The Newtoundland Trouble. The Newtoundland Trouble.

LONDON, April 20.—Hon. Senator Howlan arrived in London by the same steamer as the Newfoundland delegates. He says that the whole Newfoundland question affecting Canada, particularly the bait question, was fully discussed by himself and the Newfoundlanders, and he had every reason to expect a speedy friendly agreement between Newfoundland and Canada. In the meantime the delegates are very may with meantime the delegates are very busy with the officials of the Colonial Office and mem-

Two Hundred Minors Entombed Alive—Rescued After Many Hours' Imprisonment.

London, April 20.—A serious accident during which the lives of 200 men were imperiled took place near Longton, Staffordshire. Two large cages or care are used for hoiseing and lowering men and materials in a colliery in Longton district. While one of them was being hoisted and the other lowered they came into vident collision and were smashed to pieces. The result was the shaft was badly damaged and choked up with debris, thus outting off communication with 200 miners whom the accident imprisoned in the mine below.

For fourteen hours the miners were shut up. This was a period of terrible suspense for their families, who crowded about the pit in a state of great agitation and distress. Eventually a small hole was pierced through the mass of wreckage and earth, and it was found possible to lower food by means of a rope to the imprisoned miners. Further work on the passage enabled those engaged in the rescue to haul the 200 miners one by one out of the mine by using buckets, to which ropes were fastened.

> Denver's Danger.
>
> Denver, Col., April 20.—Farmers living along Cherry Creek, above Denver, held an indignation meeting here Saturday and exposed a startling state of affairs. The Denver Water Storage Company has a reservoir 35 miles above the city to supply water to an immense tract of heretofore arid land of which it has secured control. The dam is 65 feet high and drains 300 square miles of country. The capacity of the reservoir is many millions of gallons, and if the dam gave way the enormous body of water would be precipitated upon a large part of the city of Denver after tearing over the homes of hundreds of ranchmen. There is now 40 feet of water over this day of the present the contract of the city of the men. There is now to the pressure has already this dam, and the pressure through it. They forced several streams through it. They say the dam is built upon quicksand, and that the material used is so poor that its erection was criminal. The company deny the charges. The reservoir is 600 feet above the city. It cost \$450,000.

Rioting Renewed in the Coke Region of Pennsylvania A Furious Fight

Scottdale, Pa., April 18.—The coke region is again the scene of lawlessness. Last night a band of about 100 strikers assaulted the Leisinring No. 2 plant, of the Frick Coke Company. Shots were exchanged, and for a time the fight waged furiously, but finally the mob beat a retreat. One of the deputies was dangerously injured, and, it is thought, cannot recover. Throughout the region all last night the earth fairly trembled with a succession of shocks, following the explosion of dynamite bombs. At Leisinring (No. 3, of the Frick works) a crowd of strikers gathered on the hill and at one time 30 bombs were exploded simultaneously, tearing great holes in the earth, breaking windows in many houses and frightening the people for miles around. At Leisinring Deputy Sheriff Crawford and posse were serving writs of ejectment when they were captured by an angry mob and harshly treated.
