YORK COUNTY AND SUBURBS LAND IN CONDITION FOR SPRING SEEDING

Wheat and Clover in York County Came Thru Winter Fine.

Conditions in York County have seldom been more encouraging from the farmer's point of view than in the case this spring. In spite of last night's snow storm, which almost amounted to a blizzard in some sections of the county, seeding will probably be done before the end of the week in the southern townships, and possibly thruout the whole county. Experiences of farmers point out that this is the ideal season for seeding, as earlier plantings are often nipped by frost and seedlings frequently cause short grain at harvest time.

Both fall wheat and clover wintered well and are already showing up green in the fields. Deep snow, coupled with the fact that there was practically no ice, protected winter crops and prevented winter-killing by frost or ice. A very large acreage of wheat was sown last fall, and it is expected to give a good return from this source. This spring's showing of clover is quite unusual, and even the oldest farmers can scarcely remember when red clover showed up greener or thicker than in the case this spring in fields where the seed was sown last year. All the way up Yonge street, at Markham, and at Agincourt, the same condition is reported, and farmers are looking forward to a prosperous year, with a bountiful harvest.

The Frequent Cause of Nervous Breakdown NOTHING so certainly breaks down the nervous system as constant straining of the eyes. You may think that sewing is light work and wonder why it tires you. It is the strain on the eyes. The controlling of the sight is the most delicate work of the nervous system and when there is strain on the eyes there is an enormous waste of nervous energy. There are times when it seems necessary to stick at this work for long hours and to sew by artificial light, but you may have to pay for it by a nervous breakdown. It is then well to know about Dr. Chase's Nerve Food, as a means of restoring a run-down nervous system. Whatever may be the cause of your nervous breakdown, it has been demonstrated in many thousands of cases that there is nothing like Dr. Chase's Nerve Food to restore the depleted nerve cells. Headaches, tired feelings, sleeplessness, indigestion, lack of energy and appetite are some of the indications of an exhausted condition of the nerves. Your digestive system is failing to supply the necessary nutrition to the blood and nerves, so it becomes necessary to employ such restorative treatment as Dr. Chase's Nerve Food. Rest will help. Eating only wholesome, nutritious food will benefit. But restoration is very greatly hastened and ensured by the use of Dr. Chase's Nerve Food. 50 cts., a box, all dealers, or Edmonson, Bates & Co., Ltd., Toronto. On every box of the genuine you will find the portrait and signature of A. W. Chase, M.D., the famous Receipt Book author.
