

Demand the Original

STACOMB is the original Hair Dressing for making hair stay combed. Leaders of style—stars of the stage and screen have used STACOMB for years. It is a dressing that makes hair stay combed with a soft lustrous finish.

Ideal for Bobbed Hair.

STACOMB is ideal for bobbed hair especially when worn in the straight or Egyptian style.

Good for Eyebrows, Too.

A little STACOMB on the finger tips rubbed on the eyebrows gives an attractive appearance. It is fine also for the moustache. STACOMB controls the "wildest" hair.

Liberal Size Tubes: Fifty Cents.

EAST KOOTENAY POWER UNIT IN OPERATION.

(From Montreal Daily Star.)
The second unit of 7,500 horse power capacity of the new power plant at Elk Kootenay Power Company at Elk commenced operation last week, making a total of 15,000 horse power in the plant at Bull River, or a total of over 22,000 horse power.

The company is at present supplying over 5,000 horse power to the Consolidated Mining & Smelting Company's new concentrator at Kimberley and to the Sullivan Mine, and in addition is supplying power to the various coal mines in the Crow's Nest pass and to the towns of Fernie and Cranbrook.

The company's fiscal year ended March 31 last, and the annual report will shortly be ready.

START MADE TO REACH GREATER DEPTH AT DOME.

(From Montreal Star, May 16.)
SOUTH PORCUPINE, Ont.—Following a recent decision to extend operations to greater depth on the Dome Mines, a start has been made this week with the object of establishing a new haulage level at a depth of 1,750 feet, about 150 feet below the present deepest workings.

Two diamond drills are employed in connection with exploring the Keweenaw area south of the sediments where former exploration indicated the presence of large bodies of rich ore. Success in this direction would add greatly to the resources of the mine, and the outlook for success is excellent, according to official advice.

Milling operations continue at daily rate of a little over 1,000 tons, and at the daily production averaging close to \$12,000.

Statistics Show Value of Insulin

PLAYING BIG PART IN REDUCING DIABETES DEATH RATE.

NEW YORK, May 19.—Evidence that the use of insulin, the new discovery for curing diabetes, is serving to halt the mortality rate from the disease, are contained in statistics just made public by the Metropolitan Life Insurance Company.

With the record of its 15,000,000 insurance policy-holders for the first quarter of 1924 at hand, the statistical bulletin of the company announces that "mortality from diabetes declined 28 per cent. as compared with the first quarter of last year among the white policy holders, and 17 per cent. among the colored. Each additional month helps to confirm the impression that the growing use of insulin is an important factor in bringing this about."

The death rate from diabetes for March, 1924, was 1.65 per 100,000 as compared with 2.23 for March, 1923, according to the company's figures.

Stole Own Horse Now Faces Court

OLE MANSON, SEATTLE'S WAR-MAYOR, IN STRANGE FIX.

LOS ANGELES, Calif., May 21.—Ole Hanson, wartime Mayor of Seattle, now a Los Angeles real estate operator, is ready to defend himself against a charge of horse stealing filed in Pasadena Justice Court by Clarence W. Basten, of Sierra Madre, a suburb.

After having been arraigned on the horse theft charge and released under \$10,000 bail pending his preliminary hearing, the former Seattle mayor inquired whether the old California law providing a death penalty for horse thieves still was in effect. Assured that the statute had been void half a century, he breathed a sigh of relief and explained the horse imbroglio.

"I am charged with stealing my own horse," he said. "When I came here from Seattle I shipped five ponies, one a strawberry roan named Golden. Soon afterward someone stole Golden and for 18 months I searched for the animal. Then, last Saturday I saw the horse in a vacant lot at Sierra Madre. I called him by name and he pulled up his stake and came to me."

"I bought Mr. Basten, the purported owner, and he told me he had bought Golden from a man in Philadelphia, who

had purchased it from a Mexican, who said he got it from a boy. He turned the horse over to me, but asked my aid in recovering the money he had paid for it. Later, apparently, he changed his mind, for the next thing I knew he had sworn to a complaint charging me with stealing the horse. "It is with sincere joy that I learn the death penalty for this offence is no longer in existence."

The Making of Stage Thrills

Ralph Lynn, the well known English comedian, tells in the following manner, how new style thrills are produced.

