#### MONTREAL STOCKS.

Trading has not been very active this past week. Values show some increases in some stocks, notably in C.P.R., and Power has declined from its former position on small sales. The entry of the Robert syndicate cannot possibly affect the value of Power, as its business is continually increasing and will do so, and until such time as the syndicate can deliver power, the increase in business cannot budge Power much out of its present run and income. There are great possibilities for both power producers. C.P.R. has shown much appreciation since our last and closes to-day at 158 1-8 bid. Steel closed at 18. 1-2 better than vesterday.
