

THERE WILL BE A COAL FAMINE NEXT WINTER, SAYS SHERMAN

Even if Strike is Settled Tomorrow—The Situation in the Southern Mines Remains Unchanged—Men Received Wages on Saturday and are Spending Money Freely—Hon. Mr. Cushing Hands out Statement—Could Settle Difficulty in ten Minutes if he were Given Free Hand.

[From Our Own Correspondent.] Fernie, B.C., April 22—Everything is very quiet here to-day, but the situation is still alarming. Saturday night \$36,000 was paid out for the March payroll, but the men are spending money freely, seemingly not troubled with thoughts of the future.

Hon. Mr. Cushing has interviewed both sides, and at the finish made the following statement: "I wired Flumerfelt and Whitesides, urging them to try to effect a settlement, so that the mines can resume operations at once. It looks as if there would be some difficulty in effecting a settlement."

"I am fully convinced that Sherman has done everything in his power to avert the calamity. The telegram received from Lindsey saying Mitchell had ordered Sherman to keep men at the mines, and that at Coleman at noon of the 17th, Sherman showed me the wire dated April 18th, and by that time the men were out. Sherman says if the wire had said: 'Order men to return to work, all would have been O.K., but it only said: 'Order men to remain.'"

"As the men were already out by the 18th, Sherman could do nothing. I do not think the conditions are so serious as to warrant a tie-up. I intend to stay here till the matter is settled, if I can be of any use."

"I would settle anything in ten minutes, if they would let me work it."

Meeting of Operators To-Day. There is a special meeting of operators called for to-day on the strength of a wire received by Dr. Innen from Lindsey, who will arrive to-day. So far, all have reported that they are coming, except Stockett, of Bankhead, and Little, of Camrose. J. L. Parker, a conciliation board member, appointed by the operators, wired Lemieux saying he had secured L. P. Eckstein, but was unable to agree upon a third member for the board, although ten names had been submitted to both sides.

To-night he received an answer as follows: "Your telegram received announcing inability to agree upon a third member, and requesting the consent of labor to make the appointment. The minister directs me to say he hopes to be in position shortly to announce the names of the third member."

"(Signed) F. ACKLAND, Secy., Dept. of Labor."

"Until a third member is agreed upon and got in touch with, no meeting of the conciliation board can be held. Operators here say the C. P. R. is blinding when it says it has no coal, and predicts that if the strike is settled by Tuesday the road will be operating in forty-eight hours. The bluff is to try and get things fixed up. A prominent operator also said he would as soon see the C. P. R. tied up as not, because the mines were previously tied up owing to car shortage

on the road. When they wanted coal themselves, they would give cars, but as soon as they were satisfied, the car shortage commenced again giving other customers no consideration whatever.

Miners and Operators to Meet. A meeting of operators and miners will be held on April 23 to try and arrange a settlement before the conciliation board meets. Vice-President Lewis will be at this meeting. Sherman spent Saturday night at Michel returning to Fernie on Sunday.

Coal Famine Next Fall. He says that whether the strike is settled immediately or not, there is sure to be a coal famine next fall and he advises people to get coal. There are rumors that the difficulty can be settled before the board meets, as miners are now out. The operators say Sherman now outwitted the men at Fernie by saying at the meeting held a week ago on Sunday that the men over the Pass were out. They then sent embassies over to the Pass saying the Fernie men were out. They attribute the walk out to this. All smelters are shut down except the Granby, which will be able to run one week more. A meeting of miners was held at Coal Creek to-night. Sherman and Peterson attended. The operators accuse Sherman of trying to break loose from the American organization, and form a Canadian organization, which he wants to become the John Mitchell of Canada. It is not exactly known yet now Mr. Cushing will be received. Sherman says he has been arrested. Associated Press Dispatch.

Coleman, April 21—The following despatch has been received by H. N. Gales, manager of the International Coal and Coke Co. and it is valuable inasmuch as it indicates the sentiment of eastern business firms: "Your statement of the position between the operators and labor agitators is published in the morning papers here. I am amazed that you operators have not forced proper government action against the agitators and who are causing the strike. You have law, right, reason and the country at your back, and evidently President Mitchell as well. What are you waiting for?" (Signed) S. H. C. MINER."

Mr. Miner, who was the leading spirit in the great Granby property, is now the largest stockholder in the International Coal Co., and has very large lumber mills in Vancouver and elsewhere on the Pacific coast.

