

cent. 6.25 per cent. of women attacked by small-pox early in pregnancy died, whilst the mortality of those who were affected later amounted to 20.83 per cent. Abortion or premature delivery was noted in twenty-three of the eighty cases during the course of the attack of small-pox. In six the same took place after convalescence from the disease. Sixteen children were delivered alive in cases where the small-pox was still in progress, eight at term, and eight prematurely; only three lived longer than six months. Several died of variola; two were clearly born with it. —*Brit. Med. Jour.*

IN cases of pernicious, progressive anæmia in young girls, no matter from what cause, Dr. Mary Ward Mead,

Camden, Ill., writing, says: "The arrest of development of the generative organs retards cure. I am early on the track for a speedy development in those slow puberty cases; and when I see the dormant spot puff for a mammary gland I know that restoration will surely follow, and to arouse this slumbering, sympathetic and vaso-motor system sanmetto is truly great."

Gentleman from Soho (driving behind a mule on an ash-cart)—"Docther, docther,—hey, there, docther,—me bye has the scairlet fever." Doctor (on sidewalk)—"All right, Mike, I'll come out and see him." G. F.'S. —"Aw, docther, niver moind! Wait till me little gurrel gits it to! Thin you can trate 'em both to wunst."

The Milk Supply Open to Suspicion

Tuberculosis in cows is very prevalent. The preparation of infant foods with infected milk is dangerous.

NESTLÉ'S FOOD

meets this emergency, being prepared for use with water only. It furnishes the safest and most nourishing diet for infants obtainable.

Physicians indicating number of samples desired will be cheerfully supplied *gratis* by addressing
