telephone, and when the present council came into power the Bell people were

told that they would have to give bet-

the next five years. Referring to the

electric light question, the mayor point-

Strychnine Found in the Stomach of Mr. Stewart's Hogs.

St. Thomas, Dec. 8.—Mr. J. W. Murray, inspector of the Ontario criminal investigation department, is in the city. He is inquiring into the South Dorches-

ter hog-poisoning case. Mr. Alfred Stewart, who lives on con. 8, Dorchester, had 85 beautiful fat hogs a week ago Saturday night, the majority of which passed the 200-pound mark. On that night Mr. Stewart cooked a big boiler full of feed for the hogs, and left it out of doors all night to cool off. On Sunday morning he fed the hogs, and an hour or two later 60 of them were dead. Evidences of strychnine poisoning were apparent, and the services of Dr. McLachlan, veterinary surgeon, of Belmont, were obtained. He gave it as his opinion that poison had been placed in the hogs' food during the night, and the stomach of one of the victims was sent to Toronto for analysis, with the result that traces of the poison were found. Mr. Stewart's loss was \$400.

A Tea Plant for a Tea Ad. Last week a lady in this town received several tea plants, in good condition, nicely packed in native soil, from a friend in Ceylon, who is an employe of the old British company which rows the Monsoon Indo-Ceylon Tea. A letter, which came with the box, explained how the shrubs should be planted and cared for, and told when and how they would bud and bloom with masses of pretty blossoms. Thousands of ladies would, no doubt, be delighted to get a real India tea shrub, to pot as an ornamental plant for the winter and to transplant in the garden next spring. A tea plant, direct from the Monsoon Tea Gardens, growing in every Canadian home, would prove an Interesting souvenir to remind one continually of Monsoon Tea. They are made very sharp, and are so extremely hard that it is almost imposible to blunt them. They are unlike steel skates, in that they never want grinding, and never rust. The new skates are as pretty as they

are efficient. They are very nearly transparent, and in some cases the glass, while in the liquid state, is variously colored. Several noted skaters are said to have tested them, in every case with most satisfactory results. So the pretty skates, with their sharp blades, will, in all probability, soon be seen skimming over lakes and streams, and youths and maidens who long ago relegated the Cinderella story to the
