

FURTHER ENQUIRY SUGGESTED.

In view of the discoveries that have been made since the Turner government "resigned," and in view of the evidence...

THE QUEBEC CORRESPONDENT AGAIN.

Seattle and Tacoma newspapers are well-nigh frantic over a vague rumor, of the same sort that temporarily unbalanced the Colonist last week from Quebec...

"It has been learned on the highest authority that the present International Commission sitting in Quebec and having before it for determination..."

The claim referred to in that the United States is to be deprived of the Alaskan strip, the boundary of Canada to extend from Mount St. Elias southward to the Straits of Juan de Fuca...

and Nova Scotia rather than make the concessions demanded by the British commissioners. To such extraordinary frenzy may an excitable paper be wrought up by a correspondent's "guff."

"Every business organization in every prominent American town from Buffalo to Los Angeles should promptly come to the rescue and flood the secretary of state's office at Washington City with protests that will resound throughout the land..."

AN EXPLODED SENSATION.

Yesterday we drew attention to some strange utterances of the Seattle Daily Times with respect to the Alaskan boundary question, the Seattle Times alleging editorially, upon what it pleased to call the "highest authority" and "official authority," that the Quebec commissioners were about to shift the Alaskan boundary to the disadvantage of the United States...

On Thursday, September 29th, at the request of Hon. George A. Brackett, chief of the Times sent to Hon. Nelson Dingley, Jr., the following telegram: "Hon. Nelson Dingley, Jr., Quebec, P. Q."

"Reported here that American-Canadian Commissioners liable to give portion of Alaskan Territory, securing them an all-water and all-land route to Dawson City. This would be fatal to Pacific coast interests. Cannot believe it to be true, but desire for personal information and not for publication at present."

"It is learned from high Canadian officials that Canadian Commissioners are demanding the cession of American territory, extending from Yakutat Bay to Dixon's Entrance, including the cities of Skagway and Dyea, thus extending Canadian boundary line to Pacific ocean..."

"The official authority for this claim on the part of the Canadian Commissioners comes from so high a source as to startle every business man in Seattle to whom it has been told."

"This bears out what we said yesterday and one would imagine would have settled the matter at once. But Mr. Blethen is not easily satisfied. This is his comment upon the Dingley dispatch: 'As Mr. Dingley asserts that there is no foundation for the rumor, of course the necessity for considering his answer...'"

THE ATLIN MINES

The Camp Evidently a Rich One and Gives Promise of Being Permanent. Not Much Work Done A Great Boom Looked for Next Season.

Atlin City, B. C., Sept. 26.—The mining season closed here on the 15th, and many of the men who have located claims, no longer being under the necessity of "holding them down" or working them until June 1 next, left for their homes. But there are still four or five hundred people here...

HE CHOSE DEATH

Warton Walker, of Colwood, Suicides Rather Than Be Arrested for Stealing a Shotgun.

Colwood, the quiet farming district about eleven miles from Victoria, was the scene of a tragedy last evening, as a result of which Warton Walker, a young bachelor, eighteen and twenty years of age, fell cold in death with his head almost torn from his body. The horrible deed was committed in a fit of remorse. Walker, who lives in company with his younger brother, William Walker, with his grandfather, George Dutt, an old-time and respected farmer of Colwood district, whose lands are situated on the west side of the main road down to the old quarantine station at Albert Head, was about to have been arrested on the charge of stealing a shotgun—a German breech-loading gun—belonging to Harry Cook, the driver and engineer employed at Bullen's manure works, Esquimalt, when he suicided.

About a month ago the young man picked up the shotgun in question on the bench, where Cook and others were engaged in cutting wood. He hurried home with it, and after using it several times on shooting expeditions hid it in his grandfather's house. Cook after some search found out where his weapon had gone, and took steps to secure Walker's arrest. Yesterday he procured a search warrant, and armed with the Provincial Police Constable Campbell went to the Duttinal residence. They were met at the door by the young man who was accused of stealing the gun, and on Constable Campbell making his mission known to the young man the gun was at once produced. Constable Campbell took the gun, and in satisfying himself that it answered the description of the weapon, which, according to the allegations, was stolen from the bench, he told the young man to consider himself under arrest. Walker then asked leave from the constable to go inside the house and change his clothes, saying that he wished to look decent if he was to be driven to town. Constable Campbell granted him the necessary permission and the youth ran inside the house, the constable waiting at the front door.

THE LAST OF THE PARTY.

Four of the Notorious Grider Party Reach Victoria From the North. Steamer Princess Louise returned last evening from the north with a large number of passengers and a full freight cargo, including \$2000 cases of salmon. Among her passengers were R. N. Cartwright and A. F. Deachman, two of the Grider party, which paid W. F. Grider to lead them to rich diggings, and then when he failed in his contract, secured his arrest. Cartwright and Deachman, together with George Becker and Jake B. V. Pierce, returned to the country. The majority returned when Grider was arrested at Hazelton. They say they are confident that there is good mining ground in the country, and will return there in the spring. Lots of good prospects were found on the Omineca, Stranor and Oeslha rivers and on other creeks, by Mr. Deachman and his associates. They took two dredging claims on the month of the Omineca and also some hydraulic propositions. As high as 300 colors to the pan were found and a man working with a pan could make from \$150 to \$3 a day. It is a good country and lots of gold, but a man must be prepared to work hard. The only very difficult place they found was the Black Canyon on the Omineca, where they had to haul their boats up a perpendicular bank with block and tackle and carry them for half a mile around the bad water. The canyon is five miles above the junction of the Omineca and Finlay.

Acute Rheumatism. Pains in the Feet and Limb—A Complete Cure Accomplished by Hood's Sarsaparilla. "For a number of years I was afflicted with acute rheumatism in my left side and all the way down my limb into my foot. I live five blocks from my work and had to stop and rest several times in going and coming. I could get no relief from my trouble and was on the point of giving up my job when I happened to hear of Hood's Sarsaparilla. I purchased a bottle of this medicine and a vial of Hood's Pills and began taking them. Before I had half finished them I was relieved and it was not long before I was completely cured. I never lose an opportunity to praise Hood's Sarsaparilla, for my cure means a great deal to me, as I have a family and must always be at my post."