Other gentlemen spoke of the losses that had already been incurred, and that were likely to be incurred on account of the tie-up. Mr. Cushing stated that he was aware of the loss, and that he was making arrangements to have the tie-up terminated as soon as possible. He stated that the tie-up was due to lack of transportation facilities.

The board of trade was much incensed at a report from Ottawa, which stated that Mr. Lemieux had said in the House that a settlement in Calgary and Winnipeg were unnecessary, and that the tie-up was due to lack of transportation facilities.

The following telegram was sent to the government at Ottawa: "After further investigation of conditions in the coal situation, we find they are more serious than stated in previous dispatches. The situation is such as to leave the country at a standstill, and leaving the country at a standstill is positively not due to lack of transportation facilities."

Additional telegrams with detailed statements of the conditions will be sent later on. It was the general opinion that the honor of the country had been impeached, as the statement in the previous telegram, was absolutely correct.

Vested With Power to Settle. Winnipeg, April 21—T. Lewis, of Indianapolis, vice-president of the Miners' union, is en route to Fernie to attend the conference of mine operators and strikers, vested with full power to effect a settlement. He takes a hopeful view of the situation, and believes the trouble will be terminated within a week.

BOURASSA TO ACQUIRE VEHICLE. In Order that He May Have Vehicle to Advance His Third Party Interests.

Montreal, April 21—La Patrie says: "It is stated that the nationalist paper, under the direction of Mr. Henri Bourassa, M. P., is in connection with Mr. Omer Peroux, at present of the Verite, as editor-in-chief. The member for Labelle will presently address circulars to his friends, in connection with the work which he has in view."

Spanish Elections are Hot. Madrid, April 21—Elections for members of the Chamber of Deputies opened to-day and thanks to the precautionary measures of authorities, the only trouble was at Barcelona, where voters came to blows at the polls, and one man was killed and two were injured. At Madrid the Republicans have made a material gain. Returns from the provinces show that 119 ministers, 100 Conservatives and 34 Liberals were elected without opposition.

39 WERE DROWNED. A Terrible Ferry Disaster on Neva River. Associated Press Dispatch. St. Petersburg, April 22—It was learned to-day that 39 persons lost their lives through the foundering of the ferry steamer Archangevskii while crossing the Neva Saturday night. Divers to-day recovered several bodies but the majority were carried into the Gulf of Finland. The old ferryboats have been replaced by larger vessels and the owners of the line will be prosecuted for gross neglect.

NO DANGER OF TIE UP. Coal Miners' Strike Would Not Affect C. P. R. for Some Time. Associated Press Dispatch. Montreal, April 22—In an interview to-day on the western coal situation, Sr. Thomas Shaughnessy said the affair was greatly exaggerated. He stated there would be no tie-up of railway because of lack of coal. He says that two weeks ago, when the miners decided to quit work, the C. P. R. ordered 5,000 tons shipped west and this is now on the great lakes and would be pouring into the west in a short time.

Rev. F. W. Pattison, B. A., a graduate of Rochester Theological Seminary, spent Monday in Calgary, going north this afternoon to Didsbury to supply the Baptist pulpit of that place.

MURDER CASE ON WEDNESDAY

Crown Secures an Adjournment Till Then—Houde's Counsel Protest.

The Woods murder case was called before Magistrate Wade this morning at 10.30, but a further adjournment was granted till Wednesday forenoon at the same hour.

Crown Prosecutor Cogswell asked for the remand and stated that he thought he would be able to proceed on Wednesday.

Mr. Robertson, who is associated with Mr. Mackie, for the defence, protested against a further adjournment. He stated that the accused was only arrested on suspicion, and it was not fair that he should be kept in custody without a trial. The application was irregular, according to the code, he asserted, for it should have been accompanied by affidavit to show the cause of the delay.

Mr. Cogswell replied that no injustice would be done in the short delay asked for. The crown was entitled to every consideration in the preparation of its case. The request of Mr. Cogswell was granted by the magistrate, and he again stated that he "expected to be in a position to proceed on Wednesday forenoon."

WILL LAY CORNER STONE. Associated Press Dispatch. Kingston, April 21—His Honor Lieutenant Governor Clark will lay the corner stone of the new medical laboratory at Queen's university on Wednesday afternoon after convocation. That one thing does away with more waste effort, banishes more bother, abolishes more mess and sleep, than you'll ever think possible until you've seen and used the Capital.

