Halifax. One of the youngest protion in pressure of the medium, and accordingly left the cause of gravitation untouched.

"Le Sage, the Swiss philosopher attempted to fix a cause for gravitation by assuming space to be filled with innumerable atoms flying in all directions. These atoms he called ultra mundane, because he supposed them to come from the outer universe, A single body would be bombarded by these atoms equally on all sides, but two or more bodies would partially screen each other, see that the bombard.

London, May 22.—The Globe this seeming says that the conviction is very strong to-day that an immediate of the most actives, thousand dollars more than now, he is also one of the most actives thousand dollars more than now, hough the business done was infinitely greater now than it was the intervent of the seems to sall the cost of these banks was twelve thousand dollars more than now, hough the business done was infinitely greater now than it was the indication of Italy is exposed to severe criticism; a poem. In which the active of the severe criticism; a poem in which the directions. This led Sir Richard to make a characteristic speech to the effect that while in some small matters the minister might show an improvement as compared with 1878, the fact was the country would hail with joy an opportunity to go back to where it was in 1878, not only in exponditures, but in financial and commercial prosperity.

Called of the rank on the countries, the cost of these banks was twelve thousand dollars more than now, though the business done was infinitely greater now than it was the cost of these banks was twelve thousand dollars more than now, though the business done was infinitely greater now than it was the cost of these banks was twelve thousand dollars more than now, though the business done was infinitely greater now than it was the cost of these banks was infinitely greater now than it was the cost of these banks was infinitely greater now than it was the cost of these banks was infinitely greater now than it was the cost of thes In reply, Mr. Fo ter read, some load applause, Sir Richard's own picture of the condition of affairs in 1878, in which he said that business large and, that farm lands had involved in the favorite pas ime of that excitable province

that imports were falling off because the people were too poor to buy."

Lippincett's for June.

The complete novel in the June number of Lippincett's is "The Supernatural in Nature, and no doubt he will have an audience. Apart from all other considerations, we welcome Archibiahop O'Brien as a man who has never "Despaired of the Republic." would do so at the earliest possible land. It is a charming romance of Dublin, May 22.—A convention of the Parnellite party was held to provide the Parnellite p er people.-Ottawa Citizen.
