season, and the amount available this year for seed production may be limit-82 Power Street, Toronto, ed. Much the same conditions prevall over a considerable portion of the **CANNERS IN NIAGABA PEN.** clover seed producting area of the

United States; so that unless the yield from the areas which were not serious-'STUNG" BY GOOD CROPS ly affected by the adverse weather conditions last season is exceptionally heavy, a shortage of seed for next spring's trade is more than probable. Berries and Tomatoes So Plentiful In view of the conditions cited, the

That Prices Will Be Less Than advisability of utilizing every available clean field, or part of field, for clover seed purposes is urged. Keep Weeds Out.

In growing clover and grass seed for the market, it is important to clal.)-The strawberry crop in the Ni- vests from Ontario farms where no Kinsale, has secured W. L. Smith to brains are sown on the land. bear in mind that the standard of agara district is the best in many bear in mind that the Canadian purity demanded in the Canadian trade is higher than it was a few years ago. The demand for seed of in excellent shape, but the district has had no rain since a week ago Sunday purity demanded in the Canadian years and growers' expectations are years ago. The demand for seed of first quality has substantially increas-ed. The result of this demand for seed of good quality has been that the seed grower finds impure seed an al-most unmarketable commodity, while the production of good clean seed has may to be a remunerative industry. Despite the heavy crop, prices prom-ise to remain good. This is caused by the fact that early in the season the canners contracted to the season the grown to be a remunerative industry. Hence the necessity of the nce the necessity of taking every Hence the necessity of taking every possible precaution against the pre-sence of noxious weed seeds. The first step in the production of good clover and grass seed is to pro-cure the cleanest possible seed. If this is used on clean land and is fol-lowed by a there system of weeding canners contracted for large supplies at \$1.50 a crate and growers are set-ting prices by that standard, tho it is also claimed that no more than \$1.25 will be paid even at the retail price. Agincourt has had many successful tendent Putnam reports good work being done. He was present at Agin-court yesterday's department at Guelph addressed the department at Guelph addressed the department at Guelph addressed the day. To-day boxes brought ten cents and farmers on "tillage," and his recent the demand was quite brisk. The good work in drainage schemes makes

Those Contracted For.

this is used on clean land and is fol-lowed by a thoro system of weeding in the field, the product will be clean. The field weeding is of prime import-ance, altho it is often overlooked. When we remember that every grow-ing weed, if allowed to mature, will produce from 10,000 to 50,000 seeds, it the demand was quite brisk. The crop, however, is but beginning to make an appearance and it is likely that even four cents a box will be crop unusually large, but the growth of berries is excellent. They are large and well flavored, and canners alone the computed for the set many schemes makes the being the guest of W. L. Smith of Whitby. The Women's Institute held their method for the set many schemes makes the set m will be readily understood that the removal of these plants must make a great difference in the market value

and well flavored, and canners alone regret the outlook, as it means thou-sands of dollars' loss to them. The tomato crop also promises to be enormous and profitable. Canners are in the same position as regards ber-ries, having contracted with growers at 27'1-2 cents, while the general price will not exceed 25 cents. Plants are With red clover the best results are obtained by pasturing, or cutting the first crop early. This allows a strongond growth for the seed crop will not exceed 25 cents.
