STALKING THE KING OF BEASTS. Fifteen yards from him there was a

small tuft of grass about ten yards wide. Ah, if I could reach that. But before I could place that in a

straight line between him and me there were fifty yards of sunbaked mud to cross. I had lost many a shot from trycross. I had lost many a shot from trying to approach too close to game and had sworn, "Never again," But the 'Devil of the Stalk" was in my heart. I would reach that grass or forgo the shot. I drew, examined and replaced the two cartridges in my five hundred magnum, looked at the end of the barrels to see that they were clear of sand, placed the hammers at full cock, and inch by inch crawled from my cover out onto the stark, naked plain.

placed the hammers at full cock, and inch by inch crawled from my cover out onto the stark, naked plain.

The lion's back was turned to me, but I could clearly see the droop of the shoulders as he swallowed the lumps of meat. I was already half-way—my hand was slowly pushing the rifle another yard ahead, when my ear, tight pressed to the ground, hear a faint noise followed by a sharp hiss. A puff adder raised its villainous squat head from the dust, looked into my face with flashing eyes and quivering tongue and sulkily crawled away. Startled I had drawn back my head but, seeing it depart, had immediately again lowered it behind my outstretched arm. The lion, however, had caught the movement and instantly turned towards me.

The sun played full upon his face, and I could plainly see the wrinkles on his nose and the blood-flecked slime dripping from his jowl. He took half a dozen steps towards me and then to my astonishment, returned and resumed his meal. Again I crept forward till at last the patch hid him from my view.

I promptly rose to my feet, and bending low, glided rapidly towards the grass. Fifty yards—forty yards—thirty—twenty—ten, like midwinter snow my footfalls sank upon the dust. I held my breath. My fingers twitched on the trigger guard. My heart stood still in the last tautening of a frantic strain—yet another six steps and I could peer through that waving bunch of grass—at what?

A faint rustle broke the heavy silence

A faint rustle broke the heavy silence

of the scene. A grand, sad face peeped round the corner of the grass. Our eyes met.

The wondering expression broke into a hideous snarl—and before I could recover from my surprise the lion had gone. Sick at heart, I dashed round the intervening clump; the wide stretch of grass forty yards beyond, parted to the rush of a great yellow form; loud spoke grass forty yards beyond, parted to the rush of a great yellow form; loud spoke my gun; plump came the answer of the bullet speeding home; a fierce rumbling growl; and north, south, east and west the seemingly untenanted world was dancing in the noontide heat, while a smoke-wreath 'dily drifted down the plain. — Ewart Scott Grogan in June Outing.

INCREASING USE OF CEMENT.

Twenty Times as Great Now as Ter Years Ago.

With all that has been written from With all that has been written from time to time in recent years concerning the value of cement as a building material suitable for innumerable purposes, few people realize the extent to which its use has increased. According to statistics given by a man in the business, the total production of cement in this country in 1895 was 990,324 barrels. Last year more than 22,000,000 barrels were produced here, and to grant against Municipal League on the subject of fire peril.

It has the property-upon a fine powder. It has the property upon being treated with water of binding it being treated with water of binding it-self and the substances with which it may be mixed into a homogeneous mass, which sets rapidly and becomes harder than granite. In this condition it is im-pervious to water and weather, is unaffected by heat or cold, and does not con-tract or expand. While its extended use is a growth of the last ten years, it has been employed in certain restricted op-erations for a much longer period, and its durability under all conditions has been definitely established. Entire houses have been made of it which, when nouses have been made of it which, when finished, areas if cut out of a solid block of stone. Cyclones in Jamaica.

Terribly destructive though cyclones are there are occasions when they have a beneficial effect. Some little time ago Jamaica was swept by a cyclone from end to end, and the destruction it wrought was estimated at nearly three millions. The community bravely faced the situation, and now recognizes that even a huricane is not without its blessings. The fruit seasons have been more favorable since the cyclone than experienced for many years past. "A hurrienced for many years past. "A hurricane," says the acting Governor of Jamaica, "appears to assist in promoting fertility of the soil. The total destruction of the banana crop and the atention compulsorily given to clearing cultiva-tion have resulted in a yield in the last few months of a much finer grade of fruit than had been exported on so large a scale previously."

The "Why" of Buying.

"Every time you make a purchase stop a moment and think just why you bought the article you did buy in preference to some similar article," suggests a magazine devoted to publicity. And it might well have added: "Ask yourself why rou bought it at the store where you did buy it in preference to some other store that sells the same sort or goods." Ninety-nine times out of a hundred the article purchased is advertised, and the store that sells it advertised. The man who is influenced by other people's advertising ought to be pretty well convinced that he can influence other people by his advertising.

The best way to win support for a business enterprise is to get people interested in it. The best way to interest them is to tell them something they don't know, but are likely to want to know, about it. For instance: Few people know anything about the ins and know; about it. For instance: Few people know anything about the ins and outs of professional photographs. Any good professional photographer will confirm the statement that nine person out of ten don't know what to wear when they sit for a portrait. Municipalize Everything. (Montreal Gazette.)

(Montreal Gazette.)

The city of Leeds, England, has gone into the business of supplying its residents with milk. It has purchased a dairy farm, and will purchase others, if the demand for the corporation brand of the lacteal fluid warrants it. Some people may think this is an unwarrantable extension of the principle of municipal ownership. It is nothing of the kind. Everybody in Leeds requires milk. People can get along without street cars, without telephones, without street cars, without telephones, without electric light. They are merely luxuries. But everybody must have milk, for everybody uses it in some form or other daily: Instead of wondering at the temerity of Leeds in municipalizing its milk service, it is more in order to inquire why it does not follow up the municipalizing of its markets by municipalizing the sale of everything sold therein, meat, vegetables, butter, cheese, everything required to sustain life. And when it has gone thus far, why should it not proceed to municipalize the sale, if not the manufacture, of the clothing required by the people? And why should not Leeds provide its people with their amusements, and municipalize tis churches? When it has gone-thus far it might as well finish up the job and abolish all individual effort and initiative. What a prosperous and progressive city would Leeds then be?