Thirty dollars a year more profits out of every cow you keep for profit's sake, whether you keep four cows or forty! That is what I promise you. That is what the Capital Separator will get for you—and it is the only thing that will get it. Yes, indeed, I CAN prove it, right up to the handle. Ask me and see.

And I will not only show you why and where and how the Capital gets that extra profit for you, but—I will show you in plain words how you can make that profit with a fraction of the work you have to do to-day to get half as much.

That is why my plan for SELLING butter and cream comes in—my plan specially devised for your special case and your special locality, and

But all these things, and many more, are things you ought to know about in detail. I can't tell you about them here, no room to. But if you will simply write to me and ask for the facts, I will show you why the Capital Separator is the one thing your farm needs right NOW—and you that CAN afford to get it right now. Doesn't matter if money's a little tight with you—I can take it as the Capital will buy itself before you have to pay a cent for it. Write to me and I'll hear the whole story, it's worth while.

Halifax, April 21—The decision in the case of the Dominion Steel Co., Limited, and the National Trust Co., Limited, in the Dominion Steel Co., in which the plaintiffs claim fifteen million dollars damages, has been filed. The plaintiffs' statement of claim is very long and detailed, and which are in the paragraph of the statement of claim, and they say the agreement was entirely rescinded and put an end to by written agreement of the parties in June, 1929. They will object that the paragraph discloses no reasonable cause of action, and is frivolous and vexatious.

Double Your Dairying Profits Without Buying A Cow

SUPPOSE somebody offered to swap a blue-ribbon, prize-winning milker for any cow in your dairy-herd, — without a cent to boot? Wouldn't you jump at the chance?

I will do as well as that for you. I will show you how to get as much real money out of an ordinary herd of dairy cows as you'd get by your present methods out of a herd of prize-milkers. I will prove to you there's twice the money in dairying you've been getting, — and you needn't spend any money to get the difference. I will do this just as soon as you write me and say: "I keep so many cows. I get such-and-such a price for my milk—or cream—or butter" (whichever end of the dairy business you follow).

I am not setting any traps for your dollars or your brains. The more skeptical you are, the harder I'll convince you. The best friends I've got among my customers are the men who didn't believe any cream separator amounted to much. They found out different after they got a Capital Separator and put it to work getting back the money they'd been feeding the pigs and vealing the calves. They found out that the Capital Separator adds over thirty dollars a year to the actual net earnings of every cow they keep. So will you find that out, if you'll write to me and ask for the plain truth about this whole separator idea.

The Capital gears run so easily that a ten-year-old boy can handle the milk of eight cows in twenty minutes, and not be out of breath when the run is over. The mechanism is so perfect by balanced, so nearly automatic, that the whole work of perfect cream separating, twice a day, won't use up as much energy as it takes to carry a bucket of water fifty yards.

The Capital whole-milk tank is the only really low-down tank there is—because it's just as low-down as a tank can be put, — it stands on the floor! That one thing does away with more waste effort, banishes more bother, abolishes more mess and sleep, than you'll ever think possible until you've seen and used the Capital.

But all these things, and many more, are things you ought to know about in detail. I can't tell you about them here, no room to. But if you will simply write to me and ask for the facts, I will show you why the Capital Separator is the one thing your farm needs right NOW—and you that CAN afford to get it right now. Doesn't matter if money's a little tight with you—I can take it as the Capital will buy itself before you have to pay a cent for it. Write to me and I'll hear the whole story, it's worth while.

But all these things, and many more, are things you ought to know about in detail. I can't tell you about them here, no room to. But all these things, and many more, are things you ought to know about in detail. I can't tell you about them here, no room to. But if you will simply write to me and ask for the facts, I will show you why the Capital Separator is the one thing your farm needs right NOW—and you that CAN afford to get it right now. Doesn't matter if money's a little tight with you—I can take it as the Capital will buy itself before you have to pay a cent for it. Write to me and I'll hear the whole story, it's worth while.

Double Your Dairying Profits Without Buying A Cow

SUPPOSE somebody offered to swap a blue-ribbon, prize-winning milker for any cow in your dairy-herd, — without a cent to boot? Wouldn't you jump at the chance?

I will do as well as that for you. I will show you how to get as much real money out of an ordinary herd of dairy cows as you'd get by your present methods out of a herd of prize-milkers. I will prove to you there's twice the money in dairying you've been getting, — and you needn't spend any money to get the difference. I will do this just as soon as you write me and say: "I keep so many cows. I get such-and-such a price for my milk—or cream—or butter" (whichever end of the dairy business you follow).
