HEALTHY AND HAPPY LIVING FOR CANADIANS (Continued from P. 2)

"Without forgetting other sectors of the community, then, we must devote specialized attention, through the universities, toward assisting in the training of the men and women studying or employed in physical education and recreational activities, who must provide the technical leadership for an expanding Programme.

"Federal aid is being given through post-graduate scholarships and bursaries to increase the numbers of professionally-trained people in Canada. These awards, which can be used in or outside Canada, assist the whole range of post-graduate study, from work at the master's level up to post-doctoral research.

"Three types of award are available under the Act. These include post-graduate scholarships designed to assist persons already holding a bachelor's degree in physical education or recreation to proceed to the master's or doctoral level. Senior

HELP FOR HOCKEYI Soldat baardid en astado

"Now a word or two about our help to hockey. This great sport has naturally occupied a prominent place in our thinking.... One of our principal problems is how we can give the most effective aid to a sport which, financially, is in a relatively good position, but which nevertheless deserves all the support it can be given for development.

"A Committee of the National Advisory Council has been working with the Executive of the Canadian Amateur Hockey Association to devise ways in which federal help can be used most effectively. One of the first results of this collaboration is the \$50,000 grant made to the Association to assist in establishing national hockey leadership courses at five universities, selected to cover all regions of Canada, with a view to improving hockey coaching and management. This is, we hope, the beginning of a long and useful collaboration that will be of continuing help to hockey...."
