

"The shafting runs clean without using oil, consequently saving oil, and no drippings, and as near as we can figure we are making a saving of 25% on fuel by using these bearings."

THE SYLVESTER MFG. CO.,

Per R. SYLVESTER, President,
Lindsay, Ont.

THE CHAPMAN Double Ball Bearing

A BEARING THAT SAVES POWER

How much power are you wasting on your line shafting?
Are you using the old-fashioned journal bearings?
Then from 15% to 50% of your entire power is wasted in friction on your shafting.
The average cost of steam power is \$50 per h.p. per year.
A 20% loss on a 100 h.p. plant means a loss of \$1,000 per year.
We have shown an average saving of 20% of the entire power.
Over 100 Canadian factories are now equipped with CHAPMAN DOUBLE BALL BEARINGS.

Catalogues and Full Information Furnished on Request.
