THE EVOLUTION OF MEDICINE IN ONTARIO.*

BY H. B. ANDERSON, M.D., L.R.C.P. (LOND.), M.R.C.S. (ENG.)

Associate Professor of Clinical Medicine, University of Toronto.

In assuming the duties of President of the Toronto Clinical Society for the coming year, I wish to express to you my deep appreciation of the honor. To be elected to the chief office in a society which represents so much of the medical life of a great city is something of which any man might be proud. Limited though it is in numbers, within the membership of this Society are found many of those whose eminence as clinicians has gained for the medical profession of Toronto the place it now holds in the confidence and esteem of the community, and whose ability as teachers and wisdom as counsellors has contributed largely to mould the medical thought and direct the policy of our profession during one of the most important periods in its history. While appreciating the honor, equally do I realize the responsibilities which the position involves, and how much one lacks the qualifications to properly discharge them. I shall continue, however, to rely on that personal kindness and friendship which has been one of the most valued assets of my professional life, and shall ask of you and my associates in office the same sympathetic and loyal support so freely accorded my predecessors in the chair. During my tenure of office I can assure you that my best efforts will be devoted to maintaining the high character which has distinguished the work of this

*Presidential address, delivered before the Toronto Clinical Society, Oct. 10th, 1906.
