#### THE ALDINE. The ART JOURNAL of America.

ISSUED MONTHLY.

'A Magnificent Conception Wonderfully carried out"

"A Magnificent Conception Wonderfully carried out"

The necessity of a popular medium or the representation of the productions of our great artists. has always been recognized, and many attempts have been made to meet the want. The successive failures which so invariably followed such attempts in this country to extantion an art ournal, did not prove the indifference of the people of American to the claims of high art. So soon as a proper appreciation of the want and an ability to meet it were shown the public at once rallied with enthusiaem to its support, and the result was a great artistic and countercial triumph—THE ALDINE.

THE ALDINE, while issued with all the regularity, has none of the temporary or timely interest characteristic of or filnary periodicals. It is an elegant miscellancy of pure, light and graceful iterature; and a collection of pictures, the rurest specimens of artistic skill, in black and white. Although such enceeding number affords a fresh pleasure to its friends, the real value and beauty of THE ALDINE will by most appreciated after it is bound up at the close of the year. While other publications may claim superior cheapmens, as compact, with rivals of a simular class, THE ALDINE is a unique and original conception—slone and unapproached—absolutely without competition in price or character. The possessor of a complete volume can not duplieste the quantity of fine paper and engravings in any other shape or number of volumes for ten times its cost; and then, there is the chrome, besides!

The haticnal feature of THE ALDINE must be taken in no narrow sense. True art is cosmopolitate while the fature of the patrons of THE ALDINE, as a leading characters to, the profuction of native art. Its mission is to cultivate a broad and appreciative art taste, one that will discriminate only on grounds of intrinsic merit Thus, while placing before the patrons of THE ALDINE, as an important feature, and its magnificent plates are of a size more appropriate to the satisfactory treatment of details tha

# Ayer's Hair Vigor,

For restoring Gray Hair to its natural Vitality and Color.

A dressing which is at once agreeable, healthy, and effectual for preserving the hair. Faded or gray hair is soon restored to its original color with the gloss and freshness of youth. Thin hair is thick-

ened, falling bair checked, and baldness often, though not always, cured by its use. Nothing can restore the hair where the follicles are destroyed, or the glands atrophied and decayed. But such as remain can be saved for usefulness by this application. Instead of fouling the hair with a pasty sediment, it will keep it clean and vigorous. Its occasional use will prevent the hair from turning gray or falling off, and consequently prevent baldness. Free from those deleterious substances which make some preparations dangerous and injurious to the hair, the Vigor can only benefit but not harm it. If wanted merely for a

# Vegetable Sicilian Hair Renewer

Every year increases the popularity of this valuable Hair Preparation, which is due to merit alone. We can assure our old patrons that it is kept fully up to its high standard, and to those near used it we can alone. We can assure our old patrons that it is kept fully up to its high standard, and to those who have never used it we can confidently say, that it is the only reliable and perfected preparation to restore GHAY OH FADED HAIR to its youthful color, making it soft, lustrous, and silken; the scalp, by its use, becomes white and clean; it removes all eruptions and dandruff, and by its tonic properties prevents the hair from falling out, as it stimulates and nourishes the hair glands. By its use the hair grows thicker and stronger. In baldness it restores the capillary glands to their normal vigor, and will create a new growth except in extreme old age. It is the most economical HAIR DRESSING ever used, as it requires fewer applications, and gives the hair that splendid glossy appearance so much admired by all. A. A. Hayes, M. D., State Assayer of Mass., says, "the constituents are pure and carefully selected for excellent quality, and I consider it the BEST PREPARATION for its intended purposes." We publish a treatise on the hair, which so send free by mail upon applications, which contains commendatory notices from clergymen, physicians, the press, and others. We have made the study of the hair and its diseases a specially for years, and know that we make the most effective preparation for the restoration and the preservation of the hair, extant, and so acknowledged by the best Medical and Chemical Autherity.
