

## Spain and Her King (By HAROLD BEGBIE in the Daily

On the character of Alfonso the Thirteenth, far more than on the inellectual resources of the Military ectory, hangs the imperilled des tiny of Spain.

For, in spite of all the just criticisms and malignant calumnies of Spanish Socialists living in foreign countries, the King of Spain is easily the greatest figure in Spain and can command at any moment a loyalty which would be given to no other Spaniard. He is the Sovereign, let us remember, of a nation whose ardent loyalty to the Spanish Throne cost it first a great military Empire and afterwards nearly all its many colonial possessions. Of no nation more loyal and long-suffering, and of no Sovereigns more unworthy and incompetent, is there any record in the history of mankind.

But apart from his inherited power of appeal. Alfonso is a person who counts in Spain by reason of his intellectual qualities. He is perhaps the most variously accomplished of living Spaniards. Infinitely in this respect the superior of his present Minister, he is also a quickening intellectual force in the life of Spanish aristocracy. It would not be an exaggeration to say that in the presence of their King most of the noblemen of Spain have the appearance of provincials.

Character, of course, is another hatter, but it is worth while emphasising the fact that the King of Spain a person of no little culture, with ntellectual sympathies which give at least some weight to the charm of his friendly and unaffected personality. Of his character, on which all turns, this may be said with confidence, that he is a far more serious person than his political enemies would have us

Let us now see what the peril is which confronts the Spanish King and the Spanish people.
