Ridge dale Holsteins—I have left three bull calves that will be price significant for quick sale; their dams are heavy produce and their sire was bred right.

R. W. .. KER, Utica, Ont. 'Phone connection.

OUESTIONS AND ANSWERS Miscellaneous.

BEST VARIETY OF OATS

Which oats do you think best for clay loam that is well surface drained? W. L. H.

Ans.—There is room for great difference of opinion, but so far as our observation goes, there has appeared nothing to beat the American Banner for all-round utility. See variety-test reports from Experimental Farms.

ABORTION - INFECTED BULL.

Kindly publish the remedy (if possible) for a sire failing to impregnate the cows. He served cows some months ago that had aborted. May that be the cause? We have not had any trouble of this nature for some years. SUBSCRIBER.

Ans.—There is little doubt that the bull is infected with the abortion germ, and, in all probability, is infecting the cows to which he is bred, but this infection does not necessarily cause his failure to impregnate. It will be necessary to cease breeding operations with him for five or six months. In the meantime, you will need to inject his sheath about every third day with a solution of corrosive sublimate, 50 grains to a gallon of water, and heated to 100 degrees Fahr., and, when he is bred again, his sheath should be flushed out, both before and after breeding.

WARTS-ALFALFA ON WHEAT.

1. I have a cow three years old which has a raw wart on the side of her face. Would you kindly tell me how I can cure it?

2. I have a field of fall wheat, top dressed with barnyard manure. Would alfalfa seed do well in it, to sow it this spring? About what time? The land H. M. R. is a clay loam.

Ans.-1. Warts with small necks can be clipped off. Large, flat ones, should be dissected off. The raw surfaces should be dressed once daily for three or four days with butter of antimony, applied with a feather, and, after that, three times daily with one part carbolic acid to thirty parts sweet oil, until healed.

2. Some claim to have seeded alfalfa successfully with fall wheat. A few have sown it on the snow or on frozen ground, like clover seed; others wait and harrow the seed in. We should prefer to wait until the ground is fit for the harrow, before sowing alfalfa on wheat. A double stroke of the harrow after the seed is sown, followed by the roller, would cover it.

MAINTENANCE OF DITCH.

There was a large drain dug through my place two years ago, and this drain is under the Ditches and Water Courses Act. There were a large number paid towards digging this ditch. Size of ditch is 15 feet wide by 31 feet deep, and now the banks have crumbled down, and in some places it is 20 feet wide, for a part of the land is sandy. On my place, and on the next lot, there is a lot of sand in the bottom of the ditch. The most of this sand has come off my lot. What I want to know is, who is to take this sand out of ditch, and will each of us have to take our share of the sand; that is, as far as the ditch goes through each lot, or will I have to take all of the sand? I went to our Council last fall to get them to take this sand out, and they did not want to act in the matter, for they said they did not know who had to do this work. My assessment on ditch was \$315 for 137 acres; my next neighbor's was \$85 for 100 acres. He has about as much ditch as I have. He says he will not take any of the sand on his place unless he is paid for it .. Can he be made to take his share of the sand? Ontario.

Ans.-You and your neighbor are both required by the Act to maintain the ditch in the proportions provided in the award, and in the event of your neglecting to do so, such maintenance may be enforced at the instance of any of the owners-parties to the award-whose lands are affected by the ditch. The manner of such enforcement is set out in the Act. But either of you may now take proceedings for a reconsideration of the award. Such proceedings would be similar to those provided by the Act for the case of the construction of a ditch.

Is Your Farm Spick and Span?

Lumber is growing more and more expensive every year. Don't let valuable buildings go to pieces for a little paint. Keep your farm buildings spick and span with Moore's Paints.

Roof and Barn Paints

There is no better paint than Moore's House Colors, for better paint cannot be made. Your dealer probably has them. If not, write to us.

MOORE'S Paints and Varnishes for every Purpose. Don't fail to use MURESCO to brighten and beautify your rooms. Write for descriptive literature.

BENJAMIN MOORE & CO. Carteret, N. J. Toronto, Can. Brooklyn, N. Y. Cleveland, O. Chicago, Ill.

HOLSTEINS AKEVIEW

Two young bulls, calved March 27th and April 25th, sired by Count Hengarveld Fayne De Kol, whose sire is the sire of De Kol Creamelle, 10,017 lbs. milk in 100 days, and whose dam is the dam of Grace Fayne 2nd's Homestead, who made 35.55 lbs. butter in 7 days. These two bulls are mostly white, and are smooth and big. Must make room for this season's calves, and will sell reasonably.

E. F. OSLER, BRONTE, ONTARIO AND YORKSHIRES

EINS More high-record cows in our herd than in any other in Canada, including the champion Canadian-bred three-year-old, and the champion two-year-old of the world for yearly production. The sire of these champions is our main stock bull. We have a large number of heifers bred to him that will be sold right to make room for our natural increase. Also bull calves for sale. We are booking orders for spring pigs, also sows safe in pig. We invite inspection of our herd. Trains met at Hamilton when advised. Long-distance Bell phone 2471 Hamilton.

D. C. FLATT & SON, MILLGROVE, ONT. R. F. D. NO. 2

Fairview Farms

We are offering sons of Pontiac Korndyke, sire of the world's record Pontiac Clothide De Kol 2nd, 37, 20 lbs. butter in 7 days, and the sire of seven Apple, 31,62 lbs. butter in 7 days, is a full sister to the world's record cow, making these two full sisters Apple, 31,62 lbs. butter in 7 days, and severage for the seven days 34,41 lbs. each, equalled by no other two full sisters of the breed. Also sons of Sir Johanna Colantha Gladi, whose dam and sire's dam average 33,61 lbs. each, which is higher than can be said of any other sire of the breed.

Dams of many of these calves are high-record daughters of Pontiac Korndyke and Rag Apple Korndyke. Write me for breeding and price, E. H. Dollar. Heuvelton, St. Law. Co., N. Y.
