

A Poor Weak Woman

As she is termed, will endure bravely and patiently agonies which a strong man would give way under. The fact is women are more patient than they ought to be under such troubles.

Every woman ought to know that she may obtain the most experienced medical advice free of charge in absolute confidence and privacy by writing to the World's Dispensary Medical Association, R. V. Pierce, M. D., President, Buffalo, N. Y. Dr. Pierce has been chief consulting physician of the Invalids' Hotel and Surgical Institute, of Buffalo, N. Y., for many years and has had a wider practical experience in the treatment of women's diseases than any other physician in this country. His medicines are world-famous for their astonishing efficacy.

The most perfect remedy ever devised for weak and delicate women is Dr. Pierce's Favorite Prescription.

IT MAKES WEAK WOMEN STRONG. SICK WOMEN WELL.

The many and varied symptoms of woman's peculiar ailments are fully set forth in Plain English in the People's Medical Adviser (1008 pages), a newly revised and up-to-date Edition, cloth-bound, will be sent on receipt of 50 cent stamps to pay cost of wrapping and mailing only. Address as above.

NOTE AND COMMENT.

An English professor has invented a spanking machine. The British Government should buy up all rights to the invention and use it on the suffragettes.

Two London policemen have resigned because they are tired of being worried by the women suffragists. Now they know why some men leave home.

That the late general of the Salvation Army deserves the honor of a lasting memorial will meet with universal acceptance. It may be said indeed that the great and wide organization he established for the amelioration of the poor, all over the world, is his real and only appropriate monument.

Between eminent sanitarians and pure food specialists the lay public is kept in a state of restless uncertainty. Just as we were educated to examine a plate of beans with a microscope before eating, drink nothing but boiled water, fumigate our clothes to kill disease germs, and wear sterilized socks to prevent tired feet, along comes another "eminent authority" who assures us these precautions are useless and unnecessary. It would be a relief if the advisory board could agree upon a policy free from contradictions and fluctuation.—Vancouver Province.

The author of an Iowa bulletin estimates that as a soil builder each acre of alfalfa in that section annually adds to the farm over twice as much nitrogen as an average acre of red clover. As a feed he estimates that an average acre of alfalfa produces 5.5 times as much protein as timothy, 4 times as much as oats, 2.75 times as much as corn and 2.6 times as much as red clover. As to yields, sixteen seedings made on the Iowa Station Farm since 1903 have produced an average yield of 4.38 tons per acre, and one seeding yielded 7½ tons in one year, while another had a three year average of 5½ tons.

The Khan in Toronto Daily Star: A little Yankee boy taunted Young Canada one time telling him that the beaver was a rat with a swelled tail. Young Canada got back at him by saying that the American eagle was a vulture with a swelled head. A Roland for an Oliver! But here again Canada is fortunate. Several nations of the world have eagles for emblems, two-headed eagles in some cases; but we have a monopoly of the beaver, which is a fine model of industry. In the past two thousand years the eagle has changed maps, but the beaver makes geography and is still making it.

The Judge Remarks

It is unfortunate that President Taft should be afflicted with gout at a time when he is called upon to make the greatest race of his life.

The second wife of a Tacoma sea captain has applied for a master mariner's license. In naval precedence this would give her the rank of second mate on her husband's boat.

Trailing side-whiskers, frilled shirts and spats have been revived by British dandies. As the late Lord Dundreary would remark, "There are some things no fellow can understand."

Edison, according to despatches, worked six days with only two hours sleep to complete his new disc phonograph. Lovers of rest hope that the same habit will not be a feature of the new machines. Some now in use work overtime as it is.

While forest protection is in the public mind the services of the greatest fire warden of them all, one Jupiter Pluvius, should not be forgotten. Without his invaluable assistance the best directed efforts of the other officials are minimized.

Young men who incur the displeasure of a Calgary girl do so at imminent risk to their physical well-being. At the "Stampede" this week a young woman of that city won the world's championship for roping and subduing one of the fiercest double-humped bucking bronchos that ever cavorted over the prairies.

Italians in New York number over 200,000. Sunlight is the best germicide known to the medical fraternity.

Dancing was originally a means of expressing religious feeling.

The British Patent office receives 30,000 applications per annum.

Forty years have elapsed since the phonograph was introduced.

The never-failing medicine, Holloway's Corn Cure, removes all kinds of corns, warts, etc., even the most difficult to remove cannot withstand this wonderful remedy.

RISKY POSTAL SERVICE.

In Russia the Government Opens All Suspicious Packages.

Our own service of mails is well organized. There is little doubt in the mind of the average person that when he posts a letter it will reach its destination.

But in other lands he might well fear for its safety. In Russia, for instance, any letter or parcel that is regarded with suspicion is immediately opened and its contents noted. A clever machine gums it up again, so that the recipient does not know that it has been tampered with.

In Lapland the mails are carried in sledges drawn by reindeers. In the wilds of the Caucasus the postman holds a post of danger. He must be protected against brigands and against the weather, for he often has to climb mountains more than 12,000 feet high.

Asiatic Russia, which is apt to be marshy, has the buffalo post, and, of course, the progress made is very slow. Buffaloes are more powerful than oxen, and they are also used in Siberia for carrying the mail.

