

summer resident; common in spring and autumn; arrives about April 27, re-appearing about September 15; departs early in October (Nash). Swan River and Moose Mountain: Breeding in rose thickets a few feet from the ground and in cornel bushes; eggs spotted (Macoun). Carberry: Summer resident; not very common; apparently breeding; Long River; Duck Mountain? (Thompson). Shell River: 1885, first seen, a pair, on April 30; is common all summer and breeds here (Calcutt).

264. *Turdus aonalaschkæ pallasii*. Hermit Thrush.

Common summer resident of woodlands. Winnipeg: Summer resident; abundant (Hine). I have noticed them at Kildonan, Selkirk, Brandon, and Fort Qu'Appelle; at the latter place they were nesting first week in June (Hunter). Portage la Prairie: Common summer resident; arrives about May 1; departs early in October (Nash). Lake Manitoba and west to Fort Pelly? (Macoun). South slope of Riding Mountain on Little Saskatchewan, August 28, 1858 (Hind). Shell River: First seen, two males, on April 18; a transient visitor, passing north and not remaining any time (Calcutt). Observed at Cumberland House on the 4th of October; I saw it several times, but had no gun (Blakiston).

265. *Merula migratoria*. American Robin.

Common summer resident in half open woods, etc.; breeding. In abundance at Pembina; breeding; in September, large numbers along Mouse River (Coues). Dufferin: Arrived in 1874 between April 15 and 20 (Dawson). Winnipeg: Summer resident; abundant (Hine). Red River Settlement, fourth week of April (Blakiston). Swamp Island: 1885, first seen, about thirty, on April 27, after which it was common, and it breeds here; in fall, last seen October 7; 1886, first seen, ten, on April 18; bulk arrived next day (Plunkett). Ossowa: Common; breeding; 1885, first seen, five, on April 18; next seen, April 20; became common April 25; last seen, one, on October 20 (Wagner). Oak Point: 1884, arrived, April 10; 1885, first seen, two, on April 8; next seen, April 9; afterwards common; breeds (Small). Portage la Prairie: Common; summer resident; arrives in April; my earliest spring record is April 3, 1885, when I saw a small flock; the latest is April 20, the bulk having then arrived; they frequently remain until after snow has fallen, feeding on the wild grapes and high-bush cranberries. The latest date I have is November 3, when I saw a large flock; the ground was then covered with snow (Nash). Abundant everywhere throughout the Northwest (Macoun). Carberry: Very abundant in spring migration; common summer resident; breeding (Thompson). Two Rivers: April 17, 1884; 1885; first seen, several, on April 16; next seen, April 17; became common April 20; is pretty common and breeds here (Griddle). Dalton: 1889, first seen, two, on April 12; became common on April 13; breeds here (Youmans). Brau-
