J. W. KNITTEL,

GRAIN COMMISSION MERCHANT.

Member of the Winnipeg Grain Exchange.

Office: Union Bank Building. P. O. Box 340
WINNIPEG, MAN.

All kinds of grain handled on commission. Fully bonded. Write or wire us for quotations. Best prices possible always obtainable. For reference, apply to Manager Union Bank.

FARMERS!

Why sell your grain at home when you can realize full value by shipping it to North Bay for orders; advise me, and draw on me with bill-of-lading attached to draft, and I will sell for your account; my commission being 1/4c. per bushel?

A. O. McBEAN, 511 Board of Trade, Toronto, Ont
Reference, Bank of Hamilton.

of the Foot
Lifted the Plow
and Men and
Leveled the
Frame*

**Another Great J.I.C. Step
In Sulky Plows**

This picture shows the latest and greatest plow achievement of the age. And it shows some of the things that can be done with it. It is the J. I. Case new Self-leveling, High Foot-Lift Sulky Plow—a plow that is as far superior to all ordinary foot-lift plows as the walking plow was superior to primitive ground scratching methods. Look at this photograph again. The boy in the seat with his foot alone, not merely lifted this great weight, but he raised the plow bottom from a plowing position, six inches under ground, clear up into the frame, six inches above ground, and he leveled the frame with the same operation. This is a distinct feature of the

J. I. Case Self Leveling, High Foot-Lift Sulky

Other foot-lift plows lift the bottom independently of the frame and then only two or three inches above the ground. In order to raise the bottom as high as six inches above the ground and level the frame in other plows, it is necessary to manipulate one or more hand levers in addition to the foot lever. And this must be done at the end of each furrow. You know what that means—extra work, inconvenience, and time.

All the exclusive features that make J. I. C. Sulky Plows so different from the ordinary kind, are found on the J. I. C. Self-Leveling, High Foot-Lift Sulky. The bottom enters the ground point down, heel up, and starts plowing immediately. It comes out point up, heel down. A simple device by which the heel of the plow is raised or lowered, enables you to level the bottom from point to heel, thus insuring its going into and staying in hard ground and gives the advantage of changing the angle of penetration to suit the condition of the ground.

We want an opportunity to tell you more about this wonderful plow; about the superior materials in it; about the J. I. C. principles of construction and the many labor saving devices that make work lighter for both man and horse. There isn't a line of implements on earth that can claim greater consideration than the J. I. Case line—and that includes walking, sulky and gang plows, harrows, cultivators and planters. Let us tell you why. As a special inducement for you to write for our catalogue, we are making the following special offer:

FARMER'S ENCYCLOPEDIA FREE—POCKET EDITION We have just had compiled for our exclusive use, one of the most valuable volumes ever prepared for the farmer. It contains: cultivation, veterinary suggestions; in fact a thousand and one things which make it of priceless value every day to the farmer and his family. We will send one of these volumes to any farmer answering the following questions: 1. How many acres do you cultivate? 2. What implements will you probably buy within the next six months? 3. Do you own or rent your farm? 4. What is the name of your dealer and his postoffice address? Simply answer these four questions, sign your name and address, enclose ten cents for postage and packing, and we will mail the Encyclopedia to you, together with our catalogue. Write today.

W. G. Fonseca, Esq.,

I am pleased to say that the Mica Roofing Felt I got from you for enclosing a barn on my farm, 30 x 64 with 16 ft. posts, has given the greatest possible satisfaction. It kept the barn thoroughly warm, and after three years' exposure to the weather, is as good and firmer than when first put on.
