opening up direct relations with Aus-
tralia.

where a better rate of speed could be maintained, we would not object to York street, if it is widened sufficiently to eliminate the element of danger, leaving that street as near Queen street as possible, and going from there to Vine street in as direct a line as can be obtained without unreasonable expense. In any route that is selected we must ask that the two tracks are together, and we cannot accept them on adjacent streets or where there are any corners to be turned obstructing the view. If this is agreed on I can guarantee the commencement of the work early next year, and its completion without any delay.

Mr. Patterson concludes as follows: As it may be thought by some of the citizens that I am asking too much from them in the foregoing, I will also make the proposition that if any other person or company wishes to take hold of the proposition and build the railways, as I have outlined them, I will turn over to them our complete surveys, franchises, etc., costing us nearly \$10,000, and will subscribe as a bonus from \$15,000 to \$25,000, besides doing all that can be done to assist in getting them the right of way spoken of or any other inducement they may desire to have granted them by the city.

TALISMANIC BELT CLINCH.

Messrs. John W. Bowden & Co., 67 Adelaide Street East, Toronto, are directing the attention of belt users to their Talismanic Belt Clinch, regarding which they say that it will prevent belts from slipping; will cause belt to adhere to pulley without straining shaft or bearing; will prevent your belt from being effected by rain or moisture; will prevent the belt from losing its life, perishing or cracking; will keep the belt pliable; will give you no lost time for tightening belts; will not open the pores of the leather and leave it spongy; will increase the returns on your invested capital; will prevent belt from stretching; will give you the full power of belts and machinery where work is done, without loss of energy in transmitting same; will increase the power fully twenty-five per cent. This article is especially intended for leather and cotton belting and the company also make Talismanic rubber facing for rubber belting. They also make Talismanic rope and cordage preserver, a special treatment for rope drivers, which prevents fraying by adhesion and absorption of moisture, prevents the stretching and contraction of ropes, and it endows the ropes with life, elasticity, resistance and endurance. For further particulars enquire as above.

The Michipicoton Falls Power Co., with head office in Toronto, has been incorporated with a capital stock of \$10,000, to generate electric power at Michipicoton Falls, Ont., for commercial purposes, and to manufacture lumber, pulp, etc. The provisional directors are Wm. Thorburn and James Wylie, of Almonte, Ont.; E. W. I. Snider, of St. Jacobs, Ont.; D. B. Deiweller and Jos. Bingenman, of Berlin, Ont., and Geo. F. Frances, of Pakenham, Ont.