"A terrific explosion, a blinding flash, dense clouds of smoke, and a dash on the stage, dramatically arranged, and my clothes blown to rags. That was the great comedy thrill in 'Tomb of Money.' Now, how was it done? I will tell you."

Two big bombs are placed in a great iron tank with a massive lid, loose, but captive. These bombs are fired electrically, and each bomb is tested before the performance. The flash is easily arranged, and the smoke comes from an iron canister, containing a substance which, when ignited, produces dense clouds of black smoke which are blown on the back of the stage by electric fans.

If the bombs fail, and they do so twice at the 'Tomb of Money,' we have a man who pounds vigorously at the huge drum, and another one operating the thunder sheet. We had some fun and misfortune with this elaborate apparatus.

Often we get "thrills" that are not intended.

My brother, for instance, was playing the villain once, and had to shoot a man. Quite unconsciously, as he pushed the revolver into his pocket he had his finger over the business end. The trigger caught in the side of the pocket and off it went, badly damaging his finger and blowing a hole in the front of his trousers.

The audience evidently thought the thrill a little premature, and liked the hole in his trousers, but what they did not realize was that my brother had to complete his part with a finger so badly damaged that to this day he cannot make full use of it. I remember once having an accident myself which the audience presumably thought was a very clever fake thrill.

Too Much Realism.

It was in a duel. My opponent was not an expert fencer, and one stroke got past my guard and laid open the back of my hand and my wrist. The blood poured out, and I had to apply the handkerchief even while I fenced. The audience thought it a wonderfully realistic effect, but my antagonist was naturally very concerned. His lines ran like this:

"Curse you, you devil!" in a thundering voice—and "Sorry did man—are you all right?" in a muttered whisper. "Curse you—I'll kill you!" "Can you stick it, Lynn?" "Curse you!"

It was much too realistic for my liking and too painful for a long time afterwards.

Once, years ago, I did a most dramatic death at the end of the act, and the drop should have come down on my prostrate form. Unfortunately, I died a bit too far forward, and the drop came down with me in front of it.

Now the drop represented a scene miles away from the place of the tragedy, and there was a dead in front of it. There was nothing to do but to keep still and catch the eye of the stage manager.

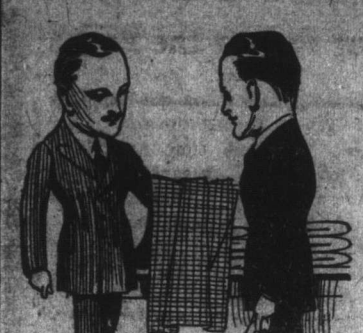

I did, and mutter, "What am I going to do?" He was nonplussed, but then muttered "Roll off in death's agony," but the audience thought it exceedingly funny, as it undoubtedly was.

Making Diamonds Glisten

The art of cutting diamonds to increase their lustrousness was discovered by accident. Up to the end of the 15th century, diamonds were simply cleaned and mounted in their natural state. In 1456, a young gentleman of Bruges, by rubbing a couple of diamonds together, observed that they acquired an extraordinary polish. This observation was the starting-point of the diamond-polishing and cutting industry which was almost exclusively localized in Amsterdam. It is recorded that the discoverer made the first trial of his improved mode of cutting in 1475 on three large rough stones which were confided to his care by Charles the Bold, Duke of Burgundy. The new industry was greatly encouraged by Cardinal Masarin, who caused the diamonds in the French crown to be recut, whence they obtained the name of the 15 Masarins.

Whistle Wastes Millions

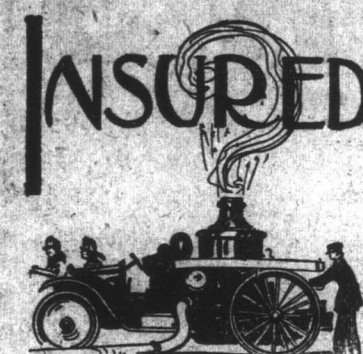

The "chime" whistle in general use on Canadian and American railways engines has been condemned by an expert after careful investigation. In the first place, the popular "chime" whistle, with its comparatively low-pitched notes, is only about one-sixth as effective a warning as would be a high-pitched single note. Then its position is wrong. It is in front of the smokestack, the bell, the steam dome, and the electric generator, not to speak of a blanket of hot gases. The result is that its sound is broadcasted to the sides of the track instead of being sent directly ahead where it is desired. Moreover, it costs too much. According to calculations the lighting of railway engines of the United States alone, consumes 2,434,925 tons of coal every

TO-DAY'S MESSAGES.

