CURLING RINK.-It will be seen by advertisement that a meeting of those favorable to the erection of a curling rink will be held in the Town Hall on Monday evening next, at hall past seven. The subject is one of interest to all lovers of the "roaring game," and these are particularly requested to attend.

THE BRITANNIA HOUSE.—Messrs. Hefernan Bros. advertise, to-day, the openng of their stock of fall and winter dry goods. That they have a very large and tastefully selected assortment any person can observe by looking into their store, and that they dispose of them at moderate prices would seem to be proved by the number of people who go to the Britannia House to make their purchases. They do well in the clothing line also, and never turn out any but perfect fits.

KNIGHTS OF THE ROAD.—Says the St.
John Globe There ought to be a separate
order of knighthood established, to be
called the "Order of the Grand Trunk."
Certainly the Grand Trunk Road is most
prolific in knights. Sir George E. Cartier
is a solicitor of the concern; Sir Morton

Hincks made a fortune out of it. Sir J.

in Canada through it; and the last member of the order is the President, who has

ACCIDENT.—Mr. John Ewing of this place met with a serious accident, on Thursday, by being kloked by a horse while in the act of administering a does of medicine. Mr. E. was being assisted in the operation by Mr. John Crawford and Mr. Nelson, and when the operation was about half performed, the animal got restive, and raised itself up on its hind legs, and struck Mr. Ewing on the face with one of its fore feet, smashing the bottle containing the medicine into atoms, and cutting Mr. Ewing's face severely. The blow was so severe that Mr. E. was completely stunned and rendered insensible for some time, having in addition to the injury on the face, received considerable injury in the chest. Mr. Crawford received a blow on the arm from the other foot of the horse, and has also been considerably hunt.—Surnia Observer.

The Earth giving up its Dead-

The Earth giving up its DeadPrivate letters from Valparaiso, and other ports subject to the recent terrible commotion, give many facts and incidents not alluded to in mewspaper accounts heretofore published. One writer reports a singular and horrible sight that occurred in Arica, on the south side of the ruined city:

As the earth opened and yawned, there came up five hundred mummies, who stand in long lines facing the sea, every one of the skeletons in perfect preservation—the hands doubled up and supporting the chin—the knees drawn up, and the feet supporting the fleshless body! This must be one of the most frightful sights possible, and quite beyond description. The spot where the mummies now stand was once an old cemetery—some ninety ago, it is said—and these skeletons are doubtless the fabled Inoas and Indians, who either buried themselves alive or were interred in this manner. They correspond exactly to the old mummies of the Inoas which I described in a former letter as among the curosities to be seen at Lima. As the ground

The morning if was dark, cold and rainy, not a heavy downfull, but an almost continuous and the continuous and t which the shafts can be changed so as to be run on either eity or country roads, is also shown in connection with these cutters, which are also finished in the same rich and elegant style which characterizes the wheeled conveyances. An ordinary looking double seated buggy completes Mr. Armstrong's collection. He states that he can afford to take, and has taken his manufactures to the States, paid the 35 per cent in gold and netted a fair profit. This is encouraging.—Globe.

COST OF WAR.—It is stated that since the peace of 1815 Great Britain has spent-on her military and naval establishments, and the interest of the national debt (for-past wars), the encormous sum of 2,597 millions of pounds sterling; in the present-year, 1868, the cost of the army and navy is more than 28½ millions; the interest of the national debt is more than 26½ millions; and the outlay for fortifications—£530,000; making a total expenditure, for one year only, of 55½ millions. This is at the rate of £152,583 per day, or £6,356 per hour, or exactly 100 guineas per minute day and night throughout the year, on account of war expenditure. The remaining 15 millions of the nation's annual expenditure (about 70 millions) suffices for the civil government and all other expenses.
