round.

HON. JOHN DRYDEN. Hon. John Dryden, minister of agri-

culture, was the last speaker. In rising to speak he expressed himself as being much interested in what the previous speakers had said on the subject of the San Jose scale, and was glad to learn that something definite was being obtained in regard to methods of allaying or exterminating the pest. When the scale first appeared. it was a difficult matter to lead the people to see the danger, and it is only

HENRY DEVNAY

KIDNEY TROUBLE

Powley's

Liquified Ozone

When kidney trouble is at an advanced stage it will evi-

dence itself by back pains, headaches and neuralgic pains in

the eyes. These are the most common signs; the urine will

show conclusively what causes the trouble. Powley's Liqui-

fied Ozone, the new oxygen preparation, will cure kidney

disorder in a wonderfully short time. It will relieve the pains

almost immediately. We want you to notice our testimonials

every one we publish is from Canada. We give you to-day the statement of Mr. Henry Devnay, who was cured of kid-

ney trouble. Every word is true; you can investigate for

About a year and a half ago I was taken down with what the doctors called lumbago and kidney trouble of a very bad form. I doctored with physicians for a year and found no relief from

their medicines. Sometime in July, 1901, the minister of the B. M. E.

church told me about the Ozone preparation and said it had done him

a lot of good and asked me to try it. I went out and purchased a small bottle of Ozone and after taking it I noticed a slight improve-

ment. I continued taking it for three months and the pain has left my kidneys and I am generally built up. In every way I feel

better than I ever did before. I have now taken some ten bottles and

I can honestly recommend this preparation to any person suffering with kidney disease. I give this testimony so that other sufferers

may know of its value and wishing you every success, I am, Yours truly, (Signed) HENRY DEVNAY, 134 Elizabeth St., Toronto.

them to do their work thoroughly, soothes the inflammations of

the delicate tracts and strengthens all the organs of the body.

It is curing chronic Bright's Disease in a manner fairly miracu-

lous. It's Nature's process of cure; a thousand times more

effective than any drug way. It is the greatest discovery in

the curing of disease yet made. We want you to know

50c. and \$1.00 at all Druggists.

Toronto and Chicago.

Ozone dissolves the impurities in the kidneys, causes

your own satisfaction every word we publish.

had been moistened with the crude petroleum mixture, but the untreated portion, and the whole top is found to be incrusted. Apple trees are not likely to be injured by crude petroleum. Mr. Fisher preferred the crude oil to whale-oil scap in the case of large ordiards, it being much cheaper. Lime, salt and sulphur is a very good mixture, but owing to the lack of proper means for cooking it, was not found to be so convenient. It is preferable that the lime should be slacked in beiling, rather than in cold, water.

Fumigation was tried in various places, and at different times during the season. Three hundred trees were treated, and not a single live scale was

treated, and not a single live scale was to be found afterwards. The crude petroleum was better for destroying insects, but cannot be used on all kinds of trees; in fact, it should not be used on any other than the most vogorous peach trees. The Japan and egg varieties of plum trees are the only kind on which the petroleum cannot be used with impunity. The speaker advised that a spray-pump nozzle with a very fine bore be used in applying the mix-

WISDOM OF DEPARTMENT'S AC-

TION.

held in the Normal School. The Hon. John Dryden occupied the chair. He considered it a decided honor to be askthe Ontario Government. The Ontario Entomological Society fulfilled a very useful mission in gathering information and giving it to the public. "I am a practical man," said he, "and value the work of such an association as this because it helps us." All insect life is not destructive; in many cases it is valuable, and should be protected. Destructive insects must be kept under He brought, he said, the good wishes

of the Ontario Government, and would like to encourage the association, and if possible to add zeal to the feeling al-ready manifested. The minister of agriculture congratulated the Entomological Society on its past history, on its numerous, well-classified insect specimens, and on its splendid li-brary, which he believed to be one of the best in teh country on the

impressed with the gravity of the situation. Efforts have been put forth by way of educating the people in regard to remedies. The speaker felt that considerable headway had been made

considerable headway had been made in the direction of effective remedies. But he felt that the best remedy of all was self-help, and in order to help themselves the people must know how. The aim of the department of agriculture has been to supply the necessary information. He stated that his work was chiefly effective.

was chiefly educative. Law was well

enough in a way, as a preventive, but was not equal to education. Fruit

growers should be brought together

and the danger of carelessness is con-

nection with the treatment of the San Jose scale should be impressed upon them. At first he thought drastic

measures should be employed, and accordingly attempts were made to an-

nihilate the scale by cutting down and

burning the trees. This method met with stern opposition from many fruit

growers, who at the time were not

alive to the injuries likely to accrue from a spread of the scale. From

what he had learned on the subject

he was hopeful that before very long

the ravages would be checked. Know-

ing as he did the young farmers of On-

tario, Mr. Dryden believed that had they the knowledge they would soon

acquire the skill necessary for the

successful treatment of the disease in

question. The best course to pursue

was, in his opinion, to extend knowl-

edge on the subject to the people, and

interest them in their own protection.

He also laid great stress on men trained in the business of spraying and

fumigating trees. He believed also in

throughout the province for the pur-

pose of imparting definite information

on the subject, and gave as an instance

the great good that had been accom-

-methods analogous to what he would

advocate in connection with spraying.

A revolution had been wrought in the

dairy business by sending dairymen

throughout the country to lecture, and

at the same time perform the actual

of agriculture thought that like bene-

fits would be derived by adopting similar methods in connection with

spraying. He advised also that the

matter of obtaining suitable spray

pumps be pressed upon the attention

of manufacturers, and that they be

instructed, as far as possible, to produce a machine that would meet the

demands of the public. "The chief

danger I see now," continued Mr. Dryden, "lies with our nurseries. Care

should be exercised in the selection of

nursery stock. If you plant insect-infected trees in one hundred different

places you have as many increased centers to combat."

Not only did he believe in thorough

inspection, but would go further and

advise that nursery stock be subjected

to a thorough fumigation process by hydrocyanic acid gas.

timistic throughout, expressing him-

self as possessing great confidence in

the people, and felt sure that once the

danger was properly impressed upon them they would rise to the occasion

and take proper steps for allaying the

THE EVENING.

In the evening, a public meeting was

progress of the San Jose scale.

Mr. Dryden, in his address, was op-

plished by instituting traveling dairies

sending competent men

particular subject. The president's address, in the form of a paper on "The importance of entomological societies to the community at large," was read by the Rev. Dr. Fyles, of Quebec. The paper contained many interesting suggestions and was presented in a style characterized by both force and eloquence. Dr. Fletcher gave a very spirited ad-

dress on the subject, "The value of nature study in education." The address was illustrated with lantern pictures. Rheumatic sufferers find Hood's Sarsa-

parilla a permanent cure for their inflamed and swollen joints and stiff muscles. It is fortunate for those who are always making mistakes that there is such a thing as "fate" to unload on.

Eaten by Fire.

"The more the fire eats the starch, the less we have to eat it." An Indian proverb, which contains much wisdom. In making PAN-DRIED Rolled Oats the kernels are subjected to intense heat, this eats the starch and thus makes their digestion easy for you. That alone is a good reason for your insisting on having

TILLSON'S PAN-DRIED OATS.

There are many other reasons. They are free from hulls and all foreign substances; so common in many Oatmeals. Talk to your grocer about always sending you the "PAN-DRIED" kind,
