A NEW WORLD'S RECORD HEIFER FOR MILK PRODUCTION

What is believed to be a new world's record in the production of milk for a heifer was completed recently by the great heifer Lulu Keyes, No. 10,333, here shown, owned by E. B. Mallory, of Frankford, Ont. Lulu Keyes at the commencement of her test was 2 years and 11 months old. At the start in a seven day test, she produced 585 lbs. of milk and 21.85 lbs. of butter, and in a 30 day test 2,344 lbs. of milk and 87 lbs. of butter. Her best day's record was 91 2-10 lbs. of milk. This is believed to be the highest for her age. Her persistence as a milker is shown by the fact that during the course of the year ending January 10 last she produced 19,250 lbs. of milk. Her record for butter production has not been announced by the Government. It is believed to be between 700 and 800 lbs. The best previous record for milk production in the Record of Performance for an animal of her age was 16,800 lbs., and in the United States 19,193 lbs.
