

Continued from first page.

blind and dumb. We waited for an evening when several aunts and uncles were visiting the house. The family usually sat in the back parlor looking out on the little conservatory, while Jennie received her visitors in the front. As a rule the sliding doors were open; when George came, they were shut. Jennie's brother arranged wires to the handles of the door, and on the day in question, I stood by one line, he by the other. George had arranged a signal.

As it happened, one of the aunts was talking about Jennie and the men attentive to her, when we heard the signal. The sliding doors opened with a rush, and the whole family looked upon a most touching scene. George had one knee to the ground, and Jennie was smoothing his hair away from his forehead, just ready, so it looked, to give him a chaste farewell salute. There was a hush, a cry from Jennie, and she threw herself into his arms. The family did not know but that the theatrical scene was an odd method of announcing her engagement devised by Jennie. They certainly did not appreciate the agonies she was suffering. George rushed from the house, and, according to previous arrangement, informed several gossips of the engagement. The next day Jennie had a mail as long as your arm, all congratulating on her engagement, and had to write it with a good grace. That is the way George got her.

My friend said nothing, but was lost in thought over my story. "Perhaps you think," said I, "construing his silence as a 'no' perhaps you think the marriage is not a happy one? It may not be an ideal or romantic marriage, on Jennie's side at least, but I call it a great success. George gives her all the freedom she wants, but he keeps his eyes open. I say, when a man of the world—acknowledges I am that at least—that it is a happy marriage, and I know a thing or two about domestic inferiors! That I am afraid he might not do with some women, but she enjoys it. Some people call her a steel-trap, and think he is caught. But he knew what he was doing—and has enough good sense to know that all the regular players are gone; the devil is at rest among the tailors in their box, and the water is nodding in his chair. Let us be off! I rose, and shook the dust from my feet. My friend, who had been shading his eyes from the gas with his hand, began to rub his forehead.

Miscellaneous.

**DIPHTHERIA.** As soon as the first symptoms of the disease appear, begin treatment in a very energetic manner. If the patient is an adult, give him a warm sitz bath for about twenty minutes. Surround his head with a hot water bottle, and as to favour perspiration. The feet should be placed in a hot foot bath in the meantime, and the head should be frequently wet with cold water. After the bath quickly sponge the body with water a little cooler than that of the bath. Then put the patient to bed and cover him up warm. Keep the feet warm, cool the head by frequent bathing, and sponge the whole body every hour or two with tepid water if the patient is very feverish.

If the patient is a child, a warm pack will be preferable to a sitz bath. Write a woollen sheet out of water a little more than blood-heat. Spread it quickly upon the bed, place the patient upon it, and quickly envelope him. Then wrap him snugly with dry blankets and let him sleep for half an hour or he feels so inclined, as he usually will. Follow the pack by sponging, as directed under the sitz bath.

After putting the patient to bed, apply, alternately, hot fomentations and cold compresses. Fold a flannel two or three times, reapply the fomentation, and continue to alternate until each has been applied four or five times. Then apply a cool compress, and change it as often as it becomes warm.

In ordinary cases, it will be sufficient to wet the cool compress in the coldest water that can be obtained; but in cases in which there is great irritation of the throat, snow or pounded ice should be applied, being placed between the folds of the compress. If by means of the use of all of those caustic applications which are so commonly employed in this disease. When white patches appear in the back part of the mouth, touch them with two or three drops of a strong solution of iodo, using a swab of soft linen or sponge attached to the end of a lead pencil or a small stick.

If the patient is old enough, some relief will be given by using a gargle of water acidulated with vinegar. Another excellent gargle which destroys the vegetable parasites always present in this disease is a solution of permanganate of potash. The fluid should not be taken into the stomach, though no harm will result if a few drops are swallowed.

A very favorite remedy with many physicians is the inhalation of the vapor of warm vinegar. The vinegar may be heated in a coffee-pot, and inhaled from the nozzle. A plan highly recommended is the inhalation of the vapor which arises when lime is slaked in a vessel. These measures will often give great relief.

The sick-room should be well ventilated in order to carry away as rapidly as possible the foul gases which result from the disease and thus prevent their re-absorption into the blood. The diet should be plain and light, though enough should be given to sustain the nutrition of the patient. Oatmeal gruel and mild fruits has been accustomed to it. The same regularity in meals should be observed as in health.

VAN DYCK AND THE BISHOP.

There is a tale that Van Dyck, just before his departure was sent for by a bishop (whose name being Anthony, was being wrongly supposed to be the Bishop of Trieste, a firm friend of the artist) to paint his portrait. With the insolence of his rank, the prelate, regarding the artist as he did one of his lackeys, when he came in did not rise to receive him, nor make any acknowledgment of his presence. Van Dyck had seen in the ante-room his easel and implements, which he had sent before, and vexed at his reception, without waiting for an invitation, seated himself and gazed steadily at the bishop without saying a word. As that worthy in this silent strife found he was matched by the artist, after some minutes he said, abruptly, "Have not you come to paint my portrait?" "I am at your Eminence's disposal," replied Van Dyck. The bishop waited, the painter sat motionless. "Why," cried the prelate, "don't you get your things and you expect me to seek for them?" "As you did not order your servants to bring them to me, I thought it possible that you intended to do me that service," answered Van Dyck, coolly. Reddening with rage, the bishop rose, and, in a wrathful tone, cried, "Anthony, you are but a little ass, but you have great venom." Van Dyck moved towards the door, and when on the threshold, at a safe distance from the burly prelate, bowed mockingly, as he retorted: "Assure you, you are large enough, but like the cinnamon-tree, the skin is the best part of you."—E. Masox, in Harper's Magazine for July.

DRY FEED FOR YOUNG CHICKS.

It is absolutely indispensable that the cooked mash given to any young chickens should be mixed dry. By this I mean to convey the suggestion that the meal mixture should be of a crumbly consistency, rather than that of a smooth, soft, or creamy nature. It is an article highly recommended as a complete protection against Worms, &c., and will not foul. It leaves a Hard, Smooth Surface like Glass. All orders promptly attended to, and every information given on application to the agent.

Bridgetown, July 19th, 1876.

NOTICE.

SHELF HARDWARE of all kinds.

FLOUR AND MEAL

always on hand. The above will be sold low for Cash.

BEALES & DODGE.

Middleton, April 22nd, 77.

SHODDY CARRIAGES.

Shoddy carriages are, it is plain, much more dangerous to those who use them than shoddy pianos, and, if the "Carriage Monthly" is correct in its statements, they are also more likely to be the cause of many deaths than the piano. According to the paper named, the cross-grained, knotted, guarded, checked hubs, spokes, and rims that are fit for nothing but the fire, are the cause of many deaths.

POISON DU TERRAIL, the popular

author, who died recently in Paris, was in the habit of writing several stories at once, which appeared anonymously in several different papers. He used to dress up little wooden dolls to represent his characters, and to prevent confusion placed each set of figures in position on its own stage, so that whenever a new installment of the romance was called for he could tell at a glance how his characters stood. Once he killed off a hero without removing the corresponding doll, and subsequently the young man appeared in the story, much to everybody's astonishment.

THE PETRIFYING SILICATE PAINTS.