ACADIA UNIVERSITY'S NEW DEVELOPMENT.

WOLFVILLE, N.S., May 28. The corner stone of the new main building at Acadia University was laid this afternoon by Dr. George B. Cutten, President of Colgate University, and ex-President of Acadia. The edifice, when completed, will include an auditorium with a seating capacity of 2,000 to 2,500. Dr. Cutten delivered an address on democracy and education after which he was followed by Dr. Patterson, Acadia's President, who declared Acadia had entered on a new era of development as an independent educational institution. He stated that Acadia was seeking to raise \$1,500,000, of which \$450,000 is now in sight. The building at present outlined, he stated, will cost about \$800,000.

FIRE AND EXPLOSION THREATENS ROYAL PALACE AT BUCHAREST.

BUCHAREST, May 28. The Arsenal ammunition dumps, on the outskirts of this city, were destroyed to-day by a terrific series of explosions and fire. Enormous damage was done and a great loss of life is reported. The Royal Palace at Cotroceni was imperilled. The conflagration is still raging to-night.

TORNADO'S TOLL.

WETUMKA, OKLA., May 29. Sweeping a path six blocks wide through the best residential section of this old town, a tornado late yesterday left in its wake the toll of seven known dead. Twenty five or thirty persons were seriously injured and a score or more received slight hurts.

U. S. NAVY TO BE STRENGTHENED.

WASHINGTON, May 29. The House last night passed a Bill designed to bring the U. S. Navy up to the ratio fixed by the Washington Arms Conference. The measure would authorize the construction of eight scout cruisers, six river gunboats and extensive improvements to six battle ships at a total cost of \$111,000,000.

ANGLO-SOVIET CONFERENCE AT A STANDSTILL.

LONDON, May 29. M. Rakovsky and other Russian delegates to the Anglo-Soviet Conference have been invited to attend the King's Levee on June 2nd, according to the Daily Herald. Negotiations which have been going on between the Russian and English delegates for some time are now at a standstill, the two bodies being far apart on the question of pre-war debts, but every effort is being made to reach an amicable settlement.

FORMER AMBASSADOR DEAD.

PARIS, May 29. Pierre Paul Cambon, formerly French Ambassador to London, died at his home last night.

Claims New Sure Cure for Cancer

SYNTHETIC FLUID BESTOWS IMMUNITY SO LONG AS TAKEN.

ROME, May 19.—Addressing the medical section of the League of Nations, in convention here, Professor Gaetano Fischera claimed the discovery of a synthetic fluid which bestowed immunity from cancer upon the user as long as the fluid was taken.

He added the claim that he could diagnose the predisposition to cancer several years before the disease developed, the causation being the lack of cancer-dissolving fluid engendered by a gland in the throat.

Fischera insists that his discovery is an absolute cure for cancer, even in its advanced stages, in conjunction with operations. London authorities are sceptical.

DIED.

At Chicago, on April 6th, at the home of his niece, Katherine and Elizabeth Kelly, 8449 Harvard Ave., Thomas J. Dwyer, formerly of "Oak Farm" this city. Funeral took place on Tuesday, April 8th, at 9.30 a.m. to St. Bernard Church. Interment Calvary.

NOTE OF THANKS.—I sincerely wish to thank the members of the Fire Department who responded so quickly to the call, and also all friends and neighbors, who in any way assisted in saving my home, which was greatly endangered by the recent fire which destroyed the home of James McDonald on Tuesday last. Sincerely yours, WILLIAM HALL, Majordomo, Major's Path.

NOTE OF THANKS.—Mrs. Robert W. Miller wishes to express her sincere thanks to those friends whose expressions of sympathy were tendered to her, and to those who sent wreaths and letters of sympathy in her bereavement.

NOTE OF THANKS.—Mrs. James O'Brien, Cape Breton, wishes to thank Mr. Lawrence Cashin, Mr. James T. Martin (Undertaker), Mr. M. Harvey, and crew; also the clergymen of St. John's and other friends in the city. Const. Power and the good people of Cape Breton for their kindness and sympathy during her recent and bereavement.