Other postmen in foreign lands are the swimming postman of India and the sking letter carrier of the Andes. For the latter place the Argentine government specially imports Norwegians.—Exchange.

Mexico's Smoking Mountain.

In 1897 I climbed two volcanoes in Mexico, Popocatepetl, or "the smoking mountain," about 17,800 feet, and Orizaba, the former the most famous because within view from Mexico City and thus a source of especial pride and admiration to the inhabitants, who have been loath to believe that any other of their mountains could be higher. Popo has a really splendid crater, about half a mile across and 1,000 feet deep. The walls are generally vertical, but in one or two places it is possible to descend. When workers are engaged in collecting sulphur machinery is used to hoist them up and down. From Popo's summit there is a glorious prospect, not alone of the immense crater, but of the beautiful "White Lady" (Iztaccihuatl) reclining a thousand feet below, of Orizaba on the far horizon and of the charming valley of Mexico.—Annie S. Peck in Christian Herald.

Wellington's Integrity.

The Duke of Wellington was noted for his rigid integrity. Here is an instance which occurred in reference to his large estate. Some farm adjoining his lands was for sale, and his agent negotiated for him for the purchase. Having concluded the business, he went to the duke and told him he had made a capital bargain. "What do you mean?" asked the duke. "Why, your grace, I have got the farm for so much, and I know it to be worth at least so much more." "Are you quite sure of that?" "Quite sure, your grace, for I have carefully surveyed it." "Very well, then; pay the gentleman from me the balance between what you have already given and the real value of the estate."

Strong Circumstantial Evidence.
A young wife was in tears a few mornings ago when her mother called. When asked what was the matter she replied that her husband was out late the night before and had been to a drinking party.
"What makes you think he had been to a drinking party?" asked the mother.
"He came home," sobbed the young wife, "wearing a phonograph horn for a hat."—Kansas City Star.

More Careful Now.

The young wife had given her husband a dance. "You've improved wonderfully, Jack," she said as they sat down. "Don't you remember how you used to tear my dress?"
"Yes," he replied. "I wasn't buying them then."—Boston Transcript.

Barks.

The class in natural history being asked the difference between a dog and a tree, the head boy answered, "A tree is covered with bark, while a dog seems to be lined with it."

Noisy Sleep.

Hub (angrily)—Here! What do you mean by waking me out of a sound sleep? Wife—Because the sound was too distressing.—Boston Transcript.

Whales to the value of \$11,000,000 were killed during the last season.

A census of London's motor cars recently made showed a total of 1983.

Norwegian whalers are reaping large profits fishing in the South African waters.

The production of Kentucky whiskey has ranged from 6,000,000 to 80,000,000 gallons per year.

The smallest tree in Great Britain is a dwarf willow two inches high, growing on the top of Ben Lomond.

In still air a pigeon can fly 1200 yards a minute, with a breeze 1500 yards, and with a strong wind 2,000 yards.

The Greek government is building railroads, constructing irrigation works and making harbor improvements.

Watford Flour Mills

We have the following brands of Flour always in stock and can give you close prices on any quantity.

SUNRISE, First Patent from Manitoba wheat			
FIVE ROSE	do	do	do

Tinsmithing of All Kinds

We have secured the services of Mr. C. H. Butler who thoroughly understands Heating and Plumbing and will be glad to furnish estimates on anything in this line.

Roofing and Job Work Solicited

The N. B. Howden Est.

COAL

The annual car shortage, which is just beginning to be felt, will be more severe this winter, than ever before. With the increasing volume of traffic in all lines of business, which will directly follow a bumper harvest, and COAL SHIPMENTS sixty days behind time, the railroads anticipate that after October 1st conditions will be as acute as to seriously cripple business. The shortage will be 150,000 cars.

For This Reason

if you have not already contracted your requirements, now is the time to get busy.

Our Orders have been taken care of. LOOK TO US AT ONCE, we can supply your wants.

GEO. CHAMBERS.

HONOR GRADUATE ONTARIO VETERINARY College, Dentistry Specialty. All diseases of domestic animals treated on scientific principles. Office—One door south of the Guide-Advocate office. Residence—Main St., one door north of Dr. Gibson's office

COUNTY OF LAMBTON
Treasurer's Notice as to Lands Liable for Sale for Taxes A. D. 1912.

TAKE NOTICE that the list of lands in the County of Lambton liable for sale for arrears of taxes by the Treasurer of the County has been prepared by me and that copies thereof may be had in the office of the Treasurer of the County of Lambton, in the town of Sarnia.

AND FURTHER TAKE NOTICE that the list of lands liable for sale as aforesaid is now being published in the Ontario Gazette in the issues thereof bearing date the 13th, 20th and 27th days of July and the 3rd day of August, 1912.

AND FURTHER TAKE NOTICE that in default of payment of the taxes in arrears upon the lands specified in said list so published in the Ontario Gazette, before the day fixed for sale of such lands, being the 16th day of October, A. D., 1912, the said lands will be sold for taxes pursuant to the terms of the advertisement in the Ontario Gazette.

AND FURTHER TAKE NOTICE that this publication is made pursuant to the Assessment Act 4 Edward VII. Chap. 23 and Amendments.

Dated at Sarnia this 10th day of July, A. D., 1912.

H. INGRAM,
Treasurer County of Lambton.
