NEW CAMOUFLAGE PRACTISED BY SUBS

Oil Released to Surface of Water as Though U-Boat Had Been Hit

London, July 24.—(Correspondence of The Associated Press)—Tricky German U-boat commanders have conceived a new plan designed to deceive crews of the Allied submarine destroyers in the game of hide and seek in European waters. When a depth bomb is discharged and does not cripple or destroy the German under-sea boat, as sometimes happens, a quantity of oil is released by some device of the submarine and quickly rises to the water's surface. The hope of the German U-boat captain is that the commander of the destroyer will see the oil, believe that the submarine has been wrecked and drop no more depth charges. Meantime, the German is endeavoring to escape. American and British commanders of destroyers and submarine chasers discovered the scheme of the Germans some time ago and since then have been dropping depth bombs in greater numbers than previously, using the oil as a guide to the general location of their target. "Oil camouflage," the American and British navy men call this latest German submarine trick.

CO-OPERATION IS WATCHWORD IN WAR

Munition Manufacturers in Old Land Pool Resources and Forget Jealousies

Manchester, England, July 24.—(Correspondence of The Associated Press)—Co-operation is the watchword of the manufacturers in this district engaged in making munitions. Before the war such concerns guarded their factory secrets zealously but when the plants were dedicated to the munition needs of the government, all resources were pooled. Trade jealousies were forgotten and factory secrets were freely exchanged to further the common cause. More than 200 firms in this district undertook to carry out government contracts. In the case of small firms unable to take over individually an entire contract, several club together and do five-sevenths of the work required. The remaining two-sevenths is performed at an assembly plant, and any profit made there is divided among the various contractors included in the group. The government's Board of Management in the Manchester area has placed contracts for amounts running into many millions of pounds a year. Production amounts to 300,000 shells weekly, and vast quantities of other munitions necessities. There was considerable waste in shell manufacture at the outset in private factories owing to the methods that had to be employed before the proper kind of equipment could be installed. The first price of 25 shillings for 18-pound shells has been reduced to 11 1/2 and 12 shillings, and it is stated that the manufacturers are making a larger profit now at the reduced price. Many of the converted plants turning out shells are on a non-profit basis. Many others devote all net returns to philanthropic work or invest the money in war bonds.

AMERICAN NAMES ARE ON NAVY LIST

U. S. Officers Attached to British Admiralty for Special Work

London, July 24.—(Associated Press)—The British "Navy List" which has just appeared is the first official publication of the kind to contain the names of certain American naval officers. They are included in the British list because they have been attached to certain Admiralty departments for special work. The list of "Ships and Vessels of the Royal Navy" shows still further increase from the very impressive and lengthy list of a year ago, although the regular warships are no longer set down, and the list is limited to vessels taken over by the Admiralty for the duration of the war. One page, which used to be devoted to the names of the honorary "Admirals of the Fleet" has shrunk to a single paragraph and a single name. It used to include the German Emperor, Prince Henry of Prussia and the Emperor of Russia. The first two have been crossed out altogether, while Nicholas who used to be listed as "His Majesty, Emperor of all the Russians," is now merely "His Majesty Emperor Nicholas."

NEW HIGHWAYS FOR PROVINCES

Ontario Acquires Prescott-Ottawa Road and Napanee to Kingston

TRANSFER AUGUST 15

Toronto July 24.—Announcement was made yesterday by Hon. Findlay G. Macdunnell, Minister of Public Works, that the Government had decided to take over the Prescott-Ottawa road and the section of the main highway between Napanee and Kingston on August 15. Some \$100,000 will be spent in this way on the Prescott-Ottawa road. The Minister announced also that the Government would take over the Queenston-Grimsby road from Hamilton to Queenston on the same date. Some time ago the Government passed an order-in-Council designating the Provincial Highway from Hamilton to Grimsby, and the Queenston-Grimsby road. The Government's program of the Government to be held up. Because of these the Government found it impossible actually to assume possession of the whole highway. However, after careful consideration it was decided to take control of the specified sections. The work to be done this year will be of a preliminary nature. Ditches will be cut and where necessary temporary surfacing will be done. Route of the Railway The Prescott-Ottawa road is fifty-six miles long. From Prescott it runs easterly along the river road, to what is locally known as Johnson's town; from there it continues north to Spenceville; it runs north from there through Kemptonville to the Rideau River; crossing the river it runs easterly into North Gower township and thence runs northerly through the village of North Gower to the village of Grimsby. The 2nd concession of Lot 5, and thence easterly to Watson's Corner and back to the Rideau river; it then runs northerly through the village of Grimsby to the village of Grimsby. The route of the road will be determined at a later date. The plans of the route have been sent to the Registry offices concerned by the Deputy Minister of Highways, W. A. McLean. The Government has also taken over the York or Kingston road from Napanee to Kingston, which is twenty-five miles long. This section from Toronto to Port Hope, which was taken over last year, is about fifty miles long. The road from Hamilton to Queenston, which is known in Wentworth county as the "Stony Creek road," and in Lincoln county as the "Q. and G." road, is about forty miles long. The roads will follow the former routes. Province Pays 70 per Cent. Instead of the 50 per cent. sent to the upkeep of these roads, as was done when they were under the county system, the government will now pay seventy per cent. The government will not work through the existing county road organizations. Engineers will be placed in charge of each stretch of highway that is being taken over and they will employ foremen and laborers necessary to do the work. No further organization will be required in the department to direct the improvement of the highways, although when construction work begins probably a new department will have to be created.

