

A SUDDEN DEATH.—"Judge Smith died suddenly this morning from an attack of Dysentery. Only last night he seemed to be in perfect health, and his friends will be surprised to hear of his sudden death." How many times we hear just such news as the above; and the reason for so many deaths from Dysentery, Summer Complaint, Diarrhoea, Cholera Morbus, etc., is not because these diseases are necessarily fatal, but because people do not know how to treat them, or neglect treatment until it is too late. A teaspoonful of Perry Davis' Pain Killer, in a little sweetened water (hot water preferred), taken every half hour, will cure any case of bowel trouble if the treatment is commenced in time. If the case is unusually severe, or treatment has not been properly commenced, the Pain Killer should be applied externally as well as internally. It has never failed when used according to directions. A bottle in the house may save a life that would be lost while waiting for the doctor.

Too many glasses may make a tumbler of a man.

BOWEL COMPLAINT AND DYSENTERY.—For common bowel complaints, give one teaspoonful of the Pain Killer in a gill of new milk and molasses, in equal parts, stirred well together; lessen the dose for children, according to age. If the pain be severe, bathe the bowels and back with the medicine. This mode of treatment is good in cases of cholera-morbus, sudden stoppages, etc. Repeat the dose every hour.

The quickest way I ever saw dysentery cured was by taking a teaspoonful of the Pain Killer in one gill of milk and molasses, stirred well together, and drank hot, at the same time bathing the bowels freely with the medicine. Let the dose be repeated every hour until the patient is relieved. Make a tea of sage for a constant drink; and for gruel, boil one pint of milk and one pint of water separate, put them together boiling hot, and thicken with rye-meal; give it freely when moderately warm.

A STROKE of lightning generally spares the rod and spoils the house.

CRAMPS are immediately relieved by taking a teaspoonful of Perry Davis' Pain Killer in a little milk and sugar; it takes about two minutes to relieve the worst cases.

Midnight doctors are the most unwelcome visitors—even the Doctor himself curses the luck that compelled him to leave his comfortable bed. Suppose you try our method, and keep a bottle of Perry Davis' Pain Killer in the house, and let Dr. Squills stay in his bed and enjoy himself.

THE cheapest of lawyers—keeping one's own counsel.

STOCO, Ont., February 17, 1880.

We have great pleasure to state that the Pain Killer holds its position in this place as the old reliable family medicine. Although there are a great many other remedies in the market—some bearing nearly the same name—as Pain Relief, Pain Remover, Pain Destroyer, and such like names, we find the people know the difference, and are sure to ask for Perry Davis' Pain Killer. We have been selling Pain Killer for the last fourteen years.

Yours truly, P. & P. MURPHY.

Sold by all medicine dealers. Price 25 cents per bottle.
