MT. A. TRAIN LEAVES TOMORROW

Football Special Goes 7 O'Clock Saturday Morning

INDIVIDUAL PHOTOGRAPHS THIS YEAR

U.N.B. YEAR-BOOK CHANGES POLICY

The 1948 Year Book staff announces that there is to be a change in their policy this year and that individual pictures of every undergraduate at U. N. B. will replace the class group pictures of past years.

U.N.B. TO HEAR ATOM MAN

DISTINGUISHED SCIENTIST TO VISIT U. N. B.

Dr. W. E. Lewis, C. B. E., F. R. S. will lecture to the Scientific Society at 8 o'clock on Monday evening, October 27th in the Physics lecture room, Memorial Hall, on the topic: "Some Effects of Atomic Energy Development on Industry and Scientific Research" Dr. Lewis is Director of Research at the Atomic Energy Project, National Research Council, Chalk River, Ontario.

He will be at the University from Sunday, October 26th to Tuesday, October 28th. This is his first visit to the Maritime Universities, and he is coming here following a visit to Dalhousie University.

All those interested in this lecture are extended a cordial invitation by the Scientific Society to join with them for this meeting.

Canadian Campi

News from all Canadian Universities this week is varied and interesting. Topics of interest range from the popular skirt question to such items as profound intellectual dogmas.

The general trend in all Universities is the formation of various clubs and organizations of a social and political nature; new buildings of all sorts, especially the attempt of several campi to build Student Union quarters. Another feature across Canada is the establishment of journalism courses given by experienced newspaper men to stimulate interest in individual college papers as well as arousing general interest in creative newspaper work.

Football is flourishing in this season with the odd college spirit and rivalry at its peak. Other sporting events, while at the present taking a back seat to football, are being organized and run off.

Now to the more specific news. At the University of Manitoba the reaction to the long skirt is quite marked. 99 per cent of the men are distressed at skirts falling faster than the bull market of '28. I said 99 per cent—the other 1 per cent were two engineers. The girls seem to like them—because they felt like sheep with the wool itching their legs. To understand that would require an intense study of feminine psychology I suppose. One chap was heard to remark that "If they don't go up soon, I'll be forced to start studying" (Continued on page seven)

TICKETS AT S. R. C. HUT. U-Y WILL SELL LUNCHES

After much dickering, the Football Special train to the annual Rugby classic at Mount Allison Saturday, has been arranged by the S. R. C. and plans are under way to make it a memorable expedition, both for U. N. B. and the town of Sackville.

The new College Band, cheering sections and the usual 'high-spirited' students are bent on celebrating the coming victory from the time the train leaves York St. Station at 7:00 A. M. Saturday until its return to Fredericton Sunday morning at 7.

Student Council President Harold Cox of Mount A. has extended a welcome to the invaders and an invitation to the Football dance to be held the night of the game. U. N. B. student officials hope to make this second such trip a bigger success even than last years. Johnny Vey, U. N. B. coach not only feels that the team will do its part, but expects a real victory.

Tickets for those intending to make the trip will be on sale today at the S. R. C. office in the Hut from 11 to 1 and from 3 to 5. The lowest price obtainable is \$4.50 which compares favorably with the regular fare of about \$11. Travellers are advised to bring a lunch, as Sackville restaurants will be unable to cope with the mob. The U-Y Club will retail refreshments on the train.

S. R. C. President George Robinson stated that the trip is a non-profit one, the proceeds going to the railway.

Clair Describes Centuries Old Atom

"The Work of C. N. Lewis" was the topic of the talk given by Eldon Clair to the Chemical Society on Thursday, October 16. Clair outlined the history of theories concerning valence and atomic structure up to the early 'twenties when C. N. Lewis summarized the then existing theories to give one complete picture.

Clair is tracing the development of ideas concerning the nature of the atom mentioned the contributions of such men as Dalton, Prout, the Russian Mandeleef, who proposed the periodic system in 1869. Moesley, Rutherford, who proposed the idea of electrons surrounding a nucleus, and finally Bohr who conceived the nucleus. "These ideas," said Clair, "were summarized in 1923 by C. N. Lewis to give a more complete picture of atomic structure."

Before this talk, Don Duer, President of the local chapter of the Student Chemical Institute of Canada, gave a summary of the purpose and function of that organization.

After the meeting the usual lunch was served of tea and unusually tasty cookies.

We Lose Our President A Tribute

Our campus has lost two of its most liked and respected members in the leaving of Dr. and Mrs. Gregg. As is well known Dr. Gregg has left us to take up the post of the Minister of Fisheries in the Federal Cabinet. To them, as they go, are our very best and most sincere wishes for a happy and successful future.

Dr. Gregg came to U. N. B. in the fall of 1944. At that point the war was drawing to a close and the veterans were making their appearances on the campi of the nation. It offered a vast problem to small universities such as ours for means of accommodating the sudden influx. We must all agree that Dr. Gregg worked hard to accomplish all that he did in this emergency. The securing and transforming of Alexander College from an army camp to a college in a

short time was in itself so small task.

Since his arrival Dr. Gregg has lent a sympathetic ear to all who desired an interview. He had the interest of the university and the student's foremost in his mind and heart. His most admirable administrative ability was able to solve the many problems which arose.

Mrs. Gregg, with her grace and charm, will be missed especially by the co-eds, who found in her a friend indeed.

On many occasions their home was opened to visitors from other universities, showing hospitality in true U. N. B. style. Many a visitor has returned to his home campus with the feeling that they had been truly "made welcome" during his stay here.

Now they have left us, and to say that they will be greatly missed is a vast understatement.

Toronto Publisher Gives Political Formula UNDER FIRE IN QUESTION HOUR

"I came down here to see the environment from which so many brains are exported," said George McCullough, publisher of the Toronto Globe and Mail as he spoke informally to the Economic and Political Science students and professors Thursday morning in an Arts Building classroom.

McCullough, who has been for 12 years on the Board of Governors of the University of Toronto, stressed the need of students and every person taking part in constituency organizations of all political parties in an attempt to bring about better government in Canada. He expressed his personal opinions concerning political parties, but above it all he advised each person to join the organization of the party of his choice in a "search for truth."

"Bad representation is your own fault," he said, "...you haven't done your share and can't criticize unless you have taken a part in one of the parties. . . you must accept the challenge to live for your country now, as well as you offered to die for your country in war."

"As Canada grows we have a challenge to become a leader. . . in a new form of thought. . . There's no such thing as being isolated from the other fellow's troubles," he declared as he pointed out the place Can-

ada can and should have now and in the future.

During his talk McCullough severely criticized the government and all the political parties for their actions in the past concerning censorship, and the later discrimination in depriving Japanese Canadians of their freedom.

There was a lively question period for almost an hour during which McCullough was asked to justify some of his statements concerning the CCF. He was also questioned on the idea of a National Labor Code, on adult education, on the meat packinghouse workers strike and on the Tory party relationship between Premiers Drew and Duplessis.