CHATAUQUA WILL OPEN SATURDAY

Six Days' Program to be Presented For Benefit of Red Cross

Brantford has established a reputation as one of the most musical cities in Ontario, if not of Canada. For this reason, the members of the Women's Patriotic League are anticipating a large attendance at the Red Cross benefit Chatauqua, which opens Saturday for six afternoons and evenings. The programs consist of entertainments, lectures and music, and will be given in a tent housing 2,000 people, which will be pitched on the school for the blind grounds. The ladies interested in the Red Cross are looking for a large season ticket sale, as on this depends largely the amount of the net proceeds to be secured for the Red Cross. His Worship, Mayor MacBride, has heard a portion of the program to be given here, and is very enthusiastic over same. Not only is he interested, but the following representative citizens of Brantford are lending their moral support and efforts in making the six days a successful event: E. L. Cockshutt, W. Norman Andrews, Llewellyn Brown, G. A. Woodside, Postmaster W. G. Raymond, Charles A. Jarvis, Wm. D. Christianson, Logan Waterous, W. B. Preston, Capt. O. E. Jenkins, E. B. Lawrence, Frank Cockshutt, W. H. Raes, C. B. Robinson, W. H. Webling, W. B. Boddy, Thos. Hendry, H. E. Watt and A. Harley. T. O. Buckles and Mrs. Ida Hamilton, representing the Dominion Chatauqua, are spending a few weeks here assisting the Women's Patriotic League. They are stopping at the Belmont Hotel, where they state they will gladly give any assistance or information desired to any who will telephone them or call at the hotel.

SAY CONFERENCE MAY END FRIDAY

After Which Canadian Ministers Will Likely Make Quick Return

By Courier Leased Wire London, July 24.—The Morning Post says that the imperial conference, which has been sitting in the morning and the afternoon for the past few days hopes to finish its business by the 26th instant. A few sittings of the imperial cabinet should suffice to consider the decisions arrived at during the conference, and it is expected that immediately afterwards the ministers attending will arrange an early return to the Dominions. Already several Canadians, including the Hon. Meighen and Calder, and the premiers of Alberta, Manitoba and Saskatchewan have returned to Canada. Sir Robert Borden last week visited three Canadian camps, and was much impressed with the excellent marching of a French-Canadian regiment, composed of "Canyens" who had been in training for one day only. The premier stated that he learned at each camp that the men now arriving from Canada were making wonderful progress. Sir Robert will receive the freedom of the city at Cardiff to-morrow.

ENEMY DRIVEN ACROSS HOLTA RIVER, LOSING 600 PRISONERS

Further Progress in Albania Drive

Paris, July 24.—Further successes have been won by the Allies in Albania, the war office announces today, as follows: "Eastern Theatre, July 23.—There was a successful artillery activity in the region of Doiran and west of the Vardar. Patrol engagements took place in the region of Nonte. In Albania, our troops continued their attacks yesterday, and after heavy hand-to-hand fighting drove the Austrians from all their positions south of the Holta river. In the course of two days we captured six hundred prisoners, including six officers, and twelve machine guns. On our left on the west bank of the Derbent river, Italian troops captured Hill 900. Hill 900 Captured. Rome, July 23.—The Italians are continuing their advance in Albania. The war office announced today that the Italian troops, pushing along the crest of Malisloves, captured Hill 900. Further to the east, French parties occupied the heights on the left bank of the River Holta. The text of the communication follows: "In the Tonalé region, in the Val Arsa and on the eastern edge of the Asiago Plateau, the artillery duels have been more intense. Hostile patrols were driven back with losses at Mount View, in the Mori region, and on the Asiago. Airplanes bombarded the Matterello railway establishments. During the action on the nineteenth on Corno di Cavento, a mountain gun, eight machine guns and a large quantity of ammunition were captured. The Italian troops are pushing along the crest of Mal Siloves in Albania, and have captured Hill 900. Further to the east, French parties occupied the heights on the left bank

