Forty years ago, when I first discarded drugs and devoted my whole attention to the study of Electricity, I could not afford to do business on to-day's basis, but I have so perfected my Electric Appliances, and the knowledge I have gained from all these years of experience and research is so great, that I will now give my world-famed Dr. Sanden Electric Belt, with Electric Suspensory, to any man who suffers from Nervous Debility, Varicocele, Losses, Rheumatism, Lamé Back, Stomach, Liver and Kidney Troubles, absolutely

FREE UNTIL CURED.

I don't ask you to pay or deposit one cent until I convince you. Simply call or write for a Belt and wear it for two months, and if cured pay me the usual price—in many cases not over \$5.00. If not cured, return the Belt, and that ends the matter. If you prefer to pay cash, I give you the usual wholesale discount. Be sure you get the genuine. My great success has brought forth many imitators, and I must caution the public against their worthless, blistering imitations.

Call to-day and take a Belt along, or write for one and my two valuable books on Electricity and its medical uses. Sent, sealed, free by mail.

DR. C. T. SANDEN,

140 Yonge Street, TORONTO, ONT.

Office hours, 9 to 6; Saturdays, until 9 p.m.

Hawthorn Bank Stock Farm

A new importation, just out of quarantine, are on the way west, and will reach home about May 1st.

GOSSIP.

PEDIGREED SEED THE BEST SEED.

A correspondent, who, last spring, sowed some pedigree Red Fife seed as well as the ordinary Fife wheat seed, procured in his district, informs the "Farmer's Advocate" that the stand from the pedigree seed shows at present a marked superiority over that of its less aristocratic rival.

THE MANGE AREA DEFINED.

We desire to draw the attention of stockmen and ranchers in the Territories to the advertisement of the Veterinary Branch, Department of Agriculture, which defines the mange area in the stock country. The Minister and the country are to be congratulated on the persistency shown in cleaning up the affected territory.

THE NORTHWESTERN MILLER'S ?

Have the transportation interests learned anything from the lessons of the last two years, or will they, when a new and abundant harvest comes to market, repeat the mistake which is responsible, more than anything else, for the decay of the export trade both in flour and wheat? Do they at last understand that, by making a rate on export wheat less than the rate on flour for export, they enabled the British miller to put himself in a position where he was independent of both American wheat and flour? That by expediting the export of the raw material, they first killed the export of flour and later the export of wheat also? If they have not realized this, then they will probably repeat the same old mistake and suffer the same ultimate loss of traffic.

If they have at last grasped the truth underlying the whole business; if they actually know that it is fatal to the export trade both of wheat and flour to discriminate against the manufactured product, then, with the coming of a new and plentiful crop, the trade may look forward with confidence to a return of the export trade in wheat. The product of the American miller will again set the pace for foreign competition, and in order to equal this product a certain amount of American wheat is essential. At present, with American flour entirely out of the market, the foreign miller can use such wheats as he can get cheapest, for there is no standard of color or quality which he is forced to meet. The future of the export trade in wheat and flour now rests with the American carrier.

HEREFORD BARGAINS.

Two miles and a half north of Griswold, which is the third station west of Brandon, on the Main line of the C. P. R., is located "The Hanna Farm." Hanna Farm comprises somewhere in the neighborhood of 1,000 acres of as good rolling prairie soil as the Province of Manitoba contains. It has for its north-westerly boundary the winding Assiniboine, in the valley of which pastures the large herd of low-bodied, meek-eyed, rustling Herefords. It is of the Herefords we wish to speak now, although in the management of the broad, fertile acres there are many lessons to be picked up.

There are about ninety head of pure-breds all told and of all ages. Several of the older females have been contributing annually to the increase of the herd, and other are nursing their first calves this season. The breeding cows give all their milk to their calves, and the latter testify to the value of new milk for the development of broad back and heavy quarters. Naturally in a herd of this size there are a few which attract particular attention. Among these are two yearling heifers and others that were prominent in the show-ring at Brandon last year. At present there are for sale a two-year-old bull, Prince of Wales, by Prince of Poplar Grove, out of Hattie, by Young Ingleside II., one of J. E. Marples' breeding; twelve yearling bulls, by Prince of Poplar Grove and Prince Brandon. These bulls are good feeders, and rustle in the river bottoms in the summer. They should make a good purchase for anyone requiring grazing cattle. Three bulls from this herd were recently sold to Mr. Geo. Leason, of Calgary, to go to his ranch. Another, Prince Brandon, was sold to D. G. McCauley, of Winnipegosis. Parties having horses to exchange for bulls might also make a good deal with Mr. Hanna.

Itching, Burning, Stinging Eczema

With All Its Unbearable Torture is Entirely Overcome by the Use of Dr. Chase's Ointment.

Itching skin diseases such as eczema, salt rheum and tetter are the despair of the doctors. They prescribe some relief for the itching or an internal medicine to act through the blood, but usually tell their patient candidly that they cannot cure such ailments.

We do not recommend Dr. Chase's Ointment as an experiment, for it has long since passed the experimental stage as a cure for itching skin diseases. It has positively proven its power to relieve and cure in thousands of severe cases, and if you could read the sincere letters of recommendation which come to these offices you could not help but consider this the most successful treatment for diseases of the skin that was ever discovered.

It exercises to a remarkable degree that soothing, healing, antiseptic influence which alone is successful in making a thorough cure of eczema and other itching skin diseases.

Dr. Chase's Ointment, 60 cents a box, at all dealers, or Edmanson, Bates & Co., Toronto.