DESULTORY BOMBING IS EXCITING

Airmen Become Expert at Distracting Attention of Defense Guns

Behind the British Lines in France July 24.—(Correspondence of The Associated Press)—One of the most exciting tasks to which airmen are assigned is what is known as "desultory bombing" over one spot for an hour or more. The object is to distract the attention of the anti-aircraft defenders of a given district, and a machine carrying a dozen or more bombs is employed for the work. At first the airman, a pilot and an observer, approach their target cautiously. With engines throttled down, the craft glides nearer and nearer. Below all is quiet. No German searchlights are sweeping the sky. When the attackers are almost over their objective a rocket rises toward them and bursts into a cluster of red stars. The machine has been discovered. At once six or seven searchlights from their beams aloft. The pilot looks at his watch; it is time to begin his desultory bombing. He flies steadily on, although a barrage of bursting shells lies now in front of him. The observer looks through the wires of his bomb-sight to the ground below. At the proper instant he thrusts his lever forward and releases two bombs. A few seconds later he sees the flash of their explosions, and above the crackling barrage, he can hear two dull roars. He signals to the pilot and the machine turns and sweeps away from the fiery rings of shells and searchlights. A few miles away the airplane flies to and fro at top speed. The puzzled searchlights vainly feel the sky in all directions and then, one by one, are switched off. Then the pilot quickly moves again toward the target. Another bomb is dropped. As it explodes the searchlights reappear and the barrage is renewed, while through the thickly grouped shell bursts are threaded the chains of green flaming globes, so much used by the Germans. As the machine flies away and this time, to bewilder still more the soldiers below, the observer fires a very white light which slowly drifts below and fades out. All the searchlights follow, until they die. Repeatedly the airman returns to the attack. Bombs are dropped at intervals until the end of the hour when the machine quietly returns to the base and the clouds of smoke telling of the havoc wrought by the bombs.

J. M. YOUNG & CO. JULY CLEARANCE SALE. Exceptional Price Opportunities Available for Thursday and Friday. WOMEN'S SUMMERY SUITS and DRESSES. Ladies' Pearl Grey, Kitten's Ear Crepe Suit, beautifully tailored, New York model. Formerly priced. \$47.50. Clearing Price \$27.50. Clearing at \$8.50. A few untripped shapes left at special value, only 49c.

J. M. YOUNG & CO.

ANNOUNCEMENT FALL WHEAT SEED IN VIEW of the partial failure of the Fall Wheat crop in this Province this year, it will be necessary for farmers to make early arrangements for the supply of seed which they will need for Fall Sowing. Under these circumstances farmers who have on hand quantities of wheat suitable for Fall Seeding are urged to conserve them for this purpose. If there is no demand locally, the information should be supplied to this Department, or to the Local Office of this Department in your County, so that every effort may be made to have an equitable and satisfactory distribution. The need for foodstuffs justifies a large acreage of Fall wheat in this Province again this year, and the co-operation of the farmers in the mobilization and distribution of the available seed supplies is invited. ONTARIO DEPARTMENT OF AGRICULTURE GEO. S. HENRY, Minister of Agriculture, Parliament Buildings, Toronto, Ontario.

Children Cry FOR FLEISHER'S CASTORIA BOYS' SAILOR SUIT By Anabel Worthington. For that interesting age in the life of every small boy when he first starts to kindergarten there is nothing nicer than a trim looking sailor suit. The style illustrated in No. 8499 has a blouse which is cut exactly like a middie and it is to be slipped on over the head. The applied yoke is a matter of choice. A tiny pocket may be inserted on the left side to hold the handkerchief. The set in sleeves are gathered into straight wristbands. The trousers are separate and they are the straight kind which come just to the knees. The boy's sailor suit pattern No. 8499 is cut in three sizes—4, 6 and 8 years. As on the figure, the 4 year size requires 2 yards 3/4 inch with 1/2 yard 22 inch contrasting goods and 1/2 yard 36 inch lining. To obtain this pattern send 15 cents to The Courier office, or two for 25 cents.
